

5 Port Solenoid Valve

Plug-in Type

Thanks to the flow increase, valve size can be reduced!

Saves energy and space.

SY3000

Ø 2, Ø 3.2,
Ø 4, Ø 6, Ø 8*1
fittings are connectable.

*1: Type M10/M11 manifold

SY5000

Ø 4, Ø 6, Ø 8
fittings are connectable.

SY7000

Ø 6, Ø 8, Ø 10, Ø 12
fittings are connectable.

At 300 mm/s

Possible to drive cylinders

Up to **Ø 50***2
(Ø 80 at 100 mm/s)

At 300 mm/s

Possible to drive cylinders

Up to **Ø 63***2
(Ø 125 at 100 mm/s)

At 300 mm/s

Possible to drive cylinders

Up to **Ø 80***2
(Ø 160 at 100 mm/s)

Power Saving

Power Consumption

0.1 w **0.35 w**

With power saving circuit

Standard

[Electrical power waveform with power saving circuit]

Power consumption is reduced by power saving circuit.

Power consumption is decreased by approx. 1/3 by reducing the wattage required to hold the valve in an energised state. (Effective energizing time is over 67 ms at 24 V DC.) Refer to the electrical power waveform as shown on the left.

Space Saving / Improved Operability

The value in () are for the quick response and high pressure types.

Wiring, piping and operation are integrated on one side.

Multiple layer type is available as an option. This saves space in the lateral direction. **From page 250**

Bottom ported is prepared. Space saving

Top or bottom ported reduces the footprint.

4-position dual 3-port valve available

(Only rubber seal type)

• **Two 3-port valves built into one body**

- 3-port valves on the A and B sides can operate independently.
- When used as a 3-port valve, only half the number of stations is required.
- Can also be used as a 4-position, 5-port valve.
- 4-position dual 3-port valve with back pressure check valve is available.
- Combination examples

Series	A side	B side
SY□A ₃ 0	N.C. valve	N.C. valve
SY□B ₃ 0	N.O. valve	N.O. valve
SY□C ₃ 0	N.C. valve	N.O. valve

Different sizes (SY3000/5000 or SY5000/7000) can be mixed! **From page 213**

Possible to reduce installation space, the number of serial units and wirings.

Manifold overall length
Approx. 29% reduction

5 Port Solenoid Valve

Improved functionality

Back Pressure Check Valve

This prevents actuator and air operated valve malfunctions caused by the exhaust from other valves.*1

Built-in valve type

*1: For back pressure check valve precautions, refer to the Specific Product Precautions on page 267.

Retrofit or pre-installed type

If the product is affected by back pressure after installation, the back pressure check valve assembly can be added.

Page 256

Back pressure check valve assembly

With residual pressure release valve (SY5000/7000)

Page 23

IP67 compliant

For residual pressure release of the 3-position closed centre valve

- The pressure of the 4 (A) and 2 (B) ports is also exhausted automatically at the same when the pressure of the 1 (P) port is exhausted.
- The pressure can be visualised using the indicator (red).
- Since this valve is not a spacer type, the flow rate is equivalent to that of the normal closed centre valve.

[When 1(P) port is pressurised]

[When 1(P) port is not pressurised]

Lever Type SUP Stop Valve Spacer (With residual pressure release valve)

Page 251

Lever type is added to manual override button!

Solenoid valves can be replaced individually without shutting off the main pressure!*

Easy to visually check

2 action

Push

STEP 1

STEP 2

Turn

Locked

Air for solenoid valves can be shut off individually!

The operation of an actuator can be checked by shutting off the air for the solenoid valves on the base individually, while the main air is being supplied during a trial operation.

Solenoid valves can be replaced individually!

The solenoid valves can be replaced individually without stopping the equipment during maintenance.

<Application example>
Air operated valves, such as sanitary valve and automatic valve control

*1: This product is only for internal pilot specifications, as the external pilot air cannot be shut off.

Improved functionality

Slotted Type

SUP Stop Valve Spacer (With residual pressure release valve) Page 251

Air supply to each valve can be stopped individually. The valve and cylinder can be replaced without stopping other devices and equipment.

Button for manual release of residual pressure

To exhaust residual pressure on cylinder side.

Slotted Type

Double Check Spacer (With residual pressure release valve) Page 251

Long time of intermediate stop and position holding are possible.

Button for manual release of residual pressure

To exhaust residual pressure on cylinder side.

With slide locking manual override

ON/OFF operation and locking can be performed with the manual slide.

With safety slide locking manual override SY3000/5000/7000-X13

Page 31

Double action manual override prevents incorrect operation!

SY7000-X13

SY5000-X13

SY3000-X13

● Double action operation

Before operation The slide manual overrides cannot be turned ON with the safety slide cover. (OFF status: Locked)

Operation 1 Operates the safety slide cover upward. (Unlocked)

<Vertical sliding>

Operation 2 The slide manual overrides can be operated.

<Horizontal sliding>

*: The safety slide cover cannot be locked when the slide manual override is turned ON.

● Visual check

Red lines in three directions can be checked whether the safety slide cover is unlocked (FREE).

Safety slide covers can be checked from their raised and lowered positions.

5 Port Solenoid Valve

Piping Options

To mount the piping on top

Refer to page 21 for part numbers of port block assembly for A, B post, page 247 for part numbers of port block assembly for P, E port and page 271 how to change piping types.

To mount the piping on the side

Mixed mounting of top ported and side ported is possible.

It is possible to detect the output of 4(A) and 2(B) port with a pressure switch by mounting the top ported valve onto the side ported or bottom ported manifold. (Pressure switch etc., needs to be ordered separately.)

Variation

New Only for External Pilot Vacuum Release Valve with Restrictor Series SY₅³A□R Page 25

Vacuum suction and release can be controlled with a single valve!

■ Can be mounted on the same manifold with the standard valve.

*: When the individual EXH spacer is used.

■ Mountable manifolds

Connector connecting base SS5Y₅³-10/11/12 type manifold

Metal base SS5Y₅³-50/52 type manifold

Series SY3000/5000/7000 Valve Specifications

Valve Specifications

Valve type		Rubber seal	Metal seal	
Fluid		Air		
Internal pilot operating pressure range [MPa]	2-position single	0.15 to 0.7	0.1 to 0.7 (High pressure type: 0.1 to 1)	
	2-position double	0.1 to 0.7		
	3-position	0.2 to 0.7		
	4-position dual 3-port valve	0.15 to 0.7	—	
External pilot operating pressure range [MPa]	Operating pressure range		-100 kPa to 0.7 (4-position: -100 kPa to 0.6) / -100 kPa to 0.7 (High pressure type: -100 kPa to 1)	
	Pilot pressure range	2-position single	0.1 to 0.7 (High pressure type: 0.1 to 1)	
		2-position double		
		3-position		
4-position dual 3-port valve		Operating pressure + 0.1 or more (Min. 0.25) to 0.7	—	
Ambient and fluid temperature [°C]		-10 to 50 (No freezing)		
Max. operating frequency [Hz]	SY3000 SY5000	2-position single/double	5	20*1
		4-position dual 3-port valve		
		3-position		
	SY7000	2-position single/double	5	10*1
		4-position dual 3-port valve	3	—
		3-position	3	10*1
Manual override		Non-locking push type		
		Push-turn locking slotted type		
		Push-turn locking lever type		
		Slide locking type		
Pilot exhaust type	Internal pilot	Main/Pilot valve common exhaust	Main/Pilot valve individual exhaust	
	External pilot	Pilot valve individual exhaust		
Lubrication		Not required		
Mounting orientation*2		Unrestricted	Single: Unrestricted Double/3-position: Main valve is horizontal.	
Impact/Vibration resistance*2 [m/s ²]		150/30		
Enclosure		IP67 (Based on IEC60529)*3		
Coil rated voltage [DC]		24, 12 V		
Allowable voltage fluctuation [V]		±10 % of rated voltage*4		
Power consumption [W]	Standard	0.35 (With indicator light: 0.4)		
	High pressure type, Quick response type	0.9 (With indicator light: 0.95)		
	With power saving circuit	Standard: 0.1*5 (With indicator light only) [Inrush 0.35, Holding 0.1], High pressure type: 0.4*5 (With indicator light only) [Inrush 0.9, Holding 0.4]		
Surge voltage suppressor		Diode (Varistor for non-polar type)		
Indicator light		LED		

*1: Use below 5 Hz for with the power saving circuit.

*2: Impact resistance: No malfunction occurred when it is tested in the axial direction and at the right angles to the main valve and armature in both energised and de-energised states every once for each condition. (Values at the initial period)

Vibration resistance: No malfunction occurred in a one-sweep test between 45 and 2000 Hz. Test was performed at both energised and de-energised states in the axial direction and at the right angles to the main valve and armature. (Values at the initial period)
Refer to page 271 for the fixation of DIN rail mounting type manifold.

*3: In the case of a metal seal, there are restrictions in the operating environment. Refer to the Specific Product Precautions (page 266).

*4: Due to voltage drops by the internal circuit in S/Z type and T type (with power saving circuit), use within the allowable voltage fluctuation as follows.

S/Z type $\begin{cases} 24 \text{ V DC: } -7 \% \text{ to } +10 \% \\ 12 \text{ V DC: } -4 \% \text{ to } +10 \% \end{cases}$ T type $\begin{cases} 24 \text{ V DC: } -8 \% \text{ to } +10 \% \\ 12 \text{ V DC: } -6 \% \text{ to } +10 \% \end{cases}$

*5: For details, refer to page 268.

Refer to pages 271 and 272 for how to replace the port block assembly, One-touch fitting and body cover assembly.

Body Cover Assembly

*: Used when the top ported is changed to the side or bottom ported.

Series	Part no.	Part no.	
		Standard (Valve mounting screw "not" falling-out-prevention type)	Valve mounting screw falling-out-prevention type
SY3000	Internal pilot	SY30V-16A	SY30V-16A-1
	External pilot	SY30V-16AR	SY30V-16AR-1
SY5000	Internal pilot	SY50V-16A	SY50V-16A-1
	External pilot	SY50V-16AR	SY50V-16AR-1
SY7000	Internal pilot	SY70V-16A	SY70V-16A-1
	External pilot	SY70V-16AR	SY70V-16AR-1

*: The part number is not indicated on the product.

How to Order Pilot Valve Assembly (With a gasket and two mounting screws)

V112 - A

Pilot valve option

—	Standard (0.7 MPa)
B	Quick response type (0.7 MPa)
K	High pressure type (1.0 MPa)*1

*1: Only metal seal type is available for the high pressure type. (1.0 MPa)

Coil type

—	Standard
T	With power saving circuit

Rated voltage

5	24 V DC
6	12 V DC

Caution

1. The coil specification and voltage (including light/surge voltage suppressor) cannot be changed by changing the pilot valve assembly.
2. When selecting the coil type with power saving circuit, it is not possible to change to high pressure/power saving circuit type.

How to replace pilot valves

Pilot cover assembly

Series	Part no.
SY3000	SY30V-25A
SY5000	SY50V-25A
SY7000	

*: Pilot cover x 1 + B tight flat head screw x 1

B tight flat head screw (M1.7)
Tightening torque: 0.12 N·m

- Loosen B tight flat head screw to remove the pilot cover in the direction indicated by the arrow ①.
- Remove the pilot valve mounting screws.
- Remove the pilot valve in the direction indicated by the arrow ②.

*: Assemble by following the removal procedure in reverse.

*: Ensure the gasket is mounted, and take care not to bend the socket.

*: Be noted for mounting that there are two types of lengths for the pilot valve mounting screws.

Series SY5000/7000

With Residual Pressure Release Valve

Mountable manifold
SS5Y5/7-50/51 type manifold
SS5Y5/7-(M)10/11 type manifold
 Sub-plate single unit (Except top ported type)

How to Order (With mounting screw)

SY 5 3 0 0 0 0 - 5 U D 1 - E

Series	5	SY5000
	7	SY7000

Type of actuation	3	3-position closed χ EV type*1
-------------------	---	------------------------------------

*1: Only closed centre type is available.

Base mounted
 (Top ported is not available.)

With residual pressure release valve

E	With residual pressure release valve*1
---	----------------------------------------

*1: Mounting screw types, hexagon socket head cap screw B and screw falling-out-prevention type K, H are not available.

1 Seal type

0	Rubber seal
1	Metal seal

2 Pilot valve option

—	Standard (0.7 MPa)
B	Quick response type (0.7 MPa)
K*1	High pressure type (1.0 MPa)

*1: Only metal seal type is available for the high pressure type.

3 Coil type

—	Standard
T	With power saving circuit (Continuous duty type)

*: Be sure to select the power saving circuit type when the valve is continuously energised for long periods of time.

*: Be careful of the energising time when the power saving circuit is selected. Refer to page 268 for details.

4 Rated voltage

5	24 V DC
6	12 V DC

*: The applicable rated voltage varies depending on the manifold wiring type. Refer to the "How to Order Manifold" pages.

5 Light/surge voltage suppressor and common specification

Symbol	With light	Surge voltage suppressor	Common specification
—	—	—	Non-polar
R	—	●	
U	●		
S	—		Positive common
Z	●		
NS	—	Negative common	
NZ	●		

*: Only "Z" and "NZ" types are available for with the power saving circuit.

6 Manual override

*: Refer to page 31 for with the safety slide locking manual override.

*: **When ordering a valve individually, the base gasket is not included.** Since the base gasket is attached to the manifold, please order the base gasket separately if it is needed for maintenance service. Refer to page 89 or 244 for part numbers of the base gasket and mounting screw.

Valve Specifications

Valve construction	Rubber seal	Metal seal
	3-position closed centre valve with residual pressure release valve*1	
Fluid	Air	
Operating pressure range MPa*2	0.3 to 0.7	0.3 to 0.7 (High pressure: 0.3 to 1)
Weight [g]	SY5000	117
	SY7000	156
		128
		177

*1: Rubber seal is used for the residual pressure release valve.

*2: Internal pilot type only

*: Other specifications are common to the valve specifications on page 13.

Symbol

<When 1(P) port is exhausted>

<When 1(P) port is pressurised>

A mechanism is used that exhausts the pressure of the cylinder port when the P port supply pressure of the 3 position closed centre valve is exhausted.

Dimensions

SY5000

SY7000

*1: The indicator shows the pressurisation status. Do not push it.

NZ	●	—	

*: Only "Z" and "NZ" types are available for the product with power saving circuit.

6 Manual override

*: Refer to page 31 for with the safety slide locking manual override.

How to Order Manifold Assembly

Example (SS5Y3-10F1-□□R)

3-position 3-port valve with restrictor (24 V DC)
SY3A0R-5U1

Manifold base (5 stations)
SS5Y3-10F1-05DR-C6

SS5Y3-10F1-05DR-C6...1 set (Type 10 5-station manifold base part no.)
*SY3A0R-5U1 (3-position 3-port with restrictor part no.)...5 sets

*The asterisk denotes the symbol for assembly.
*Prefix it to the part numbers of the valve etc.

- The valve arrangement is numbered as the 1st station from the D side.
- Under the manifold part number, state the valves to be mounted in order from the 1st station as shown in the figure above. If the arrangement becomes complicated, specify on a manifold specification sheet.

7 B port size

One-touch fitting (Metric size)

Symbol	B port	SY3000	SY5000
C4	Ø 4 One-touch fitting	●	●
C6	Ø 6 One-touch fitting	●	●
C8	Ø 8 One-touch fitting	—	●

One-touch fitting (Inch size)

Symbol	B port	SY3000	SY5000
N3	Ø 5/32" One-touch fitting	●	●
N7	Ø 1/4" One-touch fitting	●	●
N9	Ø 5/16" One-touch fitting	—	●

*: When selecting the port size for each station, specify on a manifold specification sheet separately.

*: When mounting on the manifold base or sub-plate, the A port is plugged. When a manifold base or sub-plate is ordered separately, mount a plug on the A port.

8 Type of mounting screw

—	Round head combination screw
B	Hexagon socket head cap screw

*: **When ordering a valve individually, the base gasket is not included.** Since the base gasket is attached to the manifold, please order the base gasket separately if it is needed for maintenance service.

*: "B" and "H" cannot be selected for the individual SUP/EXH spacer assembly or interface regulator.

Valve Specifications

Valve construction		3-position 3-port valve with restrictor
Seal		Rubber seal
Fluid		Air
Type of actuation		Normally closed
Operating pressure range [MPa]	Release pressure port 1(P)	0 to 0.6
	Vacuum pressure port 3(EB), 3/5(E)	-100 kPa to 0.7*1
	Pilot X port	Release pressure + 0.1 or more (Min. 0.25) to 0.7
Restrictor operation		Manual

*1: Can be used with positive pressure to suit the application.

*: Other specifications are common to the valve specifications on page 13.

*: Quick response type is not available.

Made to Order

Please contact SMC for detailed dimensions, specifications and lead times.

1 Main Valve Fluororubber Specification

Symbol

-X90

Fluororubber is used for rubber parts of the main valve to allow use in applications such as the following.

- When using a lubricant other than the recommended turbine oil, and there is a possibility of malfunction due to swelling of the spool valve seals.

Applicable valves series SY3□⁰/₃0, SY5□⁰/₃0, SY7□⁰/₃0 (Only rubber seal type)

SY ³/₅ □ ⁰/₃ 0 □ □ □ □ - □ □ □ 1 - □ □ - □ -X90

- Entry is the same as standard products.
Specifications and performance are the same as standard products.

2 With Safety Slide Locking Manual Override

Symbol

-X13

A safety lock is added to the slide locking manual override.
(Refer to page 4.)

SY ³/₅ □ 00 □ □ □ □ - □ □ G1 - □ -X13

- Entry is the same as standard products.
Specifications and performance are the same as standard products.

3 Metal Seal Valve, Main/Pilot Valve Common Exhaust

Symbol

-X16

This is the type where the exhaust method of the pilot valve is integrated into the exhaust port of the main valve.

SY ³/₅ □ ⁰/₃ 1 □ □ □ □ - □ □ □ 1 - □ □ -X16

- Entry is the same as standard products.
*: Note that the response time of the valve becomes slower than standard products.
Please contact SMC for details.

* Calculation of effective area S and sonic conductance C: $S = 5.0 \times C$

*1: The value is for individually operated 2-position type.

*2: The values have been calculated according to ISO 6358 and indicate the flow rate under standard conditions with an inlet pressure of 0.6 MPa (relative pressure) and a pressure drop of 0.1 MPa.

How to Order

In the case of **Valve** + **Sub-plate** (Built-in valve type part no.)

1 Series

3	SY3000
5	SY5000
7	SY7000

2 Type of actuation

1	2-position	Single
2		Double
3	3-position	Closed centre
4		Exhaust centre
5	4-position dual 3-port	Pressure centre
A*1		N.C./N.C.
B*1		N.O./N.O.
C*1		N.C./N.O.

*1: Only rubber seal type is available for the 4-position dual 3-port valve.

3 Valve piping type

0	Base mounted (Port location: Side, Bottom)
3	Top ported (4A, 2B port location: Top)

4 Seal type

0	Rubber seal
1	Metal seal

5 Pilot type

—	Internal pilot
R	External pilot

6 Back pressure check valve (Built-in valve type)

—	None
H	Built-in

*: Only rubber seal type
*: The built-in valve type back pressure check valve is not available for the 3-position type and the SY7000.

7 Pilot valve option

—	Standard (0.7 MPa)
B	Quick response type (0.7 MPa)
K*1	High pressure type (1.0 MPa)

*1: Only metal seal type is available for the high pressure type.

8 Coil type

—	Standard
T	With power saving circuit (Continuous duty type)

*: Be sure to select the power saving circuit type when the valve is continuously energised for long periods of time.
*: Be careful of the energising time when the power saving circuit is selected. Refer to page 268 for details.

9 Rated voltage

5	24 V DC
6	12 V DC

10 Light/surge voltage suppressor and common specification

Symbol	With light	Surge voltage suppressor	Common specification	
—	—	—	Non-polar	
R	—	●		Positive common
U	●			
S	—			
Z	●			
NS	—			
NZ	●			

*: Only "Z" and "NZ" types are available for with the power saving circuit.

11 Manual override

*: Refer to page 31 for with the safety slide locking manual override.

12 A, B port size (*: Top ported valve only)

Symbol	Port size	Applicable series
M5	M5 x 0.8	SY3000
01	1/8	SY5000
02	1/4	SY7000

Metric size (One-touch fitting)

Symbol	A, B port	SY3000	SY5000	SY7000
C2	∅ 2	●	—	—
C3	∅ 3.2	●	—	—
C4	∅ 4	●	●	—
C6	∅ 6	●	●	●
C8	∅ 8	—	●	●
C10	∅ 10	—	—	●
C12	∅ 12	—	—	●

Inch size (One-touch fitting)

Symbol	A, B port	SY3000	SY5000	SY7000
N1	∅ 1/8"	●	—	—
N3	∅ 5/32"	●	●	—
N7	∅ 1/4"	●	●	●
N9	∅ 5/16"	—	●	●
N11	∅ 3/8"	—	—	●

13 A, B port thread type (Top ported valve only)

—	Rc
F	G
N	NPT
T	NPTF

*: Only — is available for M5.

14 Type of mounting screw

—	Round head combination screw
B	Hexagon socket head cap screw
K	Round head combination screw (Falling-out-prevention type)
H	Hexagon socket head cap screw (Falling-out-prevention type)

*: For "K" and "H", the valve body cover has a drop prevention construction to stop the mounting screws from falling out when the valve is removed for maintenance etc.
*: Refer to page 35 when the base gaskets and mounting screws are required for maintenance.
*: When using an optional spacer assembly, "B" and "H" cannot be selected.

15 Wiring specifications

WO	Without M12 connector cable
W1	With M12 connector cable (300 mm)
W2	With M12 connector cable (500 mm)
W3	With M12 connector cable (1000 mm)
W4	With M12 connector cable (2000 mm)
W7	With M12 connector cable (5000 mm)

*: When ordering a product with M12 connector cable, the connector cable is included.

16 Port location (Sub-plate)

—	Side ported
B	Bottom ported
V*1	Top ported (1P, 5EA, 3EB port: Side ported)

*1: Only available for the valve piping type "3" top ported.

