

DRUM HEATERS

Our drum heaters are perfect for drums where you want to keep the content at a consistent temperature, a certain viscosity or keeping the content from freezing.

The drum heaters are equipped with easy to use digital controllers or thermostats with various heating ranges from 0°C up to 200°C (32°F up to 392°F), which makes the drum heaters ideal for almost any purpose.

The drum heaters are designed in a durable and long lasting high quality lightweight design and the construction together with quick release webbing straps makes the drum heater easy to attach to any standard size drum.

Ideal for heating up:

- Water.
- Oils and also diesel fuel.
- Resin.
- Vaseline.
- Wax, e.g. lanolin (wool wax or wool grease).
- Fats.
- Butter e.g. Ghee.

Item # 11-9870
Lid # 15-1921A

Drum Heater 0-90°C

- Polyester fabric jacket
- Silicone insulated spiral wound resistance element
- Adjustable quick release buckles
- 3 meter (10 feet) power cable
- Standard sizes e.g. 200L (55 gal.).
- Digital adjustable controller 0-90°C (32-194°F).
- IP40 Protection.
- Warm-up duration approx. 24h (200L water from +20°C to +82°C (+68°F to +180°F) with a 1200 W drum heater)
- Top lid sold separately (item # 15-1921).

Item # 11-9858

Drum Heater for foodstuff

- Designed for the food industries
- Silicone/Glass fabric jacket.
- Glass filament blanket.
- Silicone insulated spiral wound resistance element.
- Adjustable quick release buckles.
- 3 meter (10 feet) power cable.
- Standard size 200L (55 Gal.).
- Thermostat 0-120°C (32-248°F).
- IP54 Protection.
- Warm-up duration approx. 24h (200 L water from +15°C to 80°C (+59°F to +176°F) with a 1200 W drum heater).

Item # 12-1208

Silicone Drum Heater 0-120°C

- Designed in durable silicone materials.
- Simple design for easy usage.
- Thermostat with range from 0-120°C (32 - 248°F).
- Mount up to 3 heaters on one drum.
- 3 meter (10 feet) power cable
- Standard sizes e.g. 200L (55 gal.).
- A base drum heater may be used additionally

Item # 11-9867

BASE HEATERS

Base heating is an effective and powerful way to heat up contents inside a drum or an IBC container.

The base heater is perfect for heating viscous or semi-solid products and making them very easy to discharge from a drum or a container with minimal to no waste product.

Base heaters are very easy to install and to use. simply place the heater under the container or the drum and you are all set to heat the contents. This easy installation also makes the heater ideal for heating and maintaining temperature while transporting drums or containers.

Ideal for heating up:

- Water.
- Oils and also diesel fuel.
- Resin.
- Vaseline.
- Wax, e.g. lanolin (wool wax or wool grease).
- Fats.
- Butters e.g. Ghee.

Base Drum Heater (0-120°C)

- Powerful drum heater.
- Compatible with standard size drums.
- 900 Watt heater.
- Supply lead: 2 meter power cable
- 0-120°C temperature controller.
- Weight: approx. 15 kg
- May also be used in conjunction with other drum heaters, lits or insulation jackets.
- Diameter 555 mm. – Height: 105 mm.
- Easy installation.

Item # 11-9868

Base Drum Heater (50-300°C)

- Powerful drum heater.
- Compatible with standard size drums.
- 1800 Watt heater.
- Supply lead: 3 meter power cable
- 50-300°C temperature controller.
- Weight: approx. 15 kg
- May also be used in conjunction with other drum heaters, lits or insulation jackets.
- Diameter 555 mm. – Height: 105 mm.
- Easy installation.

Item # 12-1170

IBC Silicone Base Heater

- Powerful base heater.
- Dimensions: 1035 - 851mm.
- Materials: 100% silicone.
- 1,5 meter power cord with no plugs.
- 0-150°C Temperature controller (additional product).
- 2700 Watt heater.
- Heats water from 15°C - 70°C in less than 40 hours in a fully loaded IBC Container.
- Easy installation.

Item # 13-1471

IBC CONTAINER HEATERS

An IBC container heater is the perfect solution when it comes to quickly and effectively heating up fluids and materials making them very easy to empty from a container with minimal to no waste product.

The IBC heater comes with up to 3 zone digital controllers, all adjustable from 0 - 90°C, making the container heater very fast and safe to heat liquids and maintaining the wanted viscosity for the content in the container.

The heater is designed in a durable and long lasting high quality lightweight design and the construction together with quick release buckles makes the container heater easy to attach to any standard 1000L container.

Ideal for heating up:

- Water.
- Oils and also diesel fuel.
- Resin.
- Vaseline.
- Wax, e.g. lanolin (wool wax or wool grease).
- Fats.
- Butters e.g. Ghee.