17 Port size (Sub-plate)

Symbol	Port size	Applicable series
01	1/8	SY3000
02	1/4	SY5000
03	3/8	SY7000

18 Sub-plate thread type

—	Rc
F	G
N	NPT
T	NPTF

*: When mounting a special order (including Made-to-Order specification) valve or manifold option (spacer etc.) on the sub-plate, add the valve part number or spacer part number under the sub-plate part number to place an order. For details, refer to the ordering example on page 35.

Series SY3000/5000/7000

How to Order

In the case of **(Sub-plate)** (Sub-plate single unit part no.)

※: Without valve

※: Base gasket is included.
※: Valve mounting screws are not included.

1 Series

3	SY3000
5	SY5000
7	SY7000

2 Wiring specifications

W0	Without M12 connector cable
W1	With M12 connector cable (300 mm)
W2	With M12 connector cable (500 mm)
W3	With M12 connector cable (1000 mm)
W4	With M12 connector cable (2000 mm)
W7	With M12 connector cable (5000 mm)

※: Refer to the table below for connector cable part numbers.

※: When ordering a product with M12 connector cable, the connector cable is included.

3 Port location (Sub-plate)

—	Side ported
B	Bottom ported
V	Top ported [1(P), 5(EA), 3(EB) port: Side ported]

4 Port size

Symbol	Port size	Applicable series
01	1/8	SY3000
02	1/4	SY5000
03	3/8	SY7000

5 Sub-plate thread type

—	Rc
F	G
N	NPT
T	NPTF

How to Order when mounting a special order (including Made-to-Order specification) valve on the sub-plate (Ordering example: X90)

SY30M-27-1-W1-01..... 1 set (Sub-plate single unit part no.)

*SY3200-5U1-X90..... 1 set (2-position double part no./Main valve fluororubber specification)

Ordering example when mounting a manifold option (spacer etc.)

SY30M-27-1-W1-01..... 1 set (Sub-plate single unit part no.)

*SY3400-5U1 1 set (3-position exhaust centre part no.)

*SY30M-60-1A 1 set (Part no. for double check spacer with residual pressure release valve)

Sub-plate Parts No.

No.	Description	Part no.			Note	
		SY3000	SY5000	SY7000		
①	Valve mounting screw	Round head combination screw	SY3000-23-24A (M2 x 32)	SY5000-221-1A (M3 x 32.5)	SY7000-221-1A (M3 x 36.5)	Part numbers shown on the left are for 10 valves (20 pcs.). (30 pcs. for the SY7000)
		Hexagon socket head cap screw	SY3000-222-1A (M2 x 32)	SY5000-222-1A (M3 x 32.5)	SY7000-222-1A (M3 x 36.5)	
②	Base gasket (for sub-plate)	SY30M-11-1A	SY50M-11-1A	SY70M-11-1A	Part numbers shown on the left are for 10 valves (10 pcs.).	
③	M12 waterproof connector cable		ZS-37-L		Cable length: 300 mm Cable weight: Approx. 18 g	
			ZS-37-M		Cable length: 500 mm Cable weight: Approx. 23 g	
			ZS-37-N		Cable length: 1000 mm Cable weight: Approx. 36 g	
			ZS-37-P		Cable length: 2000 mm Cable weight: Approx. 62 g	
			ZS-37-C		Cable length: 5000 mm Cable weight: Approx. 140 g

* Calculation of effective area S and sonic conductance C: $S = 5.0 \times C$

* 1) The value is for manifold base with 5 stations and individually operated 2-position type.

* 2) 'Weight: W' is the value for the D-sub connector manifold.

To obtain the weight with valves attached, add the valve weights given on page 15 for the appropriate number of stations.

* 3) These values have been calculated according to ISO6358 and indicate the flow rate under standard conditions with an inlet pressure of 0.6 MPa (relative pressure) and a pressure drop of 0.1 MPa.

Type 50
Side Ported

Type 51
Bottom Ported

Plug-in Metal Base

D-sub Connector

Flat Ribbon Cable

PC Wiring

Series SY3000/5000/7000

How to Order Manifold

1 Series

3	SY3000
5	SY5000
7	SY7000

2 Type

50	Side ported
51	Bottom ported
50R	Side ported, External pilot

*: External pilot is not available for the bottom ported type.

3 Connector type

F: D-sub connector (25 pins) 	P: Flat ribbon cable (26 pins) 	PG: Flat ribbon cable (20 pins) 
PH: Flat ribbon cable (10 pins) 	J: PC wiring (20 pins) 	

4 Connector entry direction

1: Upward 	2: Lateral 
--------------------------------------------------------------------------------------------------------	---------------------------------------------------------------------------------------------------------

5 Wiring type

—	All double wiring*1
S	All single wiring*2

*1: All double wiring: 2-position single, double, 3-position and 4-position valves can be used on all manifold stations.

*2: All single wiring: Available only for the manifold which has 2-position single for all stations.

Note that 2-position double, 3- or 4-position valves cannot be used.

*: If a mix of single and double wiring is required, it is supplied as a special order.

How to Order Manifold Assembly

Example (SS5Y3-50F2-□)

SS5Y3-50F2-05D-C6... 1 set (Type 50 5-station manifold base part no.)
 *SY3100-5U1..... 3 sets (2-position single part no.)
 *SY3200-5U1..... 1 set (2-position double part no.)
 *SY3300-5U1..... 1 set (3-position closed centre part no.)

→ The asterisk denotes the symbol for assembly. Prefix it to the part numbers of the valve etc.

- The valve arrangement is numbered as the 1st station from the D side.
- Under the manifold part number, state the valves to be mounted in order from the 1st station as shown in the figure above. If the arrangement becomes complicated, specify on a manifold specification sheet.

*: When mixing top ported configurations, select from page 66.

In this case, use caution as there is also output on the A and B port on base side. Specify on a manifold specification sheet if plugs are required on the A and B port on base side.

6 Valve stations

*: This also includes the number of blanking plate assembly.

7 P, E port entry

U	U side*1
D	D side*1*2
B	Both sides

- *1: Plugs are mounted on the opposite side of the selected ports.
- *2: Only D side is available for Type 51 (Bottom ported).

9 Thread type

—	Rc
F	G
N	NPT
T	NPTF

10 Mounting

—	Direct mounting	
D	DIN rail mounting (With DIN rail)	
D0	DIN rail mounting (Without DIN rail)	
D3	For 3 stations	Specify a longer rail than the standard length.
⋮	⋮	
D12	For 12 stations	

- *: Only direct mounting is available for Type 51 (Bottom ported).
- *: Refer to page 271 for the fixation of DIN rail mounting type manifold.

Series SY3000/5000/7000

How to Order Valves (With mounting screw)

Refer to page 13 for valve specifications.

● Base mounted

1 Series

3	SY3000
5	SY5000
7	SY7000

2 Type of actuation

1	2-position	Single
2		Double
3	3-position	Closed centre
4		Exhaust centre
5		Pressure centre
A*1	4-position dual 3-port	N.C./N.C.
B*1		N.O./N.O.
C*1		N.C./N.O.

*1: Only rubber seal type is available for the 4-position dual 3-port valve.

3 Seal type

0	Rubber seal
1	Metal seal

4 Pilot type

—	Internal pilot
R	External pilot

5 Back pressure check valve (Built-in valve type)

—	None
H	Built-in

*: Only rubber seal type

*: Back pressure check valve is not available for the 3-position type and the SY7000.

6 Pilot valve option

—	Standard (0.7 MPa)
B	Quick response type (0.7 MPa)
K*1	High pressure type (1.0 MPa)

*1: Only metal seal type is available for the high pressure type.

7 Coil type

—	Standard
T	With power saving circuit (Continuous duty type)

*: Be sure to select the power saving circuit type when the valve is continuously energised for long periods of time.

*: Be careful of the energising time when the power saving circuit is selected. Refer to page 268 for details.

8 Rated voltage

5	24 V DC
6	12 V DC

9 Light/surge voltage suppressor and common specification

Symbol	With light	Surge voltage suppressor	Common specification
—	—	—	Non-polar
R	—	●	
U	●		
S	—		
Z	●		Positive common
NS	—	Negative common	
NZ	●		

*: Only "Z" and "NZ" types are available for with the power saving circuit.

10 Manual override

*: Refer to page 31 for with the safety slide locking manual override.

11 Type of mounting screw

—	Round head combination screw
B	Hexagon socket head cap screw
K	Round head combination screw (Falling-out-prevention type)
H	Hexagon socket head cap screw (Falling-out-prevention type)

*: For "K" and "H", the valve body cover has a drop prevention construction to stop the mounting screws from falling out when the valve is removed for maintenance etc.

*: **When ordering a valve individually, the base gasket is not included.**

Since the base gasket is attached to the manifold, please order the base gasket separately if it is needed for maintenance service.

Refer to page 89 for part numbers of the base gasket and mounting screw.

*: "B" and "H" cannot be selected for the individual SUP/EXH spacer assembly, interface regulator or double check spacer assembly with residual pressure release valve.

Series SY3000/5000/7000

How to Order Manifold

1 Series

3	SY3000
5	SY5000
7	SY7000

2 Type

52	Top ported
52R	Top ported, External pilot

3 Connector type

F: D-sub connector (25 pins) 	P: Flat ribbon cable (26 pins) 	PG: Flat ribbon cable (20 pins)
PH: Flat ribbon cable (10 pins) 	J: PC wiring (20 pins) 	

4 Connector entry direction

1: Upward 	2: Lateral
---------------	----------------

5 Wiring type

—	All double wiring*1
S	All single wiring*2

- *1: All double wiring: 2-position single, double, 3-position and 4-position valves can be used on all manifold stations.
- *2: All single wiring: Available only for the manifold which has 2-position single for all stations.
Note that 2-position double, 3- or 4-position valves cannot be used.
- *: If a mix of single and double wiring is required, it is supplied as a special order.

How to Order Manifold Assembly

Example (SS5Y3-52F2-□)

2-position single (24 V DC)
SY3130-5U1-C6 (3 sets)

2-position double (24 V DC)
SY3230-5U1-C6 (1 set)

3-position closed centre (24 V DC)
SY3330-5U1-C6 (1 set)

Manifold base (5 stations)
SS5Y3-52F2-05D

1 2 3 Stations U side
D side

SS5Y3-52F2-05D..... 1 set (Type 52 5-station manifold base part no.)
 *SY3130-5U1-C6..... 3 sets (2-position single part no.)
 *SY3230-5U1-C6..... 1 set (2-position double part no.)
 *SY3330-5U1-C6..... 1 set (3-position closed centre part no.)

The asterisk denotes the symbol for assembly.
Prefix it to the part numbers of the valve etc.

- The valve arrangement is numbered as the 1st station from the D side.
- Under the manifold part number, state the valves to be mounted in order from the 1st station as shown in the figure above. If the arrangement becomes complicated, specify on a manifold specification sheet.

*: This also includes the number of blanking plate assembly.

7 P, E port entry

U	U side*1
D	D side*1
B	Both sides

*1: Plugs are mounted on the opposite side of the selected ports.

8 Thread type

—	Rc
00F	G
00N	NPT
00T	NPTF

9 Mounting

—	Direct mounting
D	DIN rail mounting (With DIN rail)
D0	DIN rail mounting (Without DIN rail)
D3	For 3 stations
⋮	⋮
D12	For 12 stations

Specify a longer rail than the standard length.

*: Refer to page 271 for the fixation of DIN rail mounting type manifold.

How to Order Valves (With mounting screw) Refer to page 13 for valve specifications.

1 Series

3	SY3000
5	SY5000
7	SY7000

2 Type of actuation

1	2-position	Single
2		Double
3	3-position	Closed centre
4		Exhaust centre
5		Pressure centre
A*1	4-position dual	N.C./N.C.
B*1		N.O./N.O.
C*1	3-port	N.C./N.O.

*1: Only rubber seal type is available for the 4-position dual 3-port valve.

3 Seal type

0	Rubber seal
1	Metal seal

4 Pilot type

—	Internal pilot
R	External pilot

5 Back pressure check valve (Built-in valve type)

—	None
H	Built-in

*: Only rubber seal type
*: Back pressure check valve is not available for the 3-position type and the SY7000.

6 Pilot valve option

—	Standard (0.7 MPa)
B	Quick response type (0.7 MPa)
K*1	High pressure type (1.0 MPa)

*1: Only metal seal type is available for the high pressure type.

7 Coil type

—	Standard
T	With power saving circuit (Continuous duty type)

*: Be sure to select the power saving circuit type when a valve is continuously energised for long periods of time.
*: Be careful of the energising time when the power saving circuit is selected. Refer to page 268 for details.

8 Rated voltage

5	24 V DC
6	12 V DC

9 Light/surge voltage suppressor and common specification

Symbol	With light	Surge voltage suppressor	Common specification
—	—	—	Non-polar
R	—	●	
U	●		
S	—		
Z	●		
NS	—	Negative common	
NZ	●		

*: Only "Z" and "NZ" types are available for with the power saving circuit.

10 Manual override

*: Refer to page 31 for with the safety slide locking manual override.

11 A, B port size

Thread piping

Symbol	Port size	Applicable series
M5	M5 x 0.8	SY3000
O1	1/8	SY5000
O2	1/4	SY7000

One-touch fitting (Metric)

Symbol	A, B port	SY3000	SY5000	SY7000

N11	Ø 3/8"	—	—	●

12 Thread type

—	Rc
F	G
N	NPT
T	NPTF

*: Only — is available for M5.

13 Type of mounting screw

—	Round head combination screw
B	Hexagon socket head cap screw
K	Round head combination screw (Falling-out-prevention type)
H	Hexagon socket head cap screw (Falling-out-prevention type)

*: For "K" and "H", the valve body cover has a drop prevention construction to stop the mounting screws from falling out when the valve is removed for maintenance etc.

*: **When ordering a valve individually, the base gasket is not included.**

Since the base gasket is attached to the manifold, please order the base gasket separately if it is needed for maintenance service.

Refer to page 89 for part numbers of the base gasket and mounting screw.

*: "B" and "H" cannot be selected for the individual SUP/EXH spacer assembly or interface regulator.

4 Wiring type

—	All double wiring*1
S	All single wiring*2

*1: All double wiring: 2-position single, double, 3-position and 4-position valves can be used on all manifold stations.

*2: All single wiring: Available only for the manifold which has 2-position single for all stations.

Note that 2-position double, 3- or 4-position valves cannot be used.

*: If a mix of single and double wiring is required, it is supplied as a special order.

5 Valve stations

Symbol	Stations	Note	Symbol	Stations	Note
02	2 stations	All double wiring	02	2 stations	All single wiring
⋮	⋮		⋮	⋮	
08	8 stations		12	12 stations	

*: This also includes the number of blanking plate assembly.

6 P, E port entry

U	U side*1
D	D side*1*2
B	Both sides

*1: Plugs are mounted on the opposite side of the selected ports.

*2: Only D side is available for Type 51 (Bottom ported).

How to Order Manifold Assembly

Example (SS5Y3-50S5-□)

Manifold base
(5 stations)
SS5Y3-50S5-05D-C6

SS5Y3-50S5-05D-C6 ... 1 set (Type 50 5-station manifold base part no.)
 *SY3100-5U1 3 sets (2-position single part no.)
 *SY3200-5U1 1 set (2-position double part no.)
 *SY3300-5U1 1 set (3-position closed centre part no.)

→ The asterisk denotes the symbol for assembly.
Prefix it to the part numbers of the valve etc.

- The valve arrangement is numbered as the 1st station from the D side.
- Under the manifold part number, state the valves to be mounted in order from the 1st station as shown in the figure above. If the arrangement becomes complicated, specify on a manifold specification sheet.

*: When mixing top ported configurations, select from page 84.

In this case, use caution as there is also output on the A and B port on base side. Specify on a manifold specification sheet if plugs are required on the A and B port on base side.

8 Thread type

—	Rc
F	G
N	NPT
T	NPTF

9 Mounting

—	Direct mounting
D	DIN rail mounting (With DIN rail)
D0	DIN rail mounting (Without DIN rail)
D3	For 3 stations
⋮	⋮
D12	For 12 stations

Specify a longer rail than the standard length.

*: Only direct mounting is available for Type 51 (Bottom ported).
*: Refer to page 271 for the fixation of DIN rail mounting type manifold.

For details about the EX510 Gateway-type Serial Transmission System, refer to the WEB catalogue on SMC website www.smc.eu and the Operation Manual. Please download the Operation Manual via SMC website, <http://www.smc.eu>

How to Order Valves (With mounting screw)

Refer to page 13 for valve specifications.

1 Series

3	SY3000
5	SY5000
7	SY7000

2 Type of actuation

1	2-position	Single
2		Double
3	3-position	Closed centre
4		Exhaust centre
5		Pressure centre
A*1	4-position dual 3-port	N.C./N.C.
B*1		N.O./N.O.
C*1		N.C./N.O.

*1: Only rubber seal type is available for the 4-position dual 3-port valve.

3 Seal type

0	Rubber seal
1	Metal seal

4 Pilot type

—	Internal pilot
R	External pilot

5 Back pressure check valve (Built-in valve type)

—	None
H	Built-in

*: Only rubber seal type
*: Back pressure check valve is not available for the 3-position type and the SY7000.

6 Pilot valve option

—	Standard (0.7 MPa)
B	Quick response type (0.7 MPa)
K*1	High pressure type (1.0 MPa)

*1: Only metal seal type is available for the high pressure type.

7 Coil type

—	Standard
T	With power saving circuit (Continuous duty type)

*: Be sure to select the power saving circuit type when the valve is continuously energised for long periods of time.
*: Be careful of the energising time when the power saving circuit is selected. Refer to page 268 for details.

8 Rated voltage

5	24 V DC
---	---------

9 Light/surge voltage suppressor and common specification

Symbol	With light	Surge voltage suppressor	Common specification
R	—	●	Non-polar
U	●		
S	—		Positive common
Z	●		
NS	—		
NZ	●		

*: Only "Z" and "NZ" types are available for with the power saving circuit. Select a valve from R, U, S or Z when the SI Unit output polarity is — (positive common).
Select a valve from R, U, NS or NZ when the SI Unit output polarity is N (negative common).

10 Manual override

*: Refer to page 31 for with the safety slide locking manual override.

11 Type of mounting screw

—	Round head combination screw
B	Hexagon socket head cap screw
K	Round head combination screw (Falling-out-prevention type)
H	Hexagon socket head cap screw (Falling-out-prevention type)

*: For "K" and "H", the valve body cover has a drop prevention construction to stop the mounting screws from falling out when the valve is removed for maintenance etc.
*: **When ordering a valve individually, the base gasket is not included.** Since the base gasket is attached to the manifold, please order the base gasket separately if it is needed for maintenance service. Refer to page 89 for part numbers of the base gasket and mounting screw.
*: "B" and "H" cannot be selected for the individual SUP/EXH spacer assembly, interface regulator or double check spacer assembly with residual pressure release valve.

Manifold Options

Plug-in Metal Base EX510

Type 52
Top Ported

Series SY3000/5000/7000

How to Order Manifold

1 Series

3	SY3000
5	SY5000
7	SY7000

2 Type

52	Top ported
52R	Top ported, External pilot

3 SI Unit output polarity

—	Positive common
N	Negative common

4 Wiring type

—	All double wiring*1
S	All single wiring*2

- *1: All double wiring: 2-position single, double, 3-position and 4-position valves can be used on all manifold stations.
- *2: All single wiring: Available only for the manifold which has 2-position single for all stations. Note that 2-position double, 3- or 4-position valves cannot be used.
- *: If a mix of single and double wiring is required, it is supplied as a special order.

5 Valve stations

Symbol	Stations	Note
02	2 stations	All double wiring
:	:	
08	8 stations	All single wiring
02	2 stations	
:	:	
12	12 stations	

*: This also includes the number of blanking plate assembly.

6 P, E port entry

U	U side*1
D	D side*1
B	Both sides

*1: Plugs are mounted on the opposite side of the selected ports.

How to Order Manifold Assembly

Example (SS5Y3-52S5-□)

SS5Y3-52S5-05D 1 set (Type 52 5-station manifold base part no.)
 *SY3130-5U1-C6 3 sets (2-position single part no.)
 *SY3230-5U1-C6 1 set (2-position double part no.)
 *SY3330-5U1-C6 1 set (3-position closed centre part no.)

→ The asterisk denotes the symbol for assembly. Prefix it to the part numbers of the valve etc.

- The valve arrangement is numbered as the 1st station from the D side.
- Under the manifold part number, state the valves to be mounted in order from the 1st station as shown in the figure above. If the arrangement becomes complicated, specify on a manifold specification sheet.

7 Thread type

—	Rc
00F	G
00N	NPT
00T	NPTF

8 Mounting

—	Direct mounting
D	DIN rail mounting (With DIN rail)
D0	DIN rail mounting (Without DIN rail)
D3	For 3 stations
:	:
D12	For 12 stations

Specify a longer rail than the standard length.

*: Refer to page 271 for the fixation of DIN rail mounting type manifold.

For details on the EX510 Gateway-type Serial Transmission System, refer to the web catalogue on SMC website www.smc.eu and the Operation Manual. Please download the Operation Manual via SMC website, <http://www.smc.eu>

How to Order Valves (With mounting screw) Refer to page 13 for valve specifications.

1 Series

3	SY3000
5	SY5000
7	SY7000

2 Type of actuation

1	Single
2	2-position Double
3	3-position Closed centre
4	3-position Exhaust centre
5	3-position Pressure centre
A*1	4-position dual N.C./N.C.
B*1	4-position dual N.O./N.O.
C*1	3-port N.C./N.O.

*1: Only rubber seal type is available for the 4-position dual 3-port valve.

3 Seal type

0	Rubber seal
1	Metal seal

4 Pilot type

—	Internal pilot
R	External pilot

5 Back pressure check valve (Built-in valve type)

—	None
H	Built-in

*: Only rubber seal type
 *: Back pressure check valve is not available for the 3-position type and the SY7000.

6 Pilot valve option

—	Standard (0.7 MPa)
B	Quick response type (0.7 MPa)
K*1	High pressure type (1.0 MPa)

*1: Only metal seal type is available for the high pressure type.

7 Coil type

—	Standard
T	With power saving circuit (Continuous duty type)

*: Be sure to select the power saving circuit type when the valve is continuously energised for long periods of time.
 *: Be careful of the energising time when the power saving circuit is selected. Refer to page 268 for details.

8 Rated voltage

5	24 V DC
---	---------

9 Light/surge voltage suppressor and common specification

Symbol	With light	Surge voltage suppressor	Common specification
R	—	●	Non-polar
U	●		
S	—		Positive common
Z	●		
NS	—		
NZ	●		

*: Only "Z" and "NZ" types are available for with the power saving circuit. Select a valve from R, U, S or Z when the SI Unit polarity is — (positive common). Select a valve from R, U, NS or NZ when the SI Unit output polarity is N (negative common).

10 Manual override

*: Refer to page 31 for with the safety slide locking manual override.

11 A, B port size

Thread piping

Symbol	Port size	Applicable series
M5	M5 x 0.8	SY3000
O1	1/8	SY5000

Manifold Parts No.

Blanking plate assembly (With mounting screw)

Used when expecting valve additions, or for maintenance.

A structure to prevent screws falling out is in place on the blanking plate, making it much harder for the mounting screws to fall out.

* Calculation of effective area S and sonic conductance C: $S = 5.0 \times C$

*1: The value is for manifold base with 5 stations and individually operated 2-position type.

*2: Weight: W is the value of the internal pilot, and D-sub connector manifold with One-touch fitting straight piping type.

To obtain the weight with valves attached, add the valve weights given on page 15 for the appropriate number of stations

*3: These values have been calculated according to ISO6358 and indicate the flow rate under standard conditions with an inlet pressure of 0.6 MPa (relative pressure) and a pressure drop of 0.1 MPa.

Series SY3000/5000/7000

Connector Wiring Layout

For both serial and parallel wiring, additional valves are sequentially assigned pins on the connector. This makes it completely unnecessary to disassemble the connector unit.

■ Single solenoid valve is installed to all double wiring. (in the case of all double wiring) (Manifold specification sheet is not necessary.)

■ Single/double wiring are mixed. (Manifold specification sheet is necessary.)

*: These diagrams are for the purpose of explanation, and differ from the connector wiring used for testing.

Series SY3000/5000/7000

How to Order Manifold

Refer to pages 208 (SY5000) and 209 (SY7000) for dimensions of Type 11/Bottom ported type.

1 Series

3	SY3000
5	SY5000
7	SY7000

2 Type

10	Side ported
11	Bottom ported*1

*1: The SY5000 manifold base is used for the bottom ported of the SY3000. When ordering, refer to "Plug-in Mixed Mounting Type Manifold" (from page 213).

4 Connector entry direction

*: The connector entry direction for connector type "FW" D-sub connector <IP67> can not be rotated. If it is necessary to change, order connector block assembly (page 231) separately.

3 Connector type

How to Order Manifold Assembly

Example (SS5Y3-10F1-□)

SS5Y3-10F1-05D-C6 ... 1 set (Type 10 5-station manifold base part no.)
 *SY3100-5U1 3 sets (2-position single part no.)
 *SY3200-5U1 1 set (2-position double part no.)
 *SY3300-5U1 1 set (3-position closed centre part no.)

The asterisk denotes the symbol for assembly. Prefix it to the part numbers of the valve etc.

- The valve arrangement is numbered as the 1st station from the D side.
- Under the manifold part number, state the valves to be mounted in order from the 1st station as shown in the figure above. If the arrangement becomes complicated, specify on a manifold specification sheet.

*: When mixing top ported configurations, select from page 110. In this case, use caution as there is also output on the A and B port on base side. Specify on a manifold specification sheet if plugs are required on the A and B port on base side.

5 Valve stations

F/FW: D-sub connector (25 pins)

Symbol	Stations	Note
02	2 stations	Double wiring*1
∴	∴	
12	12 stations	Specified layout*2 (Available up to 24 solenoids)
∴	∴	
24	24 stations	Specified layout*2 (Available up to 24 solenoids)
∴	∴	

P: Flat ribbon cable (26 pins)

Symbol	Stations	Note
02	2 stations	Double wiring*1
∴	∴	
12	12 stations	Specified layout*2 (Available up to 24 solenoids)
∴	∴	
24	24 stations	Specified layout*2 (Available up to 24 solenoids)
∴	∴	

PG: Flat ribbon cable (20 pins)

∴	∴	
08	8 stations	Specified layout*2 (Available up to 16 solenoids)
∴	∴	
16	16 stations	Specified layout*2 (Available up to 16 solenoids)
∴	∴	

*1: Double wiring: 2-position single, double, 3-position and 4-position valves can be used on all manifold stations. Use of a 2-position single solenoid will result in an unused control signal. If this is not desired, order with a specified layout.

*2: Specified layout: Indicate the wiring specifications on the manifold specification sheet. (Note that 2-position double, 3-position and 4-position valves cannot be used where single wiring has been specified.)
 *: This also includes the number of blanking plate assembly.

6 P, E port entry

U	U side (2 to 10 stations)
D	D side (2 to 10 stations)
B	Both sides (2 to 24 stations)

7 SUP/EXH block assembly

—	Internal pilot
S	Internal pilot, Built-in silencer
R	External pilot

*: 3/5(E) port is plugged for the built-in silencer type.

9 Mounting and Option

Symbol	Mounting	Option	
		Name plate	Station number
—	Direct mounting	—	—
AA		●	●
BA		●	—
D □	DIN rail mounting	—	—
A □		●	●
B □		●	—

DIN Rail Option

Direct mounting	
0	Without DIN rail (with bracket)
3	For 3 stations
⋮	⋮
24	For 24 stations

Specify a longer rail than the total length of specified stations.

*: Enter the number of stations inside □ when it is larger than the number of valve stations. (Refer to "DIN Rail Option" above.)

*: Only direct mounting is available for Type 11 (Bottom ported).

*: Refer to page 271 for the fixation of DIN rail mounting type manifold.

8 A, B port size (Metric/One-touch fitting)

P, E port size (One-touch fittings)		∅ 5/16"	∅ 3/8"	∅ 1/2"	∅ 3/8"	∅ 1/2"

*1: Indicate the sizes on the manifold specification sheet in the case of "CM", "LM".

The direction of P, E port fittings is the same as for A, B port. If selecting "LM", indicate it on the manifold specification sheet for the P, E port fitting direction.

*2: To avoid interference with the body or piping, select downward elbow port when mounting the optional spacer assembly (pages 250 to 252).

How to Order Valves (With mounting screw)

Refer to page 13 for valve specifications.

1 Series

3	SY3000
5	SY5000
7	SY7000

2 Type of actuation

1	2-position	Single
2		Double
3	3-position	Closed centre
4		Exhaust centre
5		Pressure centre
A*1	4-position dual 3-port	N.C./N.C.
B*1		N.O./N.O.
C*1		N.C./N.O.

*1: Only rubber seal type is available for the 4-position dual 3-port valve.

3 Seal type

0	Rubber seal
1	Metal seal

4 Pilot type

—	Internal pilot
R	External pilot

5 Back pressure check valve (Built-in valve type)

—	None
H	Built-in

*: Only rubber seal type. Manifold installed type is available if the back pressure check valve is required for a valve with metal seal. Refer to page 256 for Ordering Example. However, it is not recommended to use the built-in valve type and the manifold installed type at the same time because it will reduce the flow.

*: The built-in valve type back pressure check valve is not available for the 3-position type and the SY7000.

6 Pilot valve option

—	Standard (0.7 MPa)
B	Quick response type (0.7 MPa)
K*1	High pressure type (1.0 MPa)

*1: Only metal seal type is available for the high pressure type.

7 Coil type

—	Standard
T	With power saving circuit (Continuous duty type)

*: Be sure to select the power saving circuit type when the valve is continuously energised for long periods of time.

*: Be careful of the energising time when the power saving circuit is selected. Refer to page 268 for details.

8 Rated voltage

5	24 V DC
6	12 V DC

*: Connector type "G" (PC wiring with power supply terminal) of the manifold type is only available in 24 V DC.

9 Light/surge voltage suppressor and common specification

Symbol	With light	Surge voltage suppressor	Common specification
—	—	—	Non-polar
R	—	●	
U	●		
S	—		Positive common
Z	●		
NS	—	Negative common	
NZ	●		

*: Only "Z" and "NZ" types are available for with the power saving circuit.

*: For connector type "G" (PC wiring with power supply terminal) of the manifold type, select non-polar or positive common.

10 Manual override

*: Refer to page 31 for with the safety slide locking manual override.

11 Type of mounting screw

—	Round head combination screw
B	Hexagon socket head cap screw
K	Round head combination screw (Falling-out-prevention type)
H	Hexagon socket head cap screw (Falling-out-prevention type)

*: For "K" and "H", the valve body cover has a drop prevention construction to stop the mounting screws from falling out when the valve is removed for maintenance etc.

*: **When ordering a valve individually, the base gasket is not included.**

Since the base gasket is attached to the manifold, please order the base gasket separately if it is needed for maintenance service.

Refer to page 244 for part numbers of the base gasket and mounting screw.

*: "B" and "H" cannot be selected for the individual SUP/EXH spacer assembly, interface regulator or double check spacer assembly with residual pressure release valve.

How to Order Manifold

SS5Y **3** -12 **F** **1** - **05** **U** - - -

1 2 3 4 5 6 7 8

Refer to pages 210 to 212 for dimensions of Type 12/Top ported type.

1 Series

3	SY3000
5	SY5000
7	SY7000

2 Connector type

5 P, E port entry

U*1	U side (2 to 10 stations)
D*1	D side (2 to 10 stations)
B	Both sides (2 to 24 stations)

*1: 6 For type "S", supply/exhaust block assembly with built-in silencer, choose U or D for P port entry.

3 Connector entry direction

*: The connector entry direction for connector type "FW" D-sub connector <IP67> can not be rotated. If it is necessary to change, order connector block assembly (page 231) separately.

4 Valve stations

F/FW: D-sub connector (25 pins)

Symbol	Stations	Note
02	2 stations	Double wiring*1
⋮	⋮	
12	12 stations	Specified layout*2 (Available up to 24 solenoids)
⋮	⋮	
24	24 stations	

P: Flat ribbon cable (26 pins)

Symbol	Stations	Note
02	2 stations	Double wiring*1
⋮	⋮	
12	12 stations	Specified layout*2 (Available up to 24 solenoids)
⋮	⋮	
24	24 stations	

PG: Flat ribbon cable (20 pins)

Symbol	Stations	Note
02	2 stations	Double wiring*1
⋮	⋮	
09	9 stations	Specified layout*2 (Available up to 18 solenoids)
⋮	⋮	
18	18 stations	

PH: Flat ribbon cable (10 pins)

Symbol	Stations	Note
02	2 stations	Double wiring*1
⋮	⋮	
04	4 stations	Specified layout*2 (Available up to 8 solenoids)
⋮	⋮	
08	8 stations	

J/G: PC wiring (20 pins)

Symbol	Stations	Note
02	2 stations	Double wiring*1
⋮	⋮	
08	8 stations	Specified layout*2 (Available up to 16 solenoids)
⋮	⋮	
16	16 stations	

*1: Double wiring: 2-position single, double, 3-position and 4-position valves can be used on all manifold stations. Use of a 2-position single solenoid will result in an unused control signal. If this is not desired, order with a specified layout.

*2: Specified layout: Indicate the wiring specifications on the manifold specification sheet. (Note that 2-position double, 3-position and 4-position valves cannot be used where single wiring has been specified.)

*: This also includes the number of blanking plate assembly.

How to Order Manifold Assembly

Example (SS5Y3-12F1-□)

SS5Y3-12F1-05D 1 set (Type 12 5-station manifold base part no.)
 *SY3130-5U1-C6 3 sets (2-position single part no.)
 *SY3230-5U1-C6 1 set (2-position double part no.)
 *SY3330-5U1-C6 1 set (3-position closed centre part no.)

The asterisk denotes the symbol for assembly. Prefix it to the part numbers of the valve etc.

- The valve arrangement is numbered as the 1st station from the D side.
- Under the manifold part number, state the valves to be mounted in order from the 1st station as shown in the figure above. If the arrangement becomes complicated, specify on a manifold specification sheet.

6 SUP/EXH block assembly

—	Internal pilot
S	Internal pilot, Built-in silencer
R	External pilot

*: For built-in silencer type, P and E ports are available on U and D sides. 3/5(E) port is plugged. The silencer exhaust port is located on the opposite side of P, E port entry. (Example: When the P, E port entry is D side, the silencer exhaust port is U side.)

8 Mounting

—	Direct mounting
D	DIN rail mounting (With DIN rail)
D0	DIN rail mounting (Without DIN rail)
D3	For 3 stations
⋮	⋮
D24	For 24 stations

*: Refer to page 271 for the fixation of DIN rail mounting type manifold.

7 P, E port size (One-touch fittings)

Symbol	SY3000	SY5000	SY7000
—	Ø 8	Ø 10	Ø 12
N	Ø 5/16"	Ø 3/8"	Ø 1/2"

*: For N, sizes are in inches.

How to Order Valves (With mounting screw)

Refer to page 13 for valve specifications.

1 Series

3	SY3000
5	SY5000
7	SY7000

2 Type of actuation

1	2-position	Single
2		Double
3	3-position	Closed centre
4		Exhaust centre
5		Pressure centre
A*1	4-position dual	N.C./N.C.
B*1		N.O./N.O.
C*1		3-port
		N.C./N.O.

*1: Only rubber seal type is available for the 4-position dual 3-port valve.

3 Seal type

0	Rubber seal
1	Metal seal

4 Pilot type

—	Internal pilot
R	External pilot

5 Back pressure check valve (Built-in valve type)

—	None
H	Built-in

*: Only rubber seal type. Manifold installed type is available if the back pressure check valve is required for a valve with metal seal. Refer to page 256 for Ordering Example. However, it is not recommended to use the built-in valve type and the manifold installed type at the same time because it will reduce the flow.

*: The built-in valve type back pressure check valve is not available for the 3-position type and the SY7000.

6 Pilot valve option

—	Standard (0.7 MPa)
B	Quick response type (0.7 MPa)
K*1	High pressure type (1.0 MPa)

*1: Only metal seal type is available for the high pressure type.

7 Coil type

—	Standard
T	With power saving circuit (Continuous duty type)

*: Be sure to select the power saving circuit type when the valve is continuously energised for long periods of time.

*: Be careful of the energising time when the power saving circuit is selected. Refer to page 268 for details.

8 Rated voltage

5	24 V DC
6	12 V DC

*: Connector type "G" (PC wiring with power supply terminal) of the manifold type is only available in 24 V DC.

9 Light/surge voltage suppressor and common specification

Symbol	With light	Surge voltage suppressor	Common specification
—	—	—	Non-polar
R	—	●	
U	●		
S	—		
Z	●		
NS	—	Negative common	
NZ	●		

*: Only "Z" and "NZ" types are available for with the power saving circuit.

*: For connector type "G" (PC wiring with power supply terminal) of the manifold type, select non-polar or positive common.

10 Manual override

*: Refer to page 31 for with safety slide locking manual override.

11 A, B port size

Thread piping

Symbol	Port size	Applicable series
M5	M5 x 0.8	SY3000
O1	1/8	SY5000
O2	1/4	SY7000

One-touch fitting (Metric)

Symbol	A, B port	SY3000	SY5000	SY7000
C2	Ø 2	●	—	—
C3	Ø 3.2	●	—	—
C4	Ø 4	●	●	—
C6	Ø 6	●	●	●
C8	Ø 8	—	●	●
C10	Ø 10	—	—	●
C12	Ø 12	—	—	●

One-touch fitting (Inch)

Symbol	A, B port	SY3000	SY5000	SY7000
N1	Ø 1/8"	●	—	—
N3	Ø 5/32"	●	●	—
N7	Ø 1/4"	●	●	●
N9	Ø 5/16"	—	●	●
N11	Ø 3/8"	—	—	●

12 Thread type

—	Rc
F	G
N	NPT
T	NPTF

*: Only — is available for M5.

13 Type of mounting screw

—	Round head combination screw
B	Hexagon socket head cap screw
K	Round head combination screw (Falling-out-prevention type)
H	Hexagon socket head cap screw (Falling-out-prevention type)

*: For "K" and "H", the valve body cover has a drop prevention construction to stop the mounting screws from falling out when the valve is removed for maintenance etc.

*: **When ordering a valve individually, the base gasket is not included.**

Since the base gasket is attached to the manifold, please order the base gasket separately if it is needed for maintenance service.

Refer to page 244 for part numbers of the base gasket and mounting screw.

*: "B" and "H" cannot be selected for the individual SUP/EXH spacer assembly or interface regulator.

Series SY3000/5000/7000

Electrical Wiring Specifications

D-sub connector

If alignment is not specified, the internal wiring is double wiring (connected to SOL. a and SOL. b) regardless of number of stations, valve and option types.

Connector terminal no.

Station	Lead wire no.	Polarity	Terminal no.	Lead wire colour	Dot marking	
Station 1	SOL. a	1 (-)	(+)	1	Black	None
	SOL. b	14 (-)	(+)	2	Brown	None
Station 2	SOL. a	2 (-)	(+)	3	Red	None
	SOL. b	15 (-)	(+)	4	Orange	None
Station 3	SOL. a	3 (-)	(+)	5	Yellow	None
	SOL. b	16 (-)	(+)	6	Pink	None
Station 4	SOL. a	4 (-)	(+)	7	Blue	None
	SOL. b	17 (-)	(+)	8	Purple	White
Station 5	SOL. a	5 (-)	(+)	9	Grey	Black
	SOL. b	18 (-)	(+)	10	White	Black
Station 6	SOL. a	6 (-)	(+)	11	White	Red

Station 12	SOL. a	12 (-)	(+)	23	Grey	Red
	SOL. b	25 (-)	(+)	24	Black	White
COM.		13 (+)	(-)	25	White	None

Positive common Negative common

* When using a valve with no polarity, either positive common or negative common can be used.

* Connector made in conformity with DIN47100.

Specified Layout

(25 pins)

Mixed wiring of single and double wiring can be specified on the manifold specification sheet. The maximum number of stations is determined according to the number of solenoids. The total number of solenoids should be 24 or less. 1 solenoid is required for 2-position single, and 2 solenoids for 2-position double, 3-position and 4-position.

Valve

Type 10
Side Ported

Type 11
Bottom Ported

Plug-in Connector Connecting Base

Terminal Block Box

Series SY3000/5000/7000

How to Order Manifold

Refer to pages 208 (SY5000) and 209 (SY7000) for dimensions of Type 11/Bottom ported type.

1 Series

3	SY3000
5	SY5000
7	SY7000

2 Type

10	Side ported
11	Bottom ported*1

*1: The SY5000 manifold base is used for the bottom ported of the SY3000. When ordering, refer to "Plug-in Mixed Mounting Type Manifold" (from page 213).

3 Valve stations

Symbol	Stations	Note
02	2 stations	Double wiring*1
⋮	⋮	
10	10 stations	Specified layout*2 (Available up to 20 solenoids)
02	2 stations	
⋮	⋮	
20	20 stations	

*1: Double wiring: 2-position single, double, 3-position and 4-position valves can be used on all manifold stations. Use of a 2-position single solenoid will result in an unused control signal. If this is not desired, order with a specified layout.

*2: Specified layout: Indicate the wiring specifications with the manifold specification sheet. (Note that 2-position double, 3-position and 4-position valves cannot be used where single wiring has been specified.)

*: This also includes the number of blanking plate assembly.

4 P, E port entry

U	U side (2 to 10 stations)
D	D side (2 to 10 stations)
B	Both sides (2 to 20 stations)

5 SUP/EXH block assembly

—	Internal pilot
S	Internal pilot, Built-in silencer
R	External pilot

*: 3/5(E) port is plugged for the built-in silencer type.

*: When the built-in silencer type is used, keep the exhaust port from coming in direct contact with water or other liquids.

Refer to the page on the right for 6.

How to Order Manifold Assembly

Example (SS5Y3-10T-□)

SS5Y3-10T-05D-C6 ...1 set (Type 10 5-station manifold base part no.)

*SY3100-5U1 3 sets (2-position single part no.)

*SY3200-5U1 1 set (2-position double part no.)

*SY3300-5U1 1 set (3-position closed centre part no.)

→ The asterisk denotes the symbol for assembly.
Prefix it to the part numbers of the valve etc.

- The valve arrangement is numbered as the 1st station from the D side.
- Under the manifold part number, state the valves to be mounted in order from the 1st station as shown in the figure above. If the arrangement becomes complicated, specify on a manifold specification sheet.

7 Mounting and Option

Symbol	Mounting	Option	
		Name plate	Station number
—	Direct mounting	—	—
AA		●	●
BA		●	—
D□	DIN rail mounting	—	—
A□		●	●
B□		●	—

*: Enter the number of stations inside □ when it is larger than the number of valve stations. (Refer to "DIN Rail Option" below.)

*: Only direct mounting is available for Type 11 (Bottom ported).

*: Refer to page 271 for the fixation of DIN rail mounting type manifold.

DIN Rail Option

—	Direct mounting	
0	Without DIN rail (with bracket)	
3	For 3 stations	Specify a longer rail than the total length of specified stations.
⋮	⋮	
20	For 20 stations	

*: When mixing top ported configurations, select from page 122.
In this case, use caution as there is also output on the A and B port on base side. Specify on a manifold specification sheet if plugs are required on the A and B port on base side.

P, E port size (One-touch fittings)		∅ 5/16"	∅ 3/8"	∅ 1/2"	∅ 3/8"	∅ 1/2"	

*1: Indicate the sizes on the manifold specification sheet in the case of "CM", "LM".

The direction of P, E port fittings is the same as for A, B port. If selecting "LM", indicate it on the manifold specification sheet for the P, E port fitting direction.

*2: To avoid interference with the body or piping, select downward elbow port when mounting the optional spacer assembly (pages 250 to 252).

How to Order Valves (With mounting screw)

Refer to page 13 for valve specifications.

1 Series

3	SY3000
5	SY5000
7	SY7000

2 Type of actuation

1	2-position	Single
2		Double
3	3-position	Closed centre
4		Exhaust centre
5		Pressure centre
A*1	4-position dual 3-port	N.C./N.C.
B*1		N.O./N.O.
C*1		N.C./N.O.

*1: Only rubber seal type is available for the 4-position dual 3-port valve.