1-Zone IBC Container Heater

- Polyester material.
- Polyester inner.
- Silicone insulated spiral wound resistance element
- Adjustable quick release buckles.
- Warm-up duration approx. 72h (1000L drum with water starting from +15° C to +30° C with 1x1300 W heaters and isolation lid).
- 3 meter power cable with w/o prong.
- 1 Digital adjustable controller 0-90°C
- Class IP40.
- Top lid sold separately (Item # 11-9861D)

Item # 11-9860A

2-Zone IBC Container Heater

- Polyester material.
- Polyester inner.
- Silicone insulated spiral wound resistance element
- Adjustable quick release buckles.
- Warm-up duration approx. 48h (1000L drum with water starting from +15° C to +50° C with 2x1000 W heaters and isolation lid).
- 3 meter power cable with w/o prong.
- 1 Digital adjustable controller 0-90°C
- Class IP40.
- Top lid sold separately (Item # 11-9861D)

Item # 11-9860

3-Zone IBC Container Heater

- Polyester material.
- Polyester inner.
- Silicone insulated spiral wound resistance element
- Adjustable quick release buckles.
- Warm-up duration approx. 48h (1000L drum with water starting from +20° C to +73° C with 3x1000 W heaters and isolation lid).
- 3 meter power cable with w/o prong.
- 1 Digital adjustable controller 0-90°C
- Class IP40.
- Top lid sold separately (Item # 11-9861D)

Item # 11-9861B

IBC CONTAINER HEATERS

An IBC container heater is the perfect solution when it comes to quickly and effectively heating up fluids and materials making them very easy to empty from a container with minimal to no waste product.

The IBC heater comes with up to 3 zone thermostats, all adjustable from 0 - 90°C, making the container heater very fast and safe to heat liquids and maintaining the wanted viscosity for the content in the container.

The heater is designed in a durable and long lasting high quality lightweight design and the construction together with quick release buckles makes the container heater easy to attach to any standard 1000L container.

Ideal for heating up:

- Water.
- Oils and also diesel fuel.
- Resin.
- Vaseline.
- Wax, e.g. lanolin (wool wax or wool grease).
- Fats.
- Butters e.g. Ghee.

IBC Container Heating Performance
Contents: Water

IBC CONTAINER COVERS

IBC insulation jackets are designed to insulate and maintaining temperature inside an intermediate bulk container (IBC).

Most of our insulation jackets can be used in conjunction with a container heater to speed up the heating process. By adding an insulation jacket to a heater helps speeding up the heating process.

Our insulation covers are designed in durable materials and in a construction that makes the cover easy to install to an IBC container.

Ideal for:

- Maintaining temperature inside a container.
- Extra insulation to speed up heating process.
- Extra container protection.
- Safe container transportation.

Item # 13-1432

IBC Deluxe Insulation Cover

- Cordura materials with Teflon coating.
- Water repellent.
- Chemical resistant.
- Integrated lid.
- Strategically placed velcro access pads.
- Standard size: 1000L Container.

Item # 15-1738

IBC PVC Waterproof Cover

- 100% Waterproof.
- Produced in durable PVC materials.
- Welded seams for optimal waterproofing.
- Can be used in conjunction with an IBC Container Heater.
- Standard size: 1000L Container.

Item # 11-9861E

IBC Thermal Cover

- Metallic aluminum inner- and outer.
- Bubble wrap foil interlayer.
- Protects container from overheating when outside.
- Perfect heat and radiation blocking.
- Top velcro pad for top container access.
- Standard size: 1000L

Item # 15-1736

IBC CONTAINER COVERS

IBC insulation jackets are designed to insulate and maintaining temperature inside an intermediate bulk container (IBC).

Most of our insulation jackets can be used in conjunction with a container heater to speed up the heating process. By adding an insulation jacket to a heater helps speeding up the heating process.

Our insulation covers are designed in durable materials and in a construction that makes the cover easy to install to an IBC container.

Item # 15-1740

Ideal for:

- Maintaining temperature inside a container.
- Extra insulation to speed up heating process.
- Extra container protection.
- Safe container transportation.

IBC Full Insulation Cover

- Nylon materials.
- Water repellent.
- Full cover with no openings.
- Standard size: 1000L Container.

Item # 15-1740

IBC Deluxe Insulation Cover

- Nylon materials.
- Water repellent.
- Integrated lid.
- Strategically placed velcro access pads.
- Standard size: 1000L Container.

Item # 15-1733

IBC Top Cover

- Cordura material with Teflon coating.
- Water repellent.
- Chemical resistant.
- Standard Size: 1000L.

Item # 11-9861D