3 Seal type

0	Rubber seal
1	Metal seal

4 Pilot type

—	Internal pilot
R	External pilot

5 Back pressure check valve (Built-in valve type)

—	None
H	Built-in

*: Only rubber seal type. Manifold installed type is available if the back pressure check valve is required for a valve with metal seal. Refer to page 256 for Ordering Example. However, it is not recommended to use the built-in valve type and the manifold installed type at the same time because it will reduce the flow.

*: The built-in valve type back pressure check valve is not available for the 3-position type and the SY7000.

6 Pilot valve option

—	Standard (0.7 MPa)
B	Quick response type (0.7 MPa)
K*1	High pressure type (1.0 MPa)

*1: Only metal seal type is available for the high pressure type.

7 Coil type

—	Standard
T	With power saving circuit (Continuous duty type)

*: Be sure to select the power saving circuit type when the valve is continuously energised for long periods of time.

*: Be careful of the energising time when the power saving circuit is selected. Refer to page 268 for details.

8 Rated voltage

5	24 V DC
6	12 V DC

9 Light/surge voltage suppressor and common specification

Symbol	With light	Surge voltage suppressor	Common specification
—	—	—	Non-polar
R	—	●	
U	●		
S	—		
Z	●	●	Positive common
NS	—		Negative common
NZ	●		

*: Only "Z" and "NZ" types are available for with the power saving circuit.

10 Manual override

*: Refer to page 31 for with the safety slide locking manual override.

11 Type of mounting screw

—	Round head combination screw
B	Hexagon socket head cap screw
K	Round head combination screw (Falling-out-prevention type)
H	Hexagon socket head cap screw (Falling-out-prevention type)

*: For "K" and "H", the valve body cover has a drop prevention construction to stop the mounting screws from falling out when the valve is removed for maintenance etc.

*: **When ordering a valve individually, the base gasket is not included.**

Since the base gasket is attached to the manifold, please order the base gasket separately if it is needed for maintenance service. Refer to page 244 for part numbers of the base gasket and mounting screw.

*: "B" and "H" cannot be selected for the individual SUP/EXH spacer assembly, interface regulator or double check spacer assembly with residual pressure release valve.

Series SY3000/5000/7000

How to Order Manifold

SS5Y **3** - 12T - **05** **U** **□** - **□** **□**

Refer to pages 210 to 212 for dimensions of Type 12/Top ported type.

1 Series

3	SY3000
5	SY5000
7	SY7000

3 P, E port entry

U*1	U side (2 to 10 stations)
D*1	D side (2 to 10 stations)
B	Both sides (2 to 20 stations)

*1: 4 For type "S", supply/exhaust block assembly with built-in silencer, choose U or D for P port entry.

2 Valve stations

Symbol	Stations	Note
02	2 stations	Double wiring*1
⋮	⋮	
10	10 stations	Specified layout*2 (Available up to 20 solenoids)
02	2 stations	
⋮	⋮	
20	20 stations	

- *1: Double wiring: 2-position single, double, 3-position and 4-position valves can be used on all manifold stations. Use of a 2-position single solenoid will result in an unused control signal. If this is not desired, order with a specified layout.
- *2: Specified layout: Indicate the wiring specifications on the manifold specification sheet. (Note that 2-position double, 3-position and 4-position valves cannot be used where single wiring has been specified.)
- *: This also includes the number of blanking plate assembly.

4 SUP/EXH block assembly

—	Internal pilot
S	Internal pilot, Built-in silencer
R	External pilot

- *: For built-in silencer type, P and E ports are available on U and D sides. 3/5(E) port is plugged. The silencer exhaust port is located on the opposite side of P, E port entry. (Example: When the P, E port entry is D side, the silencer exhaust port is U side.)
- *: When the built-in silencer type is used, keep the exhaust port from coming in direct contact with water or other liquids.

5 P, E port size (One-touch fittings)

Symbol	SY3000	SY5000	SY7000
—	Ø 8	Ø 10	Ø 12
N	Ø 5/16"	Ø 3/8"	Ø 1/2"

*: For N, sizes are in inches.

How to Order Manifold Assembly

Example (SS5Y3-12T-□)

SS5Y3-12T-05D 1 set (Type 12 5-station manifold base part no.)
 *SY3130-5U1-C6 3 sets (2-position single part no.)
 *SY3230-5U1-C6 1 set (2-position double part no.)
 *SY3330-5U1-C6 1 set (3-position closed centre part no.)

↳ The asterisk denotes the symbol for assembly. Prefix it to the part numbers of the valve etc.

- The valve arrangement is numbered as the 1st station from the D side.
- Under the manifold part number, state the valves to be mounted in order from the 1st station as shown in the figure above. If the arrangement becomes complicated, specify on a manifold specification sheet.

6 Mounting

—	Direct mounting
D	DIN rail mounting (With DIN rail)
D0	DIN rail mounting (Without DIN rail)
D3	For 3 stations
⋮	⋮
D20	For 20 stations
	Specify a longer rail than the standard length.

*: Refer to page 271 for the fixation of DIN rail mounting type manifold.

How to Order Valves (With mounting screw) Refer to page 13 for valve specifications.

1 Series

3	SY3000
5	SY5000
7	SY7000

2 Type of actuation

1	2-position	Single
2		Double
3	3-position	Closed centre
4		Exhaust centre
5		Pressure centre
A*1	4-position dual 3-port	N.C./N.C.
B*1		N.O./N.O.
C*1		N.C./N.O.

*1: Only rubber seal type is available for the 4-position dual 3-port valve.

3 Seal type

0	Rubber seal
1	Metal seal

4 Pilot type

—	Internal pilot
R	External pilot

5 Back pressure check valve (Built-in valve type)

—	None
H	Built-in

*: Only rubber seal type. Manifold installed type is available if the back pressure check valve is required for a valve with metal seal. Refer to page 256 for Ordering Example. However, it is not recommended to use the built-in valve type and the manifold installed type at the same time because it will reduce the flow.

*: The built-in valve type back pressure check valve is not available for the 3-position type and the SY7000.

6 Pilot valve option

—	Standard (0.7 MPa)
B	Quick response type (0.7 MPa)
K*1	High pressure type (1.0 MPa)

*1: Only metal seal type is available for the high pressure type.

7 Coil type

—	Standard
T	With power saving circuit (Continuous duty type)

*: Be sure to select the power saving circuit type when the valve is continuously energised for long periods of time.

*: Be careful of the energising time when the power saving circuit is selected. Refer to page 268 for details.

8 Rated voltage

5	24 V DC
6	12 V DC

9 Light/surge voltage suppressor and common specification

Symbol	With light	Surge voltage suppressor	Common specification
—	—	—	Non-polar
R	—	●	
U	●		
S	—		
Z	●		Positive common
NS	—	Negative common	
NZ	●		

*: Only "Z" and "NZ" types are available for with the power saving circuit.

10 Manual override

*: Refer to page 31 for with the safety slide locking manual override.

11 A, B port size

Thread piping

Symbol	Port size	Applicable series
M5	M5 x 0.8	SY3000
O1	1/8	SY5000
O2	1/4	SY7000

One-touch fitting (Metric)

Symbol	A, B port	SY3000	SY5000	SY7000
C2	Ø 2	●	—	—
C3	Ø 3.2	●	—	—
C4	Ø 4	●	●	—
C6	Ø 6	●	●	●
C8	Ø 8	—	●	●
C10	Ø 10	—	—	●
C12	Ø 12	—	—	●

One-touch fitting (Inch)

Symbol	A, B port	SY3000	SY5000	SY7000
N1	Ø 1/8"	●	—	—
N3	Ø 5/32"	●	●	—
N7	Ø 1/4"	●	●	●
N9	Ø 5/16"	—	●	●
N11	Ø 3/8"	—	—	●

12 Thread type

—	Rc
F	G
N	NPT
T	NPTF

*: Only — is available for M5.

13 Type of mounting screw

—	Round head combination screw
B	Hexagon socket head cap screw
K	Round head combination screw (Falling-out-prevention type)
H	Hexagon socket head cap screw (Falling-out-prevention type)

*: For "K" and "H", the valve body cover has a drop prevention construction to stop the mounting screws from falling out when the valve is removed for maintenance etc.

*: **When ordering a valve individually, the base gasket is not included.**

Since the base gasket is attached to the manifold, please order the base gasket separately if it is needed for maintenance service.

Refer to page 244 for part numbers of the base gasket and mounting screw.

*: "B" and "H" cannot be selected for the individual SUP/EXH spacer assembly or interface regulator.

Terminal Block Connection

Step 1. Removing the terminal block cover

Loosen the 4 mounting screws (M4) to remove the terminal block cover.

Step 3. Mounting the terminal block cover

Securely tighten the screws to the torque shown in the below table only after confirming that the gasket is installed correctly.

Proper tightening torque [N·m]
0.7 to 1.2

Step 2. The below diagram shows the terminal block wiring.

All stations are provided with double wiring regardless of the mounted valves.

Connect each wire to the power supply side, according to the markings provided inside the terminal block.

- Applicable crimped terminal: 1.25-3S, 1.25Y-3, 1.25Y-3N, 1.25Y-3.5
- Name plate: VVQ5000-N-T
- Drip-proof plug assembly (for G 3/4): AXT100-B06A

Electrical Wiring Specifications (IP67 compatible)

If alignment is not specified, the internal wiring is double wiring (connected to SOL. a and SOL. b) regardless of number of stations, valve and option types.

*: When using a valve with no polarity, either positive common or negative common can be used.

Standard wiring		Terminal no.	Polarity	
Station 1	SOL.a	1A	(-)	(+)
	SOL.b	1B	(-)	(+)
Station 2	SOL.a	2A	(-)	(+)
	SOL.b	2B	(-)	(+)
Station 3	SOL.a	3A	(-)	(+)
	SOL.b	3B	(-)	(+)
Station 4	SOL.a	4A	(-)	(+)
	SOL.b	4B	(-)	(+)
Station 5	SOL.a	5A	(-)	(+)
	SOL.b	5B	(-)	(+)
Station 6	SOL.a	6A	(-)	(+)
	SOL.b	6B	(-)	(+)
Station 7	SOL.a	7A	(-)	(+)
	SOL.b	7B	(-)	(+)
Station 8	SOL.a	8A	(-)	(+)
	SOL.b	8B	(-)	(+)
Station 9	SOL.a	9A	(-)	(+)
	SOL.b	9B	(-)	(+)
Station 10	SOL.a	10A	(-)	(+)
	SOL.b	10B	(-)	(+)
		COM.	(+)	(-)

Positive Negative
common common

Specified Layout

Mixed wiring of single and double wiring can be specified on the manifold specification sheet. The maximum number of stations is determined according to the number of solenoids. The total number of solenoids should be 20 or less. 1 solenoid is required for 2-position single, and 2 solenoids for 2-position double, 3-position and 4-position.

Lead Wire

Series SY3000/5000/7000

How to Order Manifold

Refer to pages 208 (SY5000) and 209 (SY7000) for dimensions of Type 11/Bottom ported type.

1 Series

3	SY3000
5	SY5000
7	SY7000

2 Type

10	Side ported
11	Bottom ported*1

*1: The SY5000 manifold base is used for the bottom ported of the SY3000. When ordering, refer to "Plug-in Mixed Mounting Type Manifold" (from page 213).

3 Number of cores (Lead wire)

L1	34 cores
L2	17 cores
L3	9 cores

4 Lead wire length

1	0.6 m
2	1.5 m
3	3 m

5 Valve stations

(L1□)

Symbol	Stations	Note
02	2 stations	Double wiring*1
⋮	⋮	
16	16 stations	Specified layout*2 (Available up to 32 solenoids)
02	2 stations	
⋮	⋮	
24	24 stations	

(L3□)

Symbol	Stations	Note
02	2 stations	Double wiring*1
⋮	⋮	
04	4 stations	Specified layout*2 (Available up to 8 solenoids)
02	2 stations	
⋮	⋮	
08	8 stations	

(L2□)

Symbol	Stations	Note
02	2 stations	Double wiring*1
⋮	⋮	
08	8 stations	Specified layout*2 (Available up to 16 solenoids)
02	2 stations	
⋮	⋮	
16	16 stations	

*1: Double wiring: 2-position single, double, 3-position and 4-position valves can be used on all manifold stations.

Use of a 2-position single solenoid will result in an unused control signal. If this is not desired, order with a specified layout.

*2: Specified layout: Indicate the wiring specifications on the manifold specification sheet. (Note that 2-position double, 3-position and 4-position valves cannot be used where single wiring has been specified.)

*: This also includes the number of blanking plate assembly.

How to Order Manifold Assembly

Example (SS5Y3-10L11-□)

SS5Y3-10L11-05D-C6 ... 1 set (Type 10 5-station manifold base part no.)
 *SY3100-5U1 3 sets (2-position single part no.)
 *SY3200-5U1 1 set (2-position double part no.)
 *SY3300-5U1 1 set (3-position closed centre part no.)

The asterisk denotes the symbol for assembly.
 Prefix it to the part numbers of the valve etc.

- The valve arrangement is numbered as the 1st station from the D side.
- Under the manifold part number, state the valves to be mounted in order from the 1st station as shown in the figure above. If the arrangement becomes complicated, specify on a manifold specification sheet.

*: When mixing top ported configurations, select from page 132.
 In this case, use caution as there is also output on the A and B port on base side. Specify on a manifold specification sheet if plugs are required on the A and B port on base side.

6 P, E port entry

U	U side (2 to 10 stations)
D	D side (2 to 10 stations)
B	Both sides (2 to 24 stations)

7 SUP/EXH block assembly

—	Internal pilot
S	Internal pilot, Built-in silencer
R	External pilot

*: 3/5(E) port is plugged for the built-in silencer type.

*: When the built-in silencer type is used, keep the exhaust port from coming in direct contact with water or other liquids.

*1: Indicate the sizes on the manifold specification sheet in the case of "CM", "LM".

The direction of P, E port fittings is the same as for A, B port. If selecting "LM", indicate it on the manifold specification sheet for the P, E port fitting direction.

*2: To avoid interference with the body or piping, select downward elbow port when mounting the optional spacer assembly (pages 250 to 252).

9 Mounting and Option

Symbol	Mounting	Option	
		Name plate	Station number
—	Direct mounting	—	—
AA		●	●
BA		●	—
D□	DIN rail mounting	—	—
A□		●	●
B□		●	—

DIN Rail Option

Direct mounting	
0	Without DIN rail (with bracket)
3	For 3 stations
⋮	⋮
24	For 24 stations

Specify a longer rail than the total length of specified stations.

*: Enter the number of stations inside □ when it is larger than the number of valve stations. (Refer to "DIN Rail Option" above.)

*: Only direct mounting is available for Type 11 (Bottom ported).

*: Refer to page 271 for the fixation of DIN rail mounting type manifold.

How to Order Valves (With mounting screw)

Refer to page 13 for valve specifications.

1 Series

3	SY3000
5	SY5000
7	SY7000

2 Type of actuation

1	2-position	Single
2		Double
3	3-position	Closed centre
4		Exhaust centre
5		Pressure centre
A*1	4-position dual 3-port	N.C./N.C.
B*1		N.O./N.O.
C*1		N.C./N.O.

*1: Only rubber seal is available for the 4-position dual 3-port valve.

3 Seal type

0	Rubber seal
1	Metal seal

4 Pilot type

—	Internal pilot
R	External pilot

5 Back pressure check valve (Built-in valve type)

—	None
H	Built-in

*: Only rubber seal type. Manifold installed type is available if the back pressure check valve is required for a valve with metal seal. Refer to page 256 for Ordering Example. However, it is not recommended to use the built-in valve type and the manifold installed type at the same time because it will reduce the flow.

*: The built-in valve type back pressure check valve is not available for the 3-position type and the SY7000.

6 Pilot valve option

—	Standard (0.7 MPa)
B	Quick response type (0.7 MPa)
K*1	High pressure type (1.0 MPa)

*1: Only metal seal type is available for the high pressure type.

7 Coil type

—	Standard
T	With power saving circuit (Continuous duty type)

*: Be sure to select the power saving circuit type when the valve is continuously energised for long periods of time.

*: Be careful of the energising time when the power saving circuit is selected. Refer to page 268 for details.

8 Rated voltage

5	24 V DC
6	12 V DC

9 Light/surge voltage suppressor and common specification

Symbol	With light	Surge voltage suppressor	Common specification
—	—	—	Non-polar
R	—	●	
U	●		
S	—		Positive common
Z	●		
NS	—	●	Negative common
NZ	●		

*: Only "Z" and "NZ" types are available for with the power saving circuit.

10 Manual override

*: Refer to page 31 for with the safety slide locking manual override.

11 Type of mounting screw

—	Round head combination screw
B	Hexagon socket head cap screw
K	Round head combination screw (Falling-out-prevention type)
H	Hexagon socket head cap screw (Falling-out-prevention type)

*: For "K" and "H", the valve body cover has a drop prevention construction to stop the mounting screws from falling out when the valve is removed for maintenance etc.

*: **When ordering a valve individually, the base gasket is not included.**

Since the base gasket is attached to the manifold, please order the base gasket separately if it is needed for maintenance service.

Refer to page 244 for part numbers of the base gasket and mounting screw.

*: "B" and "H" cannot be selected for the individual SUP/EXH spacer assembly, interface regulator or double check spacer assembly with residual pressure release valve.

Plug-in Connector Connecting Base

Lead Wire

Type 12
Top Ported

Series SY3000/5000/7000

How to Order Manifold

Refer to pages 210 to 212 for dimensions of Type 12/Top ported type.

1 Series

3	SY3000
5	SY5000
7	SY7000

2 Number of cores (Lead wire)

L1	34 cores
L2	17 cores
L3	9 cores

3 Lead wire length

1	0.6 m
2	1.5 m
3	3 m

5 P, E port entry

U*1	U side (2 to 10 stations)
D*1	D side (2 to 10 stations)
B	Both sides (2 to 24 stations)

*1: 6 For type "S", supply/exhaust block assembly with built-in silencer, choose U or D for P port entry.

4 Valve stations

(L1□)

Symbol	Stations	Note
02	2 stations	Double wiring*1
⋮	⋮	
16	16 stations	Specified layout*2 (Available up to 32 solenoids)
02	2 stations	
⋮	⋮	
24	24 stations	

(L3□)

Symbol	Stations	Note
02	2 stations	Double wiring*1
⋮	⋮	
04	4 stations	Specified layout*2 (Available up to 8 solenoids)
02	2 stations	
⋮	⋮	
08	8 stations	

(L2□)

Symbol	Stations	Note
02	2 stations	Double wiring*1
⋮	⋮	
08	8 stations	Specified layout*2 (Available up to 16 solenoids)
02	2 stations	
⋮	⋮	
16	16 stations	

*1: Double wiring: 2-position single, double, 3-position and 4-position valves can be used on all manifold stations.

Use of a 2-position single solenoid will result in an unused control signal. If this is not desired, order with a specified layout.

*2: Specified layout: Indicate the wiring specifications on the manifold specification sheet. (Note that 2-position double, 3-position and 4-position valves cannot be used where single wiring has been specified.)

*: This also includes the number of blanking plate assembly.

6 SUP/EXH block assembly

—	Internal pilot
S	Internal pilot, Built-in silencer
R	External pilot

*: For built-in silencer type, P and E ports are available on U and D sides. 3/5(E) port is plugged. The silencer exhaust port is located on the opposite side of P, E port entry. (Example: When the P, E port entry is D side, the silencer exhaust port is U side.)

*: When the built-in silencer type is used, keep the exhaust port from coming in direct contact with water or other liquids.

7 P, E port size (One-touch fittings)

Symbol	SY3000	SY5000	SY7000
—	∅ 8	∅ 10	∅ 12
N	∅ 5/16"	∅ 3/8"	∅ 1/2"

*: For N, sizes are in inches.

8 Mounting

—	Direct mounting
D	DIN rail mounting (With DIN rail)
D0	DIN rail mounting (Without DIN rail)
D3	For 3 stations
⋮	⋮
D24	For 24 stations

Specify a longer rail than the standard length.

*: Refer to page 271 for the fixation of DIN rail mounting type manifold.

How to Order Manifold Assembly

Example (SS5Y3-12L11-□)

SS5Y3-12L11-05D ... 1 set (Type 12 5-station manifold base part no.)
 *SY3130-5U1-C6 3 sets (2-position single part no.)
 *SY3230-5U1-C6 1 set (2-position double part no.)
 *SY3330-5U1-C6 1 set (3-position closed centre part no.)

→ The asterisk denotes the symbol for assembly. Prefix it to the part numbers of the valve etc.

- The valve arrangement is numbered as the 1st station from the D side.
- Under the manifold part number, state the valves to be mounted in order from the 1st station as shown in the figure above. If the arrangement becomes complicated, specify on a manifold specification sheet.

How to Order Valves (With mounting screw) Refer to page 13 for valve specifications.

1 Series

3	SY3000
5	SY5000
7	SY7000

2 Type of actuation

1	Single
2	2-position Double
3	3-position Closed centre
4	3-position Exhaust centre
5	3-position Pressure centre
A*1	4-position dual 3-port N.C./N.C.
B*1	4-position dual 3-port N.O./N.O.
C*1	4-position dual 3-port N.C./N.O.

*1: Only rubber seal type is available for the 4-position dual 3-port valve.

3 Seal type

0	Rubber seal
1	Metal seal

4 Pilot type

—	Internal pilot
R	External pilot

5 Back pressure check valve (Built-in valve type)

—	None
H	Built-in

*: Only rubber seal type. Manifold installed type is available if the back pressure check valve is required for a valve with metal seal. Refer to page 256 for Ordering Example. However, it is not recommended to use the built-in valve type and the manifold installed type at the same time because it will reduce the flow.

*: The built-in valve type back pressure check valve is not available for the 3-position type and the SY7000.

6 Pilot valve option

—	Standard (0.7 MPa)
B	Quick response type (0.7 MPa)
K*1	High pressure type (1.0 MPa)

*1: Only metal seal type is available for the high pressure type.

7 Coil type

—	Standard
T	With power saving circuit (Continuous duty type)

*: Be sure to select the power saving circuit type when the valve is continuously energised for long periods of time.

*: Be careful of the energising time when the power saving circuit is selected. Refer to page 268 for details.

8 Rated voltage

5	24 V DC
6	12 V DC

9 Light/surge voltage suppressor and common specification

Symbol	With light	Surge voltage suppressor	Common specification
—	—	—	Non-polar
R	—	●	
U	●		
S	—		Positive common
Z	●		
NS	—	●	Negative common
NZ	●		

*: Only "Z" and "NZ" types are available for with the power saving circuit.

10 Manual override

*: Refer to page 31 for with the safety slide locking manual override.

11 A, B port size

Thread piping

Symbol	Port size	Applicable series
M5	M5 x 0.8	SY3000
O1	1/8	SY5000
O2	1/4	SY7000

One-touch fitting (Metric)

Symbol	A, B port	SY3000	SY5000	SY7000

C3	∅ 3.2	●	—	—
C4	∅ 4	●	●	—
C6	∅ 6	●	●	●
C8	∅ 8	—	●	●
C10	∅ 10	—	—	●
C12	∅ 12	—	—	●

One-touch fitting (Inch)

Symbol	A, B port	SY3000	SY5000	SY7000
N1	∅ 1/8"	●	—	—
N3	∅ 5/32"	●	●	—
N7	∅ 1/4"	●	●	●
N9	∅ 5/16"	—	●	●
N11	∅ 3/8"	—	—	●

12 Thread type

—	Rc
F	G
N	NPT
T	NPTF

*: Only — is available for M5.

13 Type of mounting screw

—	Round head combination screw
B	Hexagon socket head cap screw
K	Round head combination screw (Falling-out-prevention type)
H	Hexagon socket head cap screw (Falling-out-prevention type)

*: For "K" and "H", the valve body cover has a drop prevention construction to stop the mounting screws from falling out when the valve is removed for maintenance etc.

*: **When ordering a valve individually, the base gasket is not included.**

Since the base gasket is attached to the manifold, please order the base gasket separately if it is needed for maintenance service. Refer to page 244 for part numbers of the base gasket and mounting screw.

*: "B" and "H" cannot be selected for the individual SUP/EXH spacer assembly or interface regulator.

Electrical Wiring Specifications

Lead wire

If alignment is not specified, the internal wiring is double wiring (connected to SOL. a and SOL. b) regardless of number of stations, valve and option types.

Electrical characteristics

Item	Property
Conductor resistance Ω/km , 20 °C	143 or less
Voltage limit V, 1 minute, AC	2000
Insulation resistance $\text{M}\Omega/\text{km}$, 20 °C	10 or more

*: Cannot be used for movable wiring.
The minimum bending radius of the cable is 55 mm.

Station	Lead wire no.	Polarity	Lead wire colour	Printed mark (Both sides)	
				Type	Colour
Station 1	SOL.a 1	(-) (+)	Orange	---	Red
	SOL.b 2	(-) (+)			Black
Station 2	SOL.a 3	(-) (+)	Light grey	---	Red
	SOL.b 4	(-) (+)			Black

	SOL.b 32	(-) (+)			Black
	COM. 33	(+) (-)	Light grey	---	Red
	COM. 34	(+) (-)			Black

Positive common Negative common

*: For negative common specification, a valve for negative common or a valve without polarity should be used.

Specified Layout

Mixed wiring of single and double wiring can be specified on the manifold specification. The maximum number of stations is determined according to the number of solenoids. The total number of solenoids should be 32 or less. 1 solenoid is required for 2-position single, and 2 solenoids for 2-position double, 3-position and 4-position.

Electrical Wiring Specifications

Lead wire

*: Cannot be used for movable wiring.
The minimum bending radius of the cable is 45 mm.

Manifold Options

Type 10
Side Ported

Type 11
Bottom Ported

Plug-in Connector Connecting Base

Circular Connector

Series SY3000/5000/7000

How to Order Manifold

Refer to pages 208 (SY5000) and 209 (SY7000) for dimensions of Type 11/Bottom ported type.

1 Series

3	SY3000
5	SY5000
7	SY7000

2 Type

10	Side ported
11	Bottom ported*1

*1: The SY5000 manifold base is used for the bottom ported of the SY3000. When ordering, refer to "Plug-in Mixed Mounting Type Manifold" (from page 213).

3 Valve stations

Symbol	Stations	Note
02	2 stations	Double wiring*1
⋮	⋮	
12	12 stations	
02	2 stations	Specified layout*2 (Available up to 24 solenoids)
⋮	⋮	
24	24 stations	

*1: Double wiring: 2-position single, double, 3-position and 4-position valves can be used on all manifold stations. Use of a 2-position single solenoid will result in an unused control signal. If this is not desired, order with a specified layout.

*2: Specified layout: Indicate the wiring specifications on the manifold specification sheet. (Note that 2-position double, 3-position and 4-position valves cannot be used where single wiring has been specified.)

*: This also includes the number of blanking plate assembly.

4 P, E port entry

U	U side (2 to 10 stations)
D	D side (2 to 10 stations)
B	Both sides (2 to 24 stations)

5 SUP/EXH block assembly

—	Internal pilot
S	Internal pilot, Built-in silencer
R	External pilot

*: 3/5(E) port is plugged for the built-in silencer type.

*: When the built-in silencer type is used, keep the exhaust port from coming in direct contact with water or other liquids.

Refer to the page on the right for 6.

How to Order Manifold Assembly

Example (SS5Y3-10M-□)

SS5Y3-10M-05D-C6 ... 1 set (Type 10 5-station manifold base part no.)
 *SY3100-5U1 3 sets (2-position single part no.)
 *SY3200-5U1 1 set (2-position double part no.)
 *SY3300-5U1 1 set (3-position closed centre part no.)

→ The asterisk denotes the symbol for assembly. Prefix it to the part numbers of the valve etc.

- The valve arrangement is numbered as the 1st station from the D side.
- Under the manifold part number, state the valves to be mounted in order from the 1st station as shown in the figure above. If the arrangement becomes complicated, specify on a manifold specification sheet.

*: When mixing top ported configurations, select from page 142. In this case, use caution as there is also output on the A and B port on base side. Specify on a manifold specification sheet if plugs are required on the A and B port on base side.

7 Mounting and Option

Symbol	Mounting	Option	
		Name plate	Station number
—	Direct mounting	—	—
AA		●	●
BA		●	—
D□	DIN rail mounting	—	—
A□		●	●
B□		●	—

*: Enter the number of stations inside □ when it is larger than the number of valve stations. (Refer to "DIN Rail Option" below.)

*: Only direct mounting is available for Type 11 (Bottom ported).

*: Refer to page 271 for the fixation of DIN rail mounting type manifold.

DIN Rail Option

—	Direct mounting	
0	Without DIN rail (with bracket)	
3	For 3 stations	Specify a longer rail than the total length of specified stations.
⋮	⋮	
24	For 24 stations	

6 A, B port size (Metric/One-touch fitting)

Symbol	A, B port	Type 10/Side ported			Type 11/Bottom ported	
		SY3000	SY5000	SY7000	SY5000	SY7000

Manifold Options

Series SY3000/5000/7000

How to Order Valves (With mounting screw)

Refer to page 13 for valve specifications.

1 Series

3	SY3000
5	SY5000
7	SY7000

2 Type of actuation

1	2-position	Single
2		Double
3	3-position	Closed centre
4		Exhaust centre
5		Pressure centre
A*1	4-position dual 3-port	N.C./N.C.
B*1		N.O./N.O.
C*1		N.C./N.O.

*1: Only rubber seal type is available for the 4-position dual 3-port valve.

3 Seal type

0	Rubber seal
1	Metal seal

4 Pilot type

—	Internal pilot
R	External pilot

5 Back pressure check valve (Built-in valve type)

—	None
H	Built-in

*: Only rubber seal type. Manifold installed type is available if the back pressure check valve is required for a valve with metal seal. Refer to page 256 for Ordering Example. However, it is not recommended to use the built-in valve type and the manifold installed type at the same time because it will reduce the flow.

*: The built-in valve type back pressure check valve is not available for the 3-position type and the SY7000.

6 Pilot valve option

—	Standard (0.7 MPa)
B	Quick response type (0.7 MPa)
K*1	High pressure type (1.0 MPa)

*1: Only metal seal type is available for the high pressure type.

7 Coil type

—	Standard
T	With power saving circuit (Continuous duty type)

*: Be sure to select the power saving circuit type when the valve is continuously energised for long periods of time.

*: Be careful of the energising time when the power saving circuit is selected. Refer to page 268 for details.

8 Rated voltage

5	24 V DC
6	12 V DC

9 Light/surge voltage suppressor and common specification

Symbol	With light	Surge voltage suppressor	Common specification
—	—	—	Non-polar
R	—	●	
U	●		
S	—		Positive common
Z	●		
NS	—	Negative common	
NZ	●		

*: Only "Z" and "NZ" types are available for with the power saving circuit.

10 Manual override

*: Refer to page 31 for with the safety slide locking manual override.

11 Type of mounting screw

—	Round head combination screw
B	Hexagon socket head cap screw
K	Round head combination screw (Falling-out-prevention type)
H	Hexagon socket head cap screw (Falling-out-prevention type)

*: For "K" and "H", the valve body cover has a drop prevention construction to stop the mounting screws from falling out when the valve is removed for maintenance etc.

*: **When ordering a valve individually, the base gasket is not included.**

Since the base gasket is attached to the manifold, please order the base gasket separately if it is needed for maintenance service.

Refer to page 244 for part numbers of the base gasket and mounting screw.

*: "B" and "H" cannot be selected for the individual SUP/EXH spacer assembly, interface regulator or double check spacer assembly with residual pressure release valve.

Manifold Options

Plug-in Connector Connecting Base

Circular Connector

Type 12
Top Ported

Series SY3000/5000/7000

How to Order Manifold

Refer to pages 210 to 212 for dimensions of Type 12/Top ported type.

1 Series

3	SY3000
5	SY5000
7	SY7000

2 Valve stations

Symbol	Stations	Note
02	2 stations	Double wiring*1
⋮	⋮	
12	12 stations	
02	2 stations	Specified layout*2 (Available up to 24 solenoids)
⋮	⋮	
24	24 stations	

- *1: Double wiring: 2-position single, double, 3-position and 4-position valves can be used on all manifold stations. Use of a 2-position single solenoid will result in an unused control signal. If this is not desired, order with a specified layout.
- *2: Specified layout: Indicate the wiring specifications on the manifold specification sheet. (Note that 2-position double, 3-position and 4-position valves cannot be used where single wiring has been specified.)
- *: This also includes the number of blanking plate assembly.

3 P, E port entry

U*1	U side (2 to 10 stations)
D*1	D side (2 to 10 stations)
B	Both sides (2 to 24 stations)

- *1: ④ For type "S", supply/exhaust block assembly with built-in silencer, choose U or D for P port entry.

4 SUP/EXH block assembly

—	Internal pilot
S	Internal pilot, Built-in silencer
R	External pilot

- *: For built-in silencer type, P and E ports are available on U and D sides. 3/5(E) port is plugged. The silencer exhaust port is located on the opposite side of P, E port entry. (Example: When the P, E port entry is D side, the silencer exhaust port is U side.)
- *: When the built-in silencer type is used, keep the exhaust port from coming in direct contact with water or other liquids.

How to Order Manifold Assembly

Example (SS5Y3-12M-□)

SS5Y3-12M-05D 1 set (Type 12 5-station manifold base part no.)
 *SY3130-5U1-C6 3 sets (2-position single part no.)
 *SY3230-5U1-C6 1 set (2-position double part no.)
 *SY3330-5U1-C6 1 set (3-position closed centre part no.)

→ The asterisk denotes the symbol for assembly. Prefix it to the part numbers of the valve etc.

- The valve arrangement is numbered as the 1st station from the D side.
- Under the manifold part number, state the valves to be mounted in order from the 1st station as shown in the figure above. If the arrangement becomes complicated, specify on a manifold specification sheet.

5 P, E port size (One-touch fittings)

Symbol	SY3000	SY5000	SY7000
—	∅ 8	∅ 10	∅ 12
N	∅ 5/16"	∅ 3/8"	∅ 1/2"

- *: For N, sizes are in inches.

6 Mounting

—	Direct mounting
D	DIN rail mounting (With DIN rail)
D0	DIN rail mounting (Without DIN rail)
D3	For 3 stations
⋮	⋮
D24	For 24 stations

Specify a longer rail than the standard length.

- *: Refer to page 271 for the fixation of DIN rail mounting type manifold.

How to Order Valves (With mounting screw) Refer to page 13 for valve specifications.

1 Series

3	SY3000
5	SY5000
7	SY7000

2 Type of actuation

1	2-position	Single
2	2-position	Double
3	3-position	Closed centre
4		Exhaust centre
5		Pressure centre
A*1	4-position dual 3-port	N.C./N.C.
B*1		N.O./N.O.
C*1		N.C./N.O.

*1: Only rubber seal is available for the 4-position dual 3-port valve.

3 Seal type

0	Rubber seal
1	Metal seal

4 Pilot type

—	Internal pilot
R	External pilot

5 Back pressure check valve (Built-in valve type)

—	None
H	Built-in

*: Only rubber seal type. Manifold installed type is available if the back pressure check valve is required for a valve with metal seal. Refer to page 256 for Ordering Example. However, it is not recommended to use the built-in valve type and the manifold installed type at the same time because it will reduce the flow.

*: The built-in valve type back pressure check valve is not available for the 3-position type and the SY7000.

6 Pilot valve option

—	Standard (0.7 MPa)
B	Quick response type (0.7 MPa)
K*1	High pressure type (1.0 MPa)

*1: Only metal seal type is available for the high pressure type.

7 Coil type

—	Standard
T	With power saving circuit (Continuous duty type)

*: Be sure to select the power saving circuit type when the valve is continuously energised for long periods of time.

*: Be careful of the energising time when the power saving circuit is selected. Refer to page 268 for details.

8 Rated voltage

5	24 V DC
6	12 V DC

9 Light/surge voltage suppressor and common specification

Symbol	With light	Surge voltage suppressor	Common specification
—	—	—	Non-polar
R	—	●	
U	●		
S	—		
Z	●	●	Positive common
NS	—		Negative common
NZ	●		

*: Only "Z" and "NZ" types are available for with the power saving circuit.

10 Manual override

*: Refer to page 31 for with the safety slide locking manual override.

11 A, B port size

Thread piping

Symbol	Port size	Applicable series
M5	M5 x 0.8	SY3000
O1	1/8	SY5000
O2	1/4	SY7000

One-touch fitting (Metric)

Symbol	A, B port	SY3000	SY5000	SY7000
C2	Ø 2	●	—	—
C3	Ø 3.2	●	—	—
C4	Ø 4	●	●	—
C6	Ø 6	●	●	●
C8	Ø 8	—	●	●
C10	Ø 10	—	—	●
C12	Ø 12	—	—	●

One-touch fitting (Inch)

Symbol	A, B port	SY3000	SY5000	SY7000
N1	Ø 1/8"	●	—	—
N3	Ø 5/32"	●	●	—
N7	Ø 1/4"	●	●	●
N9	Ø 5/16"	—	●	●
N11	Ø 3/8"	—	—	●

12 Thread type

—	Rc
F	G
N	NPT
T	NPTF

*: Only — is available for M5.

13 Type of mounting screw

—	Round head combination screw
B	Hexagon socket head cap screw
K	Round head combination screw (Falling-out-prevention type)
H	Hexagon socket head cap screw (Falling-out-prevention type)

*: For "K" and "H", the valve body cover has a drop prevention construction to stop the mounting screws from falling out when the valve is removed for maintenance etc.

*: **When ordering a valve individually, the base gasket is not included.**

Since the base gasket is attached to the manifold, please order the base gasket separately if it is needed for maintenance service. Refer to page 244 for part numbers of the base gasket and mounting screw.

*: "B" and "H" cannot be selected for the individual SUP/EXH spacer assembly or interface regulator.

Electrical Wiring Specifications

Circular connector

If alignment is not specified, the internal wiring is double wiring (connected to SOL. a and SOL. b) regardless of number of stations, valve and option types.

	Terminal no.	Polarity	
Station 1	SOL.a	1 (-)	(+)
	SOL.b	2 (-)	(+)
Station 2	SOL.a	3 (-)	(+)
	SOL.b	4 (-)	(+)
Station 3	SOL.a	5 (-)	(+)
	SOL.b	6 (-)	(+)
Station 4	SOL.a	7 (-)	(+)
	SOL.b	8 (-)	(+)
Station 5	SOL.a	9 (-)	(+)
	SOL.b	10 (-)	(+)
Station 6	SOL.a	11 (-)	(+)
	SOL.b	12 (-)	(+)
Station 7	SOL.a	13 (-)	(+)
	SOL.b	14 (-)	(+)
Station 8	SOL.a	15 (-)	(+)
	SOL.b	16 (-)	(+)
Station 9	SOL.a	17 (-)	(+)
	SOL.b	18 (-)	(+)
Station 10	SOL.a	19 (-)	(+)
	SOL.b	20 (-)	(+)
Station 11	SOL.a	21 (-)	(+)
	SOL.b	22 (-)	(+)
Station 12	SOL.a	23 (-)	(+)
	SOL.b	24 (-)	(+)
	COM.	25 (+)	(-)
	COM.	26 (+)	(-)

Positive Negative
common common

*: When using a valve with no polarity, either positive common or negative common can be used.

Specified Layout

Mixed wiring of single and double wiring can be specified on the manifold specification sheet. The maximum number of stations is determined according to the number of solenoids. The total number of solenoids should be 24 or less. 1 solenoid is required for 2-position single, and 2 solenoids for 2-position double, 3-position and 4-position.

Side Ported

Type 11
Bottom Ported

Plug-in Connector Connecting Base

EX500 Gateway Decentralised System 2 (128 Points)

Series SY3000/5000/7000

How to Order Manifold

Refer to pages 208 (SY5000) and 209 (SY7000) for dimensions of Type 11/Bottom ported type.

1 Series

3	SY3000
5	SY5000
7	SY7000

*: For mixed mounting, refer to page 213 and later.

2 Type

10	Side ported
11	Bottom ported* ¹

*1: The SY5000 manifold base is used for the bottom ported of the SY3000. When ordering, refer to "Plug-in Mixed Mounting Type Manifold" (from page 213).

*: When mixing top ported configurations, select from page 158.
In this case, use caution as there is also output on the A and B port on base side. Specify on a manifold specification sheet if plugs are required on the A and B port on base side.

3 SI Unit (Number of outputs, Output polarity, Max. number of valve stations)

0	Without SI Unit
A3N	32 outputs* ¹ * ⁴ , 1 to 16 stations (24 stations* ³), Negative common* ²

- *1: 16 outputs can be set by switching the built-in setting switch.
- *2: Ensure a match with the common specification of the valve.
- *3: (): Maximum number of stations for mixed single and double wiring.
- *4: When using the SI Unit with 32 outputs, use the GW Unit compatible with the EX500 Gateway Decentralised System 2 (128 points).

4 Valve stations

Stations	Note
02	Double wiring* ¹
:	
16	
02	Mixed wiring, Specified layout* ² (Available up to 32 solenoids)
:	
24	

- *1: Double wiring: 2-position single, double, 3-position and 4-position valves can be used on all manifold stations.
Use of a 2-position single solenoid will result in an unused control signal.
If this is not desired, order with a specified layout.
- *2: Specified layout: Indicate the wiring specifications on the manifold specification sheet. (Note that 2-position double, 3-position and 4-position valves cannot be used where single wiring has been specified.)
- *: When the product without the SI Unit (S0) is selected, note the maximum number of solenoids of the SI Unit that will be mounted. If the layout is specified, indicate it on the manifold specification sheet.
- *: This also includes the number of blanking plate assembly.

How to Order Manifold Assembly

Example

SS5Y3-10SA3N-05D-C6...1 set (Manifold base part number)
 * SY3200-5U15 sets (2-position double part number)
 ↳ The asterisk denotes the symbol for assembly.
 Prefix it to the part numbers of the valve etc.

- The valve arrangement is numbered as the 1st station from the D side.
- Under the manifold base part number, state the valves to be mounted in order from the 1st station as shown in the figure above. If the arrangement becomes complicated, specify on the manifold specification sheet.

5 P, E port entry

U	U side (2 to 10 stations)
D	D side (2 to 10 stations)
B	Both sides (2 to 24 stations)

6 SUP/EXH block assembly

—	Internal pilot
S	Internal pilot, Built-in silencer* ¹ * ²
R	External pilot

- *1: 3/5(E) port is plugged for the built-in silencer type.
- *2: When built-in silencer type is used, keep the exhaust port from coming in direct contact with water or other liquids.

*: A separate GW Unit and communication cable are required.

For details about the EX 5 0 0 Gateway-type Serial Transmission System, refer to the WEB catalogue on SMC website www.smc.eu and the Operation Manual. For details about part numbers of SI Units to be mounted, refer to page 235 in this catalogue. Please download the Operation Manual via SMC website, <http://www.smc.eu>

BA		●	—
D□*1	DIN rail mounting	—	—
A□*1		●	●
B□*1		●	—

*1: Refer to "DIN Rail Option" below.

*: Select the direct mounting type for Type 11 (Bottom ported).

DIN Rail Option

—	With DIN bracket, DIN rail with standard length
0	With DIN bracket, without DIN rail
3*1	With DIN bracket, DIN rail for 3 stations
⋮	⋮
24*1	With DIN bracket, DIN rail for 24 stations

*1: Specify a longer rail than the length of valve stations.

*: If the DIN rail must be mounted without an SI Unit, select "D0" and order the DIN rail separately. Refer to L3 of the dimensions for the DIN rail length. Refer to page 249 for the DIN rail part number.

*: Refer to page 271 for the fixation of DIN rail mounting type manifold.

How to Order Valves (With mounting screw)

Refer to page 13 for valve specifications.

• Base mounted

1 Series

3	SY3000
5	SY5000
7	SY7000

2 Type of actuation

1	2-position	Single
2		Double
3	3-position	Closed centre
4		Exhaust centre
5		Pressure centre
A*1	4-position dual 3-port valve	N.C./N.C.
B*1		N.O./N.O.
C*1		N.C./N.O.

*1: Select the rubber seal type for the 4-position dual 3-port valve.

3 Seal type

0	Rubber seal
1	Metal seal

4 Pilot type

—	Internal pilot
R	External pilot

5 Back pressure check valve

—	None
H*1	Built-in

*1: Select the rubber seal type when the back pressure check valve is built-in. Manifold installed type is available if the back pressure check valve is required for a valve with metal seal. For ordering example, refer to page 256. However, it is not recommended to use the built-in valve type and the manifold installed type at the same time because it will reduce the flow.

*: Select "—" for 3-position type and the SY7000.

6 Pilot valve option

—	Standard (0.7 MPa)
B	Quick response type (0.7 MPa)
K*1	High pressure type (1.0 MPa)

*1: Select the metal seal type for high pressure type.

7 Coil type

—	Standard
T	With power saving circuit (Continuous duty type)*1*2

*1: Be sure to select the power saving circuit type when the valve is continuously energised for long periods of time.

*2: Be careful of the energising time when the power saving circuit is selected. For details, refer to page 268.

8 Rated voltage

5	24 V DC
---	---------

9 Light/surge voltage suppressor and common specification

	With light	Surge voltage suppressor	Common specification
R	—	●	Non-polar
U	●		
NS	—		Negative common
NZ	●		

*: Select "NZ" for with the power saving circuit.

10 Manual override

*: Refer to page 31 for with the safety slide locking manual override.

11 Type of mounting screw

—	Round head combination screw
B	Hexagon socket head cap screw
K	Round head combination screw (Falling-out-prevention type)*1
H	Hexagon socket head cap screw (Falling-out-prevention type)*1

*1: For "K" and "H", the valve body cover has a drop prevention construction to stop the mounting screws from falling out when the valve is removed for maintenance etc.

*: **When ordering a valve individually, the base gasket is not included.**

Since the base gasket is attached to the manifold, please order the base gasket separately if it is needed for maintenance service.

Refer to page 244 for part numbers of the base gasket and mounting screw.

*: Select "—" or "K" for the optional individual SUP/EXH spacer assembly, interface regulator or double check spacer assembly with residual pressure release valve.

Manifold Options

Type 10
Side Ported

Type 11
Bottom Ported

Plug-in Connector Connecting Base

EX500 Gateway Decentralised System (64 Points)

Series SY3000/5000/7000

How to Order Manifold

Refer to pages 208 (SY5000) and 209 (SY7000) for dimensions of Type 11/Bottom ported type.

1 Series

3	SY3000
5	SY5000
7	SY7000

*: For mixed mounting, refer to page 213 and later.

2 Type

10	Side ported
11	Bottom ported*1

*1: The SY5000 manifold base is used for the bottom ported of the SY3000. When ordering, refer to "Plug-in Mixed Mounting Type Manifold" (from page 213).

*: When mixing top ported configurations, select from page 160. In this case, use caution as there is also output on the A and B port on base side. Specify on a manifold specification sheet if plugs are required on the A and B port on base side.

3 SI Unit (Number of outputs, Output polarity, Max. number of valve stations)

0	Without SI Unit
A2	16 outputs, Positive common*1, 1 to 18 stations (16 stations)*2
A2N	16 outputs, Negative common*1, 1 to 18 stations (16 stations)*2

*1: Ensure a match with the common specification of the valve to be used.

*2: (): Maximum number of stations for mixed single and double wiring.

4 Valve stations

Stations	Note
02	2 stations
⋮	⋮
08	8 stations
02	2 stations
⋮	⋮
16	16 stations

*1: Double wiring: 2-position single, double, 3-position and 4-position valves can be used on all manifold stations.

Use of a 2-position single solenoid will result in an unused control signal. If this is not desired, order with a specified layout.

*2: Specified layout: Indicate the wiring specifications on the manifold specification sheet. (Note that 2-position double, 3-position and 4-position valves cannot be used where single wiring has been specified.)

*: When the product without the SI Unit (S0) is selected, note the maximum number of solenoids of the SI Unit that will be mounted. If the layout is specified, indicate it on the manifold specification sheet.

*: This also includes the number of blanking plate assembly.

How to Order Manifold Assembly

Example (SS5Y3-10SA2-□)

SS5Y3-10SA2-05D-C6... 1 set (Type 10 5-station manifold base part no.)
 *SY3100-5U1..... 3 sets (2-position single part no.)
 *SY3200-5U1..... 1 set (2-position double part no.)
 *SY3300-5U1..... 1 set (3-position closed centre part no.)

The asterisk denotes the symbol for assembly. Prefix it to the part numbers of the valve etc.

• The valve arrangement is numbered as the 1st station from the D side.
 • Under the manifold part number, state the valves to be mounted in order from the 1st station as shown in the figure above. If the arrangement becomes complicated, specify on a manifold specification sheet.

5 P, E port entry

U	U side (2 to 10 stations)
D	D side (2 to 10 stations)
B	Both sides (2 to 16 stations)

6 SUP/EXH block assembly

—	Internal pilot
S	Internal pilot, Built-in silencer
R	External pilot

*: 3/5(E) port is plugged for the built-in silencer type.

*: When the built-in silencer type is used, keep the exhaust port from coming in direct contact with water or other liquids.

*: A separate GW Unit and communication cable are required.

For details about the EX500 Gateway-type Serial Transmission System, refer to the WEB catalogue on SMC website www.smc.eu and the Operation Manual. For details about part numbers of SI Units to be mounted, refer to page 236 in this catalogue. Please download the Operation Manual via SMC website, <http://www.smc.eu>

*1: Indicate the sizes on the manifold specification sheet.

*2: To avoid interference with the body or piping, select downward elbow port when mounting the optional spacer assembly (pages 250 to 252).

*3: The direction of P, E port fittings is the same as for A, B port. If selecting "LM", indicate it on the manifold specification sheet for the P, E port fitting direction.

8 Mounting and Option

	Mounting	Option	
		Name plate	Station number
—	Direct mounting	—	—
AA		●	●
BA		●	—
D□ ^{*1}	DIN rail mounting	—	—
A□ ^{*1}		●	●
B□ ^{*1}		●	—

*1: Refer to "DIN Rail Option" below.

*: Select the direct mounting type for Type 11 (Bottom ported).

DIN Rail Option

—	With DIN bracket, DIN rail with standard length
0	With DIN bracket, without DIN rail
3 ^{*1}	With DIN bracket, DIN rail for 3 stations
⋮	⋮
16 ^{*1}	With DIN bracket, DIN rail for 16 stations

*1: Specify a longer rail than the length of valve stations.

*: If the DIN rail must be mounted without an SI Unit, select "D0" and order the DIN rail separately. Refer to L3 of the dimensions for the DIN rail length. Refer to page 249 for the DIN rail part number.

*: Refer to page 271 for the fixation of DIN rail mounting type manifold.

How to Order Valves (With mounting screw)

Refer to page 13 for valve specifications.

Base mounted

1 Series

3	SY3000
5	SY5000
7	SY7000

2 Type of actuation

1	2-position	Single
2		Double
3	3-position	Closed centre
4		Exhaust centre
5		Pressure centre
A*1	4-position dual 3-port	N.C./N.C.
B*1		N.O./N.O.
C*1		N.C./N.O.

*1: Only rubber seal type is available for the 4-position dual 3-port valve.

3 Seal type

0	Rubber seal
1	Metal seal

4 Pilot type

—	Internal pilot
R	External pilot

5 Back pressure check valve (Built-in valve type)

—	None
H	Built-in

*: Only rubber seal type. Manifold installed type is available if the back pressure check valve is required for a valve with metal seal. Refer to page 256 for Ordering Example. However, it is not recommended to use the built-in valve type and the manifold installed type at the same time because it will reduce the flow.

*: The built-in valve type back pressure check valve is not available for the 3-position type and the SY7000.

6 Pilot valve option

—	Standard (0.7 MPa)
B	Quick response type (0.7 MPa)
K*1	High pressure type (1.0 MPa)

*1: Only metal seal type is available for the high pressure type.

7 Coil type

—	Standard
T	With power saving circuit (Continuous duty type)

*: Be sure to select the power saving circuit type when the valve is continuously energised for long periods of time.

*: Be careful of the energising time when the power saving circuit is selected. Refer to page 268 for details.

8 Rated voltage

5	24 V DC
---	---------

9 Light/surge voltage suppressor and common specification

Symbol	With light	Surge voltage suppressor	Common specification
R	—	●	Non-polar
U	●		Positive common
S	—		
Z	●		
NS	—		Negative common
NZ	●		

*: Only "Z" and "NZ" are available for with the power saving circuit. Select a valve from R, U, S or Z when the SI Unit specification is A2 (positive common). Select a valve from R, U, NS or NZ when the SI Unit specification is A2N (negative common).

10 Manual override

*: Refer to page 31 for with the safety slide locking manual override.

11 Type of mounting screw

—	Round head combination screw
B	Hexagon socket head cap screw
K	Round head combination screw (Falling-out-prevention type)
H	Hexagon socket head cap screw (Falling-out-prevention type)

*: For "K" and "H", the valve body cover has a drop prevention construction to stop the mounting screws from falling out when the valve is removed for maintenance etc.

*: **When ordering a valve individually, the base gasket is not included.**

Since the base gasket is attached to the manifold, please order the base gasket separately if it is needed for maintenance service.

Refer to page 244 for part numbers of the base gasket and mounting screw.

*: "B" and "H" cannot be selected for the individual SUP/EXH spacer assembly, interface regulator or double check spacer assembly with residual pressure release valve.

Plug-in Connector Connecting Base

EX500 Gateway Decentralised System 2 (128 Points)

Type 12
Top Ported

Series SY3000/5000/7000

How to Order Manifold

SS5Y **3** - 12S **A3N** - **05** **U** **□** - **□** **□**

①
②
③
④
⑤
⑥
⑦

Refer to pages 210 to 212 for dimensions of Type 12/Top ported type.

① Series

3	SY3000
5	SY5000
7	SY7000

*: For mixed mounting, refer to page 213 and later.

② SI Unit (Number of outputs, Output polarity, Max. number of valve stations)

0	Without SI Unit
A3N	32 outputs*1*4, 1 to 16 stations (24 stations*3), Negative common*2

- *1: 16 outputs can be set by switching the built-in setting switch.
- *2: Ensure a match with the common specification of the valve.
- *3: (): Maximum number of stations for mixed single and double wiring.
- *4: When using the SI Unit with 32 outputs, use the GW Unit compatible with the EX500 Gateway Decentralised System 2 (128 points).

③ Valve stations

Stations	Note
02	Double wiring*1
2	
∴	
16	Specified layout*2 (Available up to 32 solenoids)
02	
2	
∴	
24	24 stations

- *1: Double wiring: 2-position single, double, 3-position and 4-position valves can be used on all manifold stations. Use of a 2-position single solenoid will result in an unused control signal. If this is not desired, order with a specified layout.
- *2: Specified layout: Indicate the wiring specifications on the manifold specification sheet. (Note that 2-position double, 3-position and 4-position valves cannot be used where single wiring has been specified.)
- *3: When the product without the SI Unit (S0) is selected, note the maximum number of solenoids of the SI Unit that will be mounted. If the layout is specified, indicate it on the manifold specification sheet.
- *4: This also includes the number of blanking plate assembly.

④ P, E port entry

U*1	U side (2 to 10 stations)
D*1	D side (2 to 10 stations)
B	Both sides (2 to 24 stations)

*1: For type "S", supply/exhaust block assembly with built-in silencer, choose "U" or "D" for P, E port entry.

⑤ SUP/EXH block assembly

—	Internal pilot
S*1	Internal pilot, Built-in silencer*2
R	External pilot

- *1: For type "S", supply/exhaust block assembly with built-in silencer, choose "U" or "D" for P, E port entry. 3/5(E) port is plugged. The silencer exhaust port is located on the opposite side of P, E port entry. (Example: When the P, E port entry is D side, the silencer exhaust port is U side.)
- *2: When the built-in silencer type is used, keep the exhaust port from coming in direct contact with water or other liquids.

How to Order Manifold Assembly

Example

SS5Y3-12SA3N-05D.....1 set (Manifold base part number)
 * SY3230-5U1-C6.....5 sets (2-position double part number)
 ↳ The asterisk denotes the symbol for assembly.
 Prefix it to the part numbers of the valve etc.

- The valve arrangement is numbered as the 1st station from the D side.
- Under the manifold base part number, state the valves to be mounted in order from the 1st station as shown in the figure above. If the arrangement becomes complicated, specify on the manifold specification sheet.

⑥ P, E port size (One-touch fittings)

	SY3000	SY5000	SY7000
—	Ø 8	Ø 10	Ø 12
N*1	Ø 5/16"	Ø 3/8"	Ø 1/2"

*1: For "N", sizes are in inches.

⑦ Mounting

—	Direct mounting
D	With DIN bracket, DIN rail with standard length
D0	With DIN bracket, without DIN rail
D3*1	With DIN bracket, DIN rail for 3 stations
∴	∴
D24*1	With DIN bracket, DIN rail for 24 stations

- *1: Specify a longer rail than the length of valve stations.
- *: If the DIN rail must be mounted without an SI Unit, select "D0". Then, refer to L3 of the dimensions for the DIN rail length and order separately. Refer to page 249 for the DIN rail part number.
- *: Refer to page 271 for the fixation of DIN rail mounting type manifold.

*: A separate GW Unit and communication cable are required.

For details about the EX500 Gateway-type Serial Transmission System, refer to the WEB catalogue on SMC website www.smc.eu and the Operation Manual. For details about part numbers of SI Units to be mounted, refer to page 235 in this catalogue. Please download the Operation Manual via SMC website, <http://www.smc.eu>

How to Order Valves (With mounting screw)

Refer to page 13 for valve specifications.

1 Series

3	SY3000
5	SY5000
7	SY7000

2 Type of actuation

1	2-position	Single
2		Double
3	3-position	Closed centre
4		Exhaust centre
5		Pressure centre
A*1	4-position dual 3-port valve	N.C./N.C.
B*1		N.O./N.O.
C*1		N.C./N.O.

*1: Select the rubber seal type for the 4-position dual 3-port valve.

3 Seal type

0	Rubber seal
1	Metal seal

4 Pilot type

—	Internal pilot
R	External pilot

5 Back pressure check valve (Built-in valve type)

—	None
H*1	Built-in

*1: Select the rubber seal type when the back pressure check valve is built-in. Manifold installed type is available if the back pressure check valve is required for a valve with metal seal. For ordering example, refer to page 256. However, it is not recommended to use the built-in valve type and the manifold installed type at the same time because it will reduce the flow.

*: Select "—" for 3-position type and the SY7000.

6 Pilot valve option

—	Standard (0.7 MPa)
B	Quick response type (0.7 MPa)
K*1	High pressure type (1.0 MPa)

*1: Select the metal seal type for high pressure type.

7 Coil type

—	Standard
T	With power saving circuit (Continuous duty type)*1*2

*1: Be sure to select the power saving circuit type when the valve is continuously energised for long periods of time.

*2: Be careful of the energising time when the power saving circuit is selected. For details, refer to page 268.

8 Rated voltage

5	24 V DC
---	---------

9 Light/surge voltage suppressor and common specification

	With light	Surge voltage suppressor	Common specification
R	—	●	Non-polar
U	●		
NS	—		Negative common
NZ	●		

*: Select "NZ" for with the power saving circuit.

10 Manual override

*: Refer to page 31 for with the safety slide locking manual override.

11 A, B port size

Thread piping	Port size	SY3000	SY5000	SY7000
		M5	M5 x 0.8	●
O1	1/8	—	●	—
O2	1/4	—	—	●

One-touch fitting (Metric)

A, B port	SY3000	SY5000	SY7000
	C2	●	—
C3	●	—	—
C4	●	●	—
C6	●	●	●
C8	—	●	●
C10	—	—	●
C12	—	—	●

One-touch fitting (Inch)

A, B port	SY3000	SY5000	SY7000
	N1	●	—
N3	●	●	—
N7	●	●	●
N9	—	●	●
N11	—	—	●

12 A, B port thread type

—	Rc
F	G
N	NPT
T	NPTF

*: Select "—" for M5.

13 Type of mounting screw

—	Round head combination screw
B	Hexagon socket head cap screw
K	Round head combination screw (Falling-out-prevention type*1)
H	Hexagon socket head cap screw (Falling-out-prevention type*1)

*1: For "K" and "H", the valve body cover has a drop prevention construction to stop the mounting screws from falling out when the valve is removed for maintenance etc.

*: **When ordering a valve individually, the base gasket is not included.**

Since the base gasket is attached to the manifold, please order the base gasket separately if it is needed for maintenance service.

Refer to page 244 for part numbers of the base gasket and mounting screw.

*: Select "—" or "K" for the optional individual SUP/EXH spacer assembly or interface regulator.

Plug-in Connector Connecting Base

EX500 Gateway Decentralised System (64 Points)

Type 12
Top Ported

Series SY3000/5000/7000

How to Order Manifold

SS5Y **3** - 12S **A2** - **05** **U** **□** - **□** **□**

①
②
③
④
⑤
⑥
⑦

Refer to pages 210 to 212 for dimensions of Type 12/Top ported type.

① Series

3	SY3000
5	SY5000
7	SY7000

*: For mixed mounting, refer to page 213 and later.

② SI Unit (Number of outputs, Output polarity, Max. number of valve stations)

0	Without SI Unit
A2	16 outputs, Positive common*1, 1 to 8 stations (16 stations)*2
A2N	16 outputs, Negative common*1, 1 to 8 stations (16 stations)*2

*1: Ensure a match with the common specification of the valve to be used.
*2: (): Maximum number of stations for mixed single and double wiring.

④ P, E port entry

U*1	U side (2 to 10 stations)
D*1	D side (2 to 10 stations)
B	Both sides (2 to 16 stations)

*1: ⑤ For type "S", supply/exhaust block assembly with built-in silencer, choose U or D for P port entry.

⑤ SUP/EXH block assembly

—	Internal pilot
S	Internal pilot/Built-in silencer
R	External pilot

*: For built-in silencer type, P and E ports are available on U and D sides. 3/5(E) port is plugged. The silencer exhaust port is located on the opposite side of P, E port entry. (Example: When the P, E port entry is D side, the silencer exhaust port is U side.)
*: When the built-in silencer type is used, keep the exhaust port from coming in direct contact with water or other liquids.

③ Valve stations

Symbol	Stations	Note
02	2 stations	Double wiring*1
⋮	⋮	
08	8 stations	Specified layout*2 (Available up to 16 solenoids)
02	2 stations	
⋮	⋮	
16	16 stations	

*1: Double wiring: 2-position single, double, 3-position and 4-position valves can be used on all manifold stations. Use of a 2-position single solenoid will result in an unused control signal. If this is not desired, order with a specified layout.
*2: Specified layout: Indicate the wiring specifications on the manifold specification sheet. (Note that 2-position double, 3-position and 4-position valves cannot be used where single wiring has been specified.)
*: When the product without the SI Unit (S0) is selected, note the maximum number of solenoids of the SI Unit that will be mounted. If the layout is specified, indicate it on the manifold specification sheet.
*: This also includes the number of blanking plate assembly.

How to Order Manifold Assembly

Example (SS5Y3-12SA2-□)

SS5Y3-12SA2-05D ... 1 set (Type 12 5-station manifold base part no.)
*SY3130-5U1-C6 3 sets (2-position single part no.)
*SY3230-5U1-C6 1 set (2-position double part no.)
*SY3330-5U1-C6 1 set (3-position closed centre part no.)
The asterisk denotes the symbol for assembly. Prefix it to the part numbers of the valve etc.

• The valve arrangement is numbered as the 1st station from the D side.
• Under the manifold part number, state the valves to be mounted in order from the 1st station as shown in the figure above. If the arrangement becomes complicated, specify on a manifold specification sheet.

⑥ P, E port size (One-touch fittings)

Symbol	SY3000	SY5000	SY7000
—	∅ 8	∅ 10	∅ 12
N	∅ 5/16"	∅ 3/8"	∅ 1/2"

*: For N, sizes are in inches.

⑦ Mounting

—	Direct mounting
D	With DIN bracket, DIN rail with standard length
D0	With DIN bracket, without DIN rail
D3*1	With DIN bracket, DIN rail for 3 stations
⋮	⋮
D16*1	With DIN bracket, DIN rail for 16 stations

*1: Specify a longer rail than the length of valve stations.
*: If the DIN rail must be mounted without an SI Unit, select "D0". Then, refer to L3 of the dimensions for the DIN rail length and order separately. Refer to page 249 for the DIN rail part number.
*: Refer to page 271 for the fixation of DIN rail mounting type manifold.

*: A separate GW Unit and communication cable are required.

For details about the EX500 Gateway-type Serial Transmission System, refer to the WEB catalogue on SMC website www.smc.eu and the Operation Manual. For details about part numbers of SI Units to be mounted, refer to page 236 in this catalogue. Please download the Operation Manual via SMC website, <http://www.smc.eu>

How to Order Valves (With mounting screw) Refer to page 13 for valve specifications.

1 Series

3	SY3000
5	SY5000
7	SY7000

2 Type of actuation

1	2-position	Single
2		Double
3	3-position	Closed centre
4		Exhaust centre
5		Pressure centre
A*1	4-position dual 3-port	N.C./N.C.
B*1		N.O./N.O.
C*1		N.C./N.O.

*1: Only rubber seal type is available for the 4-position dual 3-port valve.

3 Seal type

0	Rubber seal
1	Metal seal

4 Pilot type

—	Internal pilot
R	External pilot

5 Back pressure check valve (Built-in valve type)

—	None
H	Built-in

*: Only rubber seal type. Manifold installed type is available if the back pressure check valve is required for a valve with metal seal. Refer to page 256 for Ordering Example. However, it is not recommended to use the built-in valve type and the manifold installed type at the same time because it will reduce the flow.
 *: The built-in valve type back pressure check valve is not available for the 3-position type and the SY7000.

6 Pilot valve option

—	Standard (0.7 MPa)
B	Quick response type (0.7 MPa)
K*1	High pressure type (1.0 MPa)

*1: Only metal seal type is available for the high pressure type.

7 Coil type

—	Standard
T	With power saving circuit (Continuous duty type)

*: Be sure to select the power saving circuit type when the valve is continuously energised for long periods of time.
 *: Be careful of the energising time when the power saving circuit is selected. Refer to page 268 for details.

8 Rated voltage

5	24 V DC
---	---------

9 Light/surge voltage suppressor and common specification

Symbol	With light	Surge voltage suppressor	Common specification
R	—	●	Non-polar
U	●		
S	—		Positive common
Z	●		
NS	—	Negative common	
NZ	●		

*: Select "Z" or "NZ" for with the power saving circuit. Select a valve from R, U, S or Z when the SI Unit specification is A2 (positive common). Select a valve from R, U, NS or NZ when the SI Unit specification is A2N (negative common).

10 Manual override

*: Refer to page 31 for with the safety slide locking manual override.

11 A, B port size

Thread piping

Symbol	Port size	Applicable series
M5	M5 x 0.8	SY3000

Plug-in Connector Connecting Base

EX600

Series SY3000/5000/7000

How to Order Manifold

Refer to pages 208 (SY5000) and 209 (SY7000) for dimensions of Type 11/Bottom ported type.

1 Series

3	SY3000
5	SY5000
7	SY7000

2 Type

10	Side ported
11	Bottom ported*1

*1: The SY5000 manifold base is used for the bottom ported of the SY3000. When ordering, refer to "Plug-in Mixed Mounting Type Manifold" (from page 213).

3 SI Unit

0	Without SI Unit
Q	DeviceNet™
N	PROFIBUS DP
V	CC-Link
ZE	EtherNet/IP™ (1 port)
EA	EtherNet/IP™ (2 ports)
D	EtherCAT®
F	PROFINET
WE	EtherNet/IP™ compatible wireless base *1
WF	PROFINET compatible wireless base *1
WS	Wireless remote *1

*1 The wireless system is suitable for use only in a country where it is in accordance with the Radio Act and regulations of that country.

*: I/O Unit cannot be mounted without SI Unit.

*: Valve plate which connects manifold and SI Unit is not mounted to a valve without SI Unit. Refer to the EX600 catalogue (CAT.EU02-24E-UK) for mounting.

4 SI Unit output polarity, end plate type

SI Unit output polarity	Power supply with M12 connector	Power supply with 7/8 inch connector	Power supply with M12 connector. IN/OUT pin arrangement 1	Power supply with M12 connector. IN/OUT pin arrangement 2
Without SI Unit	—			
SI Unit positive common	2	3	6	8
SI Unit negative common	4	5	7	9

*: Ensure a match with the common specification of the valve to be used.

*: Without SI Unit, the symbol is —.

5 I/O Unit stations

—	None
1	1 station
⋮	⋮
9	9 stations

*: Without SI Unit, the symbol is —.

*: SI Unit is not included in I/O Unit stations.

*: When I/O Unit is selected, it is shipped separately, and assembled by users. Refer to the attached operation manual for mounting.

6 Valve stations

Symbol	Stations	Note
02	2 stations	Double wiring*1
⋮	⋮	
16	16 stations	
02	2 stations	Specified layout*2 (Available up to 32 solenoids)
⋮	⋮	
24	24 stations	

*1: Double wiring: 2-position single, double, 3-position and 4-position valves can be used on all manifold stations. Use of a 2-position single solenoid will result in an unused control signal. If this is not desired, order with a specified layout.

*2: Specified layout: Indicate the wiring specifications on the manifold specification sheet. (Note that 2-position double, 3-position and 4-position valves cannot be used where single wiring has been specified.)

*: This also includes the number of blanking plate assembly.

9 Mounting and Option

Symbol	Mounting	Option	
		Name plate	Station number
—	Direct mounting	—	—
AA		●	●
BA		●	—
D□	DIN rail mounting	—	—
A□		●	●
B□		●	—

*: Enter the number of stations inside □ when it is larger than the number of valve stations. (Refer to "DIN Rail Option" below.)

*: Only direct mounting is available for Type 11 (Bottom ported).

*: Refer to page 271 for the fixation of DIN rail mounting type manifold.

DIN Rail Option

—		Direct mounting
0	Without DIN rail (with bracket)	
3	For 3 stations	Specify a longer rail than the total length of specified stations.
⋮	⋮	
24	For 24 stations	

*: If the DIN rail must be mounted without an SI Unit, select D0. Then, refer to L3 of the dimensions for the DIN rail length and order separately. (Refer to page 249 for the DIN rail part number.)

7 P, E port entry, SUP/EXH block assembly

P, E port entry	Internal pilot	Internal pilot, Built-in silencer	External pilot
U side (2 to 10 stations)	U	C	G
D side (2 to 10 stations)	D	E	H
Both sides (2 to 24 stations)	B	F	J

*: 3/5(E) port is plugged for the built-in silencer type.

*: When the built-in silencer type is used, keep the exhaust port from coming in direct contact with water or other liquids.

Refer to the page on the right for 8.

For details about the EX600 Integrated-type (For Input/Output) Serial Transmission System, refer to the WEB catalogue on SMC website www.smc.eu and the Operation Manual. For details about part numbers of SI Units to be mounted, refer to pages 237 and 238 in this catalogue. (IP40 specifications may be required according to the I/O Unit to be selected.) Please download the Operation Manual via SMC website, <http://www.smc.eu>

A, B port size (Inch/One-touch fitting)

Symbol	A, B port	Type 10/Side ported			Type 11/Bottom ported	
		SY3000	SY5000	SY7000	SY5000	SY7000
N1	∅ 1/8"	●	—	—	—	—
N3	∅ 5/32"	●	●	—	●	—
N7	∅ 1/4"	●	●	●	●	●
N9	∅ 5/16"	—	●	●	●	●
N11	∅ 3/8"	—	—	●	—	●
CM*1	Straight port, mixed sizes	●	●	●	●	●
LN3	∅ 5/32"	●	—	—	—	—
LN7	∅ 1/4"	●	●	—	—	—
LN9	∅ 5/16"	—	●	—	—	—
LN11	∅ 3/8"	—	—	●	—	—
BN3	∅ 5/32"	●	—	—	—	—
BN7	∅ 1/4"	●	●	—	—	—
BN9	∅ 5/16"	—	●	—	—	—
BN11	∅ 3/8"	—	—	●	—	—
LM*1	Elbow port, mixed sizes (Including upward and downward piping)	●	●	●	—	—
P, E port size (One-touch fittings)		∅ 5/16"	∅ 3/8"	∅ 1/2"	∅ 3/8"	∅ 1/2"

*1: Indicate the sizes on the manifold specification sheet in the case of "CM", "LM".

The direction of P, E port fittings is the same as for A, B port. If selecting "LM", indicate it on the manifold specification sheet for the P, E port fitting direction.

*2: To avoid interference with the body or piping, select downward elbow port when mounting the optional spacer assembly (pages 250 to 252).

How to Order Manifold Assembly

Example (SS5Y3-10S6□-□)

SS5Y3-10S6Q42-05B-C6... 1 set (Type 10 5-station manifold base part no.)

*SY3100-5U1 3 sets (2-position single part no.)

*SY3200-5U1 2 sets (2-position double part no.)

*EX600-DXPD 1 set I/O Unit part number (Station 1)

*EX600-DYPB 1 set I/O Unit part number (Station 2)

The asterisk denotes the symbol for assembly. Prefix it to the part numbers of the valve etc.

- The valve arrangement is numbered as the 1st station from the D side.
- Under the manifold part number, state the valves to be mounted, then the I/O Units in order from the 1st station as shown in the figure on the left. If the arrangement becomes complicated, specify on a manifold specification sheet.

*1: Do not enter the SI Unit part number and the end plate part number together.

*2: When mixing top ported configurations, select from page 172. In this case, use caution as there is also output on the A and B port on base side. Specify on a manifold specification sheet if plugs are required on the A and B port on base side.

How to Order Valves (With mounting screw)

Refer to page 13 for valve specifications.

• Base mounted

1 Series

3	SY3000
5	SY5000
7	SY7000

2 Type of actuation

1	2-position	Single
2		Double
3	3-position	Closed centre
4		Exhaust centre
5		Pressure centre
A*1	4-position dual 3-port	N.C./N.C.
B*1		N.O./N.O.
C*1		N.C./N.O.

*1: Only rubber seal type is available for the 4-position dual 3-port valve.

3 Seal type

0	Rubber seal
1	Metal seal

4 Pilot type

—	Internal pilot
R	External pilot

5 Back pressure check valve (Built-in valve type)

—	None
H	Built-in

*: Only rubber seal type. Manifold installed type is available if the back pressure check valve is required for a valve with metal seal. Refer to page 256 for Ordering Example. However, it is not recommended to use the built-in valve type and the manifold installed type at the same time because it will reduce the flow.

*: The built-in valve type back pressure check valve is not available for the 3-position type and the SY7000.

6 Pilot valve option

—	Standard (0.7 MPa)
B	Quick response type (0.7 MPa)
K*1	High pressure type (1.0 MPa)

*1: Only metal seal type is available for the high pressure type.

7 Coil type

—	Standard
T	With power saving circuit (Continuous duty type)

*: Be sure to select the power saving circuit type when the valve is continuously energised for long periods of time.

*: Be careful of the energising time when the power saving circuit is selected. Refer to page 268 for details.

8 Rated voltage

5	24 V DC
---	---------

9 Light/surge voltage suppressor and common specification

Symbol	With light	Surge voltage suppressor	Common specification
R	—	●	Non-polar
U	●		
S	—		Positive common
Z	●		
NS	—		
NZ	●		

*: Select a valve from R, U, S or Z when the SI Unit polarity is positive common. Select a valve from R, U, NS or NZ when the SI Unit output polarity is negative common.

*: Only "Z" and "NZ" types are available for with the power saving circuit.

10 Manual override

*: Refer to page 31 for with the safety slide locking manual override.

11 Type of mounting screw

—	Round head combination screw
B	Hexagon socket head cap screw
K	Round head combination screw (Falling-out-prevention type)
H	Hexagon socket head cap screw (Falling-out-prevention type)

*: For "K" and "H", the valve body cover has a drop prevention construction to stop the mounting screws from falling out when the valve is removed for maintenance etc.

*: **When ordering a valve individually, the base gasket is not included.**

Since the base gasket is attached to the manifold, please order the base gasket separately if it is needed for maintenance service.

Refer to page 244 for part numbers of the base gasket and mounting screw.

*: "B" and "H" cannot be selected for the individual SUP/EXH spacer assembly, interface regulator or double check spacer assembly with residual pressure release valve.

Dimensions: Series **SY3000**

Plug-in Connector Connecting Base

Series SY3000/5000/7000

RoHS

How to Order Manifold

Refer to pages 210 to 212 for dimensions of Type 12/Top ported type.

1 Series

3	SY3000
5	SY5000
7	SY7000

2 SI Unit output polarity, end plate type

SI Unit output polarity	Power supply with M12 connector	Power supply with 7/8 inch connector	Power supply with M12 connector. IN/OUT pin arrangement 1	Power supply with M12 connector. IN/OUT pin arrangement 2
Without SI Unit	—			
SI Unit positive common	2	3	6	8
SI Unit negative common	4	5	7	9

*: Ensure a match with the common specification of the valve to be used.
*: Without SI Unit, the symbol is —.

5 Valve stations

Symbol	Stations	Note
02	2 stations	Double wiring*1
⋮	⋮	
16	16 stations	
02	2 stations	Specified layout*2 (Available up to 32 solenoids)
⋮	⋮	
24	24 stations	

*1: Double wiring: 2-position single, double, 3-position and 4-position valves can be used on all manifold stations. Use of a 2-position single solenoid will result in an unused control signal. If this is not desired, order with a specified layout.
*2: Specified layout: Indicate the wiring specifications on the manifold specification sheet. (Note that 2-position double, 3-position and 4-position valves cannot be used where single wiring has been specified.)
*: This also includes the number of blanking plate assembly.

2 SI Unit

0	Without SI Unit
Q	DeviceNet™
N	PROFIBUS DP
V	CC-Link
ZE	EtherNet/IP™ (1 port)
EA	EtherNet/IP™ (2 ports)
D	EtherCAT®
F	PROFINET
WE	EtherNet/IP™ compatible wireless base *1
WF	PROFINET compatible wireless base *1
WS	Wireless remote *1

*1 The wireless system is suitable for use only in a country where it is in accordance with the Radio Act and regulations of that country.
*: I/O Unit cannot be mounted without SI Unit.
*: Valve plate which connects manifold and SI Unit is not mounted to a valve without SI Unit. Refer to the EX600 catalogue (CAT.EU02-24E-UK) for mounting.

4 I/O Unit stations

—	None
1	1 station
⋮	⋮
9	9 stations

*: Without SI Unit, the symbol is —.
*: SI Unit is not included in I/O Unit stations.
*: When I/O Unit is selected, it is shipped separately, and assembled by users. Refer to the attached operation manual for mounting.

6 P, E port entry, SUP/EXH block assembly

P, E port entry	Internal pilot	Internal pilot, Built-in silencer	External pilot
U side (2 to 10 stations)	U	C*1	G
D side (2 to 10 stations)	D	E*1	H
Both sides (2 to 24 stations)	B	—	J

*1: For SUP/EXH block assembly specifications, built-in silencer types will have P port entry stipulated.
*: For built-in silencer type, P and E ports are available on U and D sides. 3/5(E) port is plugged. The silencer exhaust port is located on the opposite side of P, E port entry. (Example: When the P, E port entry is D side, the silencer exhaust port is U side.)
*: When the built-in silencer type is used, keep the exhaust port from coming in direct contact with water or other liquids.

7 P, E port size (One-touch fittings)

Symbol	SY3000	SY5000	SY7000
—	∅ 8	∅ 10	∅ 12
N	∅ 5/16"	∅ 3/8"	∅ 1/2"

*: For N, sizes are in inches.

8 Mounting

—	Direct mounting
D	DIN rail mounting (With DIN rail)
D0	DIN rail mounting (Without DIN rail)
D3	For 3 stations
⋮	⋮
D24	For 24 stations

Specify a longer rail than the standard length.

*: When it is necessary to mount a DIN rail without an SI Unit, select D0 and order DIN rail length separately, referring to L3 in the dimensions. (Refer to page 249 for part numbers of DIN rail.)
*: Refer to page 271 for the fixation of DIN rail mounting type manifold.

How to Order Manifold Assembly

Example (SS5Y3-12S6□-□)

SS5Y3-12S6Q42-05B 1 set (Type 12 5-station manifold base part no.)
*SY3130-5U1-C6 3 sets (2-position single part no.)
*SY3230-5U1-C6 2 sets (2-position double part no.)
*EX600-DXPD 1 set I/O Unit part number (Station 1)
*EX600-DYPB 1 set I/O Unit part number (Station 2)

The asterisk denotes the symbol for assembly. Prefix it to the part numbers of the valve etc.

- The valve arrangement is numbered as the 1st station from the D side.
- Under the manifold part number, state the valves to be mounted, then the I/O Units in order from the 1st station as shown in the figure above. If the arrangement becomes complicated, specify on a manifold specification sheet.
- *1: Do not enter the SI Unit part number and the end plate part number together.

For details about the EX600 Integrated-type (For Input/Output) Serial Transmission System, refer to the WEB catalogue on SMC website www.smc.eu and the Operation Manual. For details about part numbers of SI Units to be mounted, refer to pages 237 and 238 in this catalogue. (IP40 specifications may be required according to the I/O Unit to be selected.) Please download the Operation Manual via SMC website, <http://www.smc.eu>

How to Order Valves (With mounting screw) Refer to page 13 for valve specifications.

1 Series

3	SY3000
5	SY5000
7	SY7000

2 Type of actuation

1	2-position	Single
2		Double
3	3-position	Closed centre
4		Exhaust centre
5		Pressure centre
A*1	4-position dual 3-port	N.C./N.C.
B*1		N.O./N.O.
C*1		N.C./N.O.

*1: Only rubber seal type is available for the 4-position dual 3-port valve.

3 Seal type

0	Rubber seal
1	Metal seal

4 Pilot type

—	Internal pilot
R	External pilot

5 Back pressure check valve

—	None
H	Built-in

*: Only rubber seal type. Manifold installed type is available if the back pressure check valve is required for a valve with metal seal. Refer to page 256 for Ordering Example. However, it is not recommended to use the built-in valve type and the manifold installed type at the same time because it will reduce the flow.
 *: The built-in valve type back pressure check valve is not available for the 3-position type and the SY7000.

6 Pilot valve option

—	Standard (0.7 MPa)
B	Quick response type (0.7 MPa)
K*1	High pressure type (1.0 MPa)

*1: Only metal seal type is available for the high pressure type.

7 Coil type

—	Standard
T	With power saving circuit (Continuous duty type)

*: Be sure to select the power saving circuit type when the valve is continuously energised for long periods of time.
 *: Be careful of the energising time when the power saving circuit is selected. Refer to page 268 for details.

8 Rated voltage

5	24 V DC
---	---------

9 Light/surge voltage suppressor and common specification

Symbol	With light	Surge voltage suppressor	Common specification
R	—	●	Non-polar
U	●		Positive common
S	—		Negative common
Z	●		
NS	—		
NZ	●		

*: Select a valve from R, U, S or Z when the SI Unit polarity is positive common. Select a valve from R, U, NS or NZ when the SI Unit output polarity is negative common.
 *: Only "Z" and "NZ" types are available for with the power saving circuit.

10 Manual override

*: Refer to page 31 for with the safety slide locking manual override.

11 A, B port size

Thread piping

Symbol	Port size	Applicable series
M5	M5 x 0.8	SY3000
O1	1/8	SY5000
O2	1/4	SY7000

One-touch fitting (Metric)

Symbol	A, B port	SY3000	SY5000	SY7000
C2	∅ 2	●	—	—
C3	∅ 3.2	●	—	—
C4	∅ 4	●	●	—
C6	∅ 6	●	●	●
C8	∅ 8	—	●	●
C10	∅ 10	—	—	●
C12	∅ 12	—	—	●

One-touch fitting (Inch)

Symbol	A, B port	SY3000	SY5000	SY7000
N1	∅ 1/8"	●	—	—
N3	∅ 5/32"	●	●	—
N7	∅ 1/4"	●	●	●
N9	∅ 5/16"	—	●	●
N11	∅ 3/8"	—	—	●

12 Thread type

—	Rc
F	G
N	NPT
T	NPTF

*: Only — is available for M5.

13 Type of mounting screw

—	Round head combination screw
B	Hexagon socket head cap screw
K	Round head combination screw (Falling-out-prevention type)
H	Hexagon socket head cap screw (Falling-out-prevention type)

*: For "K" and "H", the valve body cover has a drop prevention construction to stop the mounting screws from falling out when the valve is removed for maintenance etc.
 *: **When ordering a valve individually, the base gasket is not included.** Since the base gasket is attached to the manifold, please order the base gasket separately if it is needed for maintenance service. Refer to page 244 for part numbers of the base gasket and mounting screw.
 *: "B" and "H" cannot be selected for the individual SUP/EXH spacer assembly or interface regulator.

 Manifold Options

Type 10
Side Ported

Type 11
Bottom Ported

Plug-in Connector Connecting Base

EX250

Series SY3000/5000/7000

How to Order Manifold

Refer to pages 208 (SY5000) and 209 (SY7000) for dimensions of Type 11/Bottom ported type.

1 Series

3	SY3000
5	SY5000
7	SY7000

2 Type

10	Side ported
11	Bottom ported*1

*1: The SY5000 manifold base is used for the bottom ported of the SY3000. When ordering, refer to "Plug-in Mixed Mounting Type Manifold" (from page 213).

4 Input block stations

—	None
1	1 station
⋮	⋮
8	8 stations

*: Without SI Unit, the symbol is —. The maximum number of stations is limited for the AS-Interface applicable SI Unit.

3 SI Unit

0	Without SI Unit	
Q	DeviceNet™ (Negative common)	
N	PROFIBUS DP (Negative common)	
V	CC-Link (Positive common)	
TA	AS-Interface (Negative common)	2 power supply systems
TB		8 in/8 out, 31 slave modes
TC		4 in/4 out, 31 slave modes
TD		1 power supply systems
TD		8 in/8 out, 31 slave modes
TD		4 in/4 out, 31 slave modes
Y	CANopen (Negative common)	
ZE	EtherNet/IP™ (Negative common)	

- *: Ensure a match with the common specification of the valve to be used.
- *: Input block cannot be mounted without SI Unit.
- *: The supply current from the SI Unit of AS-Interface applicable 1 power supply system specification to the input block and valve is limited.

5 Input block type

	PNP sensor input	NPN sensor input
Without input block	—	
M12, 2 inputs	A	D
M12, 4 inputs	B	E
M8, 4 inputs	C	F

*: Without SI Unit, the symbol is —.

6 Valve stations

Symbol	Stations	Note
02	2 stations	Double wiring*1
⋮	⋮	
16	16 stations	
02	2 stations	Specified layout*2 (Available up to 32 solenoids)
⋮	⋮	
24	24 stations	

- *1: Double wiring: 2-position single, double, 3-position and 4-position valves can be used on all manifold stations. Use of a 2-position single solenoid will result in an unused control signal. If this is not desired, order with a specified layout.
- *2: Specified layout: Indicate the wiring specifications on the manifold specification sheet. (Note that 2-position double, 3-position and 4-position valves cannot be used where single wiring has been specified.) When determining the number of valve stations, note that the maximum number of solenoids for the AS-Interface applicable SI Unit specification is as follows.
 - 8 in/8 out specification: Max. 8 solenoids
 - 4 in/4 out specification: Max. 4 solenoids
- *: This also includes the number of blanking plate assembly.
- *: For the product without the SI Unit (S0), note the maximum number of solenoids of the SI Unit that will be mounted. If the layout is specified, indicate it on the manifold specification sheet.

How to Order Manifold Assembly

Example (SS5Y3-10S□-□)

SS5Y3-10SQ1C-05D-C6... 1 set (Type 10 5-station manifold base part no.)
 *SY3100-5U1 3 sets (2-position single part no.)
 *SY3200-5U1 1 set (2-position double part no.)
 *SY3300-5U1 1 set (3-position closed centre part no.)
 ↳ The asterisk denotes the symbol for assembly. Prefix it to the part numbers of the valve etc.

- The valve arrangement is numbered as the 1st station from the D side.
- Under the manifold part number, state the valves to be mounted in order from the 1st station as shown in the figure above. If the arrangement becomes complicated, specify on a manifold specification sheet.

*: When mixing top ported configurations, select from page 180. In this case, use caution as there is also output on the A and B port on base side. Specify on a manifold specification sheet if plugs are required on the A and B port on base side.

7 P, E port entry, SUP/EXH block assembly

P, E port entry	Internal pilot	Internal pilot, Built-in silencer	External pilot
U side (2 to 10 stations)	U	C	G
D side (2 to 10 stations)	D	E	H
Both sides (2 to 24 stations)	B	F	J

- *: 3/5(E) port is plugged for the built-in silencer type.
- *: When the built-in silencer type is used, keep the exhaust port from coming in direct contact with water or other liquids.

For details about the EX250 Integrated-type (For Input/Output) Serial Transmission System, refer to the WEB catalogue on SMC website www.smc.eu and the Operation Manual. For details about part numbers of SI Units to be mounted, refer to page 239 in this catalogue. Please download the Operation Manual via SMC website, <http://www.smc.eu>

8 A, B port size (Metric/One-touch fitting)

Symbol	A, B port	Type 10/Side ported			Type 11/Bottom ported	
		SY3000	SY5000	SY7000	SY5000	SY7000

P, E port size (One-touch fittings)		∅ 5/16"	∅ 3/8"	∅ 1/2"	∅ 3/8"	∅ 1/2"

*1: Indicate the sizes on the manifold specification sheet in the case of "CM", "LM".

The direction of P, E port fittings is the same as for A, B port. If selecting "LM", indicate it on the manifold specification sheet for the P, E port fitting direction.

*2: To avoid interference with the body or piping, select downward elbow port when mounting the optional spacer assembly (pages 250 to 252).

9 Mounting and Option

Symbol	Mounting	Option	
		Name plate	Station number
—	Direct mounting	—	—
AA		●	●
BA		●	—
D□	DIN rail mounting	—	—
A□		●	●
B□		●	—

DIN Rail Option

Direct mounting	
—	Without DIN rail (with bracket)
0	For 3 stations
3	Specify a longer rail than the total length of specified stations.
⋮	⋮
24	For 24 stations

*: Enter the number of stations inside □ when it is larger than the number of valve stations. (Refer to "DIN Rail Option" above.)

*: Only direct mounting is available for Type 11 (Bottom ported).

*: Refer to page 271 for the fixation of DIN rail mounting type manifold.

*: When it is necessary to mount a DIN rail without an SI Unit, select D0 and order DIN rail length separately, referring to L3 in the dimensions. (Refer to page 249 for part numbers of DIN rail.)

How to Order Valves (With mounting screw)

Refer to page 13 for valve specifications.

• Base mounted

1 Series

3	SY3000
5	SY5000
7	SY7000

2 Type of actuation

1	2-position	Single
2		Double
3	3-position	Closed centre
4		Exhaust centre
5		Pressure centre
A*1	4-position dual 3-port	N.C./N.C.
B*1		N.O./N.O.
C*1		N.C./N.O.

*1: Only rubber seal type is available for the 4-position dual 3-port valve.

3 Seal type

0	Rubber seal
1	Metal seal

4 Pilot type

—	Internal pilot
R	External pilot

5 Back pressure check valve (Built-in valve type)

—	None
H	Built-in

*: Only rubber seal type. Manifold installed type is available if the back pressure check valve is required for a valve with metal seal. Refer to page 256 for Ordering Example. However, it is not recommended to use the built-in valve type and the manifold installed type at the same time because it will reduce the flow.

*: The built-in valve type back pressure check valve is not available for the 3-position type and the SY7000.

6 Pilot valve option

—	Standard (0.7 MPa)
B	Quick response type (0.7 MPa)
K*1	High pressure type (1.0 MPa)

*1: Only metal seal type is available for the high pressure type.

7 Coil type

—	Standard
T	With power saving circuit (Continuous duty type)

*: Be sure to select the power saving circuit type when the valve is continuously energised for long periods of time.

*: Be careful of the energising time when the power saving circuit is selected. Refer to page 268 for details.

8 Rated voltage

5	24 V DC
---	---------

9 Light/surge voltage suppressor and common specification

Symbol	With light	Surge voltage suppressor	Common specification
R	—	●	Non-polar
U	●		
S	—		Positive common
Z	●		
NS	—		
NZ	●		

*: "R" and "U" are applicable for every SI Unit. However, "S" and "Z" can be used only for CC-Link applicable Unit and "NS" and "NZ" are for Units which are not CC-Link applicable.

*: Only "Z" and "NZ" types are available for with the power saving circuit.

10 Manual override

*: Refer to page 31 for with the safety slide locking manual override.

11 Type of mounting screw

—	Round head combination screw
B	Hexagon socket head cap screw
K	Round head combination screw (Falling-out-prevention type)
H	Hexagon socket head cap screw (Falling-out-prevention type)

*: For "K" and "H", the valve body cover has a drop prevention construction to stop the mounting screws from falling out when the valve is removed for maintenance etc.

*: **When ordering a valve individually, the base gasket is not included.**

Since the base gasket is attached to the manifold, please order the base gasket separately if it is needed for maintenance service.

Refer to page 244 for part numbers of the base gasket and mounting screw.

*: "B" and "H" cannot be selected for the individual SUP/EXH spacer assembly, interface regulator or double check spacer assembly with residual pressure release valve.

How to Order Manifold

Refer to pages 210 to 212 for dimensions of Type 12/Top ported type.

SS5Y **3** - 12S **Q** **□** **□** - **05** **U** - **□** **□**

1 2 3 4 5 6 7 8

1 Series

3	SY3000
5	SY5000
7	SY7000

3 Input block stations

—	None
1	1 station
⋮	⋮
8	8 stations

*: Without SI Unit, the symbol is —. The maximum number of stations is limited for the AS-Interface applicable SI Unit.

4 Input block type

	PNP sensor input	NPN sensor input
Without input block	—	—
M12, 2 inputs	A	D
M12, 4 inputs	B	E
M8, 4 inputs	C	F

*: Without SI Unit, the symbol is —.

2 SI Unit

0	Without SI Unit	
Q	DeviceNet™ (Negative common)	
N	PROFIBUS DP (Negative common)	
V	CC-Link (Positive common)	
TA	AS-Interface (Negative common)	2 power supply systems 8 in/8 out, 31 slave modes
TB		4 in/4 out, 31 slave modes
TC		1 power supply system 8 in/8 out, 31 slave modes
TD		4 in/4 out, 31 slave modes
Y	CANopen (Negative common)	
ZE	EtherNet/IP™ (Negative common)	

- *: Ensure a match with the common specification of the valve to be used.
- *: Input block cannot be mounted without SI Unit.
- *: The supply current from the SI Unit of AS-Interface applicable 1 power supply system specification to the input block and valve is limited.

5 Valve stations

Symbol	Stations	Note
02	2 stations	Double wiring*1
⋮	⋮	
16	16 stations	
02	2 stations	Specified layout*2 (Available up to 32 solenoids)
⋮	⋮	
24	24 stations	

- *1: Double wiring: 2-position single, double, 3-position and 4-position valves can be used on all manifold stations. Use of a 2-position single solenoid will result in an unused control signal. If this is not desired, order with a specified layout.
- *2: Specified layout: Indicate the wiring specifications on the manifold specification sheet. (Note that 2-position double, 3-position and 4-position valves cannot be used where single wiring has been specified.) When determining the number of valve stations, note that the maximum number of solenoids for the AS-Interface applicable SI Unit specification is as follows.
 - 8 in/8 out specification: Max. 8 solenoids
 - 4 in/4 out specification: Max. 4 solenoids
- *: This also includes the number of blanking plate assembly.
- *: For the product without the SI Unit (S0), note the maximum number of solenoids of the SI Unit that will be mounted. If the layout is specified, indicate it on the manifold specification sheet.

How to Order Manifold Assembly

Example (SS5Y3-12S□-□)

SS5Y3-12SQ1C-05D ... 1 set (Type 12 5-station manifold base part no.)
 *SY3130-5U1-C6 3 sets (2-position single part no.)
 *SY3230-5U1-C6 1 set (2-position double part no.)
 *SY3330-5U1-C6 1 set (3-position closed centre part no.)

↳ The asterisk denotes the symbol for assembly. Prefix it to the part numbers of the valve etc.

- The valve arrangement is numbered as the 1st station from the D side.
- Under the manifold part number, state the valves to be mounted in order from the 1st station as shown in the figure above. If the arrangement becomes complicated, specify on a manifold specification sheet.

6 P, E port entry, SUP/EXH block assembly

P, E port entry	Internal pilot	Internal pilot, Built-in silencer	External pilot
U side (2 to 10 stations)	U	C*1	G
D side (2 to 10 stations)	D	E*1	H
Both sides (2 to 24 stations)	B	—	J

- *1: For SUP/EXH block assembly specifications, built-in silencer types will have P port entry stipulated.
- *: For built-in silencer type, P and E ports are available on U and D sides. 3/5(E) port is plugged. The silencer exhaust port is located on the opposite side of P, E port entry. (Example: When the P, E port entry is D side, the silencer exhaust port is U side.)
- *: When the built-in silencer type is used, keep the exhaust port from coming in direct contact with water or other liquids.

7 P, E port size (One-touch fittings)

Symbol	SY3000	SY5000	SY7000
—	∅ 8	∅ 10	∅ 12
N	∅ 5/16"	∅ 3/8"	∅ 1/2"

*: For N, sizes are in inches.

8 Mounting

—	Direct mounting
D	DIN rail mounting (With DIN rail)
D0	DIN rail mounting (Without DIN rail)
D3	For 3 stations Specify a longer rail than the standard length.
⋮	⋮
D24	For 24 stations

- *: If the DIN rail must be mounted without an SI Unit, select D0. Then, refer to L3 of the dimensions for the DIN rail length and order separately. (Refer to page 249 for the DIN rail part number.)
- *: Refer to page 271 for the fixation of DIN rail mounting type manifold.

For details about the EX250 Integrated-type (For Input/Output) Serial Transmission System, refer to the WEB catalogue on SMC website www.smc.eu and the Operation Manual. For details about part numbers of SI Units to be mounted, refer to page 239 in this catalogue. Please download the Operation Manual via SMC website, <http://www.smc.eu>

How to Order Valves (With mounting screw)

Refer to page 13 for valve specifications.

1 Series

3	SY3000
5	SY5000
7	SY7000

2 Type of actuation

1	2-position	Single
2		Double
3	3-position	Closed centre
4		Exhaust centre
5		Pressure centre
A*1	4-position dual 3-port	N.C./N.C.
B*1		N.O./N.O.
C*1		N.C./N.O.

*1: Only rubber seal type is available for the 4-position dual 3-port valve.

3 Seal type

0	Rubber seal
1	Metal seal

4 Pilot type

—	Internal pilot
R	External pilot

5 Back pressure check valve (Built-in valve type)

—	None
H	Built-in

*: Only rubber seal type. Manifold installed type is available if the back pressure check valve is required for a valve with metal seal. Refer to page 256 for Ordering Example. However, it is not recommended to use the built-in valve type and the manifold installed type at the same time because it will reduce the flow.
*: The built-in valve type back pressure check valve is not available for the 3-position type and the SY7000.

6 Pilot valve option

—	Standard (0.7 MPa)
B	Quick response type (0.7 MPa)
K*1	High pressure type (1.0 MPa)

*1: Only metal seal type is available for the high pressure type.

7 Coil type

—	Standard
T	With power saving circuit (Continuous duty type)

*: Be sure to select the power saving circuit type when the valve is continuously energised for long periods of time.

*: Be careful of the energising time when the power saving circuit is selected. Refer to page 268 for details.

8 Rated voltage

5	24 V DC
---	---------

9 Light/surge voltage suppressor and common specification

Symbol	With light	Surge voltage suppressor	Common specification
R	—	●	Non-polar
U	●		Positive common
S	—		Negative common
Z	●		
NS	—		
NZ	●		

*: "R" and "U" are applicable for every SI Unit. However, "S" and "Z" can be used only for CC-Link applicable Unit and "NS" and "NZ" are for Units which are not CC-Link applicable.

*: Only "Z" and "NZ" types are available for with the power saving circuit.

10 Manual override

*: Refer to page 31 for with the safety slide locking manual override.

11 A, B port size

Thread piping

Symbol	Port size	Applicable series
M5	M5 x 0.8	SY3000
O1	1/8	SY5000
O2	1/4	SY7000

One-touch fitting (Metric)

Symbol	A, B port	SY3000	SY5000	SY7000
C2	Ø 2	●	—	—
C3	Ø 3.2	●	—	—
C4	Ø 4	●	●	—
C6	Ø 6	●	●	●
C8	Ø 8	—	●	●
C10	Ø 10	—	—	●
C12	Ø 12	—	—	●

One-touch fitting (Inch)

Symbol	A, B port	SY3000	SY5000	SY7000
N1	Ø 1/8"	●	—	—
N3	Ø 5/32"	●	●	—
N7	Ø 1/4"	●	●	●
N9	Ø 5/16"	—	●	●
N11	Ø 3/8"	—	—	●

12 Thread type

—	Rc
F	G
N	NPT
T	NPTF

*: Only — is available for M5.

13 Type of mounting screw

—	Round head combination screw
B	Hexagon socket head cap screw
K	Round head combination screw (Falling-out-prevention type)
H	Hexagon socket head cap screw (Falling-out-prevention type)

*: For "K" and "H", the valve body cover has a drop prevention construction to stop the mounting screws from falling out when the valve is removed for maintenance etc.

*: **When ordering a valve individually, the base gasket is not included.**

Since the base gasket is attached to the manifold, please order the base gasket separately if it is needed for maintenance service.

Refer to page 244 for part numbers of the base gasket and mounting screw.

*: "B" and "H" cannot be selected for the individual SUP/EXH spacer assembly or interface regulator.

EX260

Series SY3000/5000/7000

How to Order Manifold

Refer to pages 208 (SY5000) and 209 (SY7000) for dimensions of Type 11/Bottom ported type.

1 Series

3	SY3000
5	SY5000
7	SY7000

2 Type

10	Side ported
11	Bottom ported*1

*1: The SY5000 manifold base is used for the bottom ported of the SY3000. When ordering, refer to "Plug-in Mixed Type Manifold" (from page 213).

3 SI Unit specifications

(output polarity, protocol, number of outputs, communication connector)

Symbol (output polarity)		Protocol	Number of outputs	Communication connector
Positive common (NPN)	Negative common (PNP)			
0*1		Without SI unit		
QA	QAN	DeviceNet™	32	M12
QB	QBN		16	
NA	NAN	PROFIBUS DP	32	M12
NB	NBN		16	
NC	NCN		32	
ND	NDN		16	
VA	VAN	CC-Link	32	M12
VB	VBN		16	
DA	DAN	EtherCAT	32	M12
DB	DBN		16	
FA	FAN	PROFINET	32	M12
FB	FBN		16	
EA	EAN	EtherNet/IP™	32	M12
EB	EBN		16	
—*3	GAN	EtherNet POWERLINK	32	M12
—*3	GBN		16	

*1 Without SI unit, the output polarity is decided by the SI unit used.

Ensure a match with the common specification of the valves to be used.

*2 DIN rail cannot be mounted without SI Unit.

*3 Positive common (NPN) type is not applicable.

*4 IP40 for the D-sub applicable communication connector specification.

4 Valve stations

In the case of the 32-output SI Unit

Symbol	Stations	Note
02	2 stations	Double wiring*1
⋮	⋮	
16	16 stations	Specified layout*2 (Available up to 32 solenoids)
02	2 stations	
⋮	⋮	
24	24 stations	

In the case of the 16-output SI Unit

Symbol	Stations	Note
02	2 stations	Double wiring*1
⋮	⋮	
08	8 stations	Specified layout*2 (Available up to 16 solenoids)
02	2 stations	
⋮	⋮	
16	16 stations	

*1: Double wiring: 2-position single, double, 3-position and 4-position valves can be used on all manifold stations.

Use of a 2-position single solenoid will result in an unused control signal. If this is not desired, order with a specified layout

*2: Specified layout: Indicate the wiring specifications on the manifold specification sheet.
(Note that 2-position double, 3-position and 4-position valves cannot be used where single wiring has been specified.)

*: This also includes the number of blanking plate assembly.

*: For the model without the SI Unit (S0), note the maximum number of solenoids of the SI Unit that will be mounted. If the layout is specified, indicate it on the manifold specification sheet.

5 P, E port entry

U	U side (2 to 10 stations)
D	D side (2 to 10 stations)
B	Both sides (2 to 24 stations)

6 SUP/EXH block assembly

—	Internal pilot
S	Internal pilot, Built-in silencer
R	External pilot

*: 3/5(E) port is plugged for the built-in silencer type.

*: When the built-in silencer type is used, keep the exhaust port from coming in direct contact with water or other liquids.

Refer to the page on the right for 7.

8 Mounting and Option

Symbol	Mounting	Option	
		Name plate	Station number
—	Direct mounting	—	—
AA		●	●
BA	DIN rail mounting	—	—
D□		—	—
A□		●	●
B□		●	—

*: Enter the number of stations inside □ when it is larger than the number of valve stations. (Refer to "DIN Rail Option" below.)

*: Only direct mounting is available for Type 11 (Bottom ported).

*: Refer to page 271 for the fixation of DIN rail mounting type manifold.

DIN Rail Option

—	Standard length	
0	Without DIN rail (with bracket)	
3	For 3 stations	Specify a longer rail than the total length of specified stations.
⋮	⋮	
24	For 24 stations	

*: When it is necessary to mount a DIN rail without an SI Unit, select D0 and order DIN rail length separately, referring to L3 in the dimensions. (Refer to page 249 for part numbers of DIN rail.)

For details about the EX260 Integrated-type (For Output) Serial Transmission System, refer to the WEB catalogue on SMC website www.smc.eu and the Operation Manual. For details about part numbers of SI Units to be mounted, refer to page 240 in this catalogue. Please download the Operation Manual via SMC website, <http://www.smc.eu>

A, B port size (Inch/One-touch fitting)

Symbol	A, B port	Type 10/Side ported			Type 11/Bottom ported	
		SY3000	SY5000	SY7000	SY5000	SY7000
N1	∅ 1/8"	●	—	—	—	—
N3	∅ 5/32"	●	●	—	●	—
N7	∅ 1/4"	●	●	●	●	●
N9	∅ 5/16"	—	●	●	●	●
N11	∅ 3/8"	—	—	●	—	●
CM*1	Straight port, mixed sizes	●	●	●	●	●
LN3	∅ 5/32"	●	—	—	—	—
LN7	∅ 1/4"	●	●	—	—	—
LN9	∅ 5/16"	—	●	—	—	—
LN11	∅ 3/8"	—	—	●	—	—
BN3	∅ 5/32"	●	—	—	—	—
BN7	∅ 1/4"	●	●	—	—	—
BN9	∅ 5/16"	—	●	—	—	—
BN11	∅ 3/8"	—	—	●	—	—
LM*1	Elbow port, mixed sizes (Including upward and downward piping)	●	●	●	—	—
P, E port size (One-touch fittings)		∅ 5/16"	∅ 3/8"	∅ 1/2"	∅ 3/8"	∅ 1/2"

*1: Indicate the sizes on the manifold specification sheet in the case of "CM", "LM".

The direction of P, E port fittings is the same as for A, B port. If selecting "LM", indicate it on the manifold specification sheet for the P, E port fitting direction.

*2: To avoid interference with the body or piping, select downward elbow port when mounting the optional spacer assembly (pages 250 to 252).

How to Order Manifold Assembly

Example (SS5Y3-10SNAN-□)

SS5Y3-10SNAN-04D-C6...1 set (Type 10 4-station manifold base part no.)
 *SY3100-5U1.....2 sets (2-position single part no.)
 *SY3200-5U1.....1 set (2-position double part no.)
 *SY3300-5U1.....1 set (3-position closed centre part no.)

→ The asterisk denotes the symbol for assembly. Prefix it to the part numbers of the valve etc.

- The valve arrangement is numbered as the 1st station from the D side.
- Under the manifold part number, state the valves to be mounted in order from the 1st station as shown in the figure on the left. If the arrangement becomes complicated, specify on a manifold specification sheet.

*: When mixing top ported configurations, select from page 188. Specify on a manifold specification sheet if plugs are required on the A and B port on the manifold.

How to Order Valves (With mounting screw)

Refer to page 13 for valve specifications.

1 Series

3	SY3000
5	SY5000
7	SY7000

2 Type of actuation

1	2-position	Single
2		Double
3	3-position	Closed centre
4		Exhaust centre
5		Pressure centre
A*1	4-position dual 3-port	N.C./N.C.
B*1		N.O./N.O.
C*1		N.C./N.O.

*1: Only rubber seal type is available for the 4-position dual 3-port valve.

3 Seal type

0	Rubber seal
1	Metal seal

4 Pilot type

—	Internal pilot
R	External pilot

5 Back pressure check valve (Built-in valve type)

—	None
H	Built-in

*: Only rubber seal type. Manifold installed type is available if the back pressure check valve is required for a valve with metal seal. Refer to page 256 for details. However, it is not recommended to use the built-in valve type and the manifold installed type at the same time because it will reduce the flow.

*: The built-in valve type back pressure check valve is not available for the 3-position type and the SY7000.

6 Pilot valve option

—	Standard (0.7 MPa)
B	Quick response type (0.7 MPa)
K*1	High pressure type (1.0 MPa)

*1: Only metal seal type is available for the high pressure type.

7 Coil type

—	Standard
T	With power saving circuit (Continuous duty type)

*: Be sure to select the power saving circuit type when a valve is continuously energised for long periods of time.

*: Be careful of the energising time when the power saving circuit is selected. Refer to page 268 for details.

8 Rated voltage

5	24 V DC
---	---------

9 Light/surge voltage suppressor and common specification

Symbol	With light	Surge voltage suppressor	Common specification
R	—	●	Non-polar
U	●		
S	—		
Z	●		Positive common
NS	—		Negative common
NZ	●		

*: Select a valve from R, U, S or Z when the SI Unit output polarity is — (positive common). Select a valve from R, U, NS or NZ when the SI Unit output polarity is N (negative common).

*: Only "Z" and "NZ" types are available for with the power saving circuit.

10 Manual override

*: Refer to page 31 for with the safety slide locking manual override.

11 Type of mounting screw

—	Round head combination screw
B	Hexagon socket head cap screw
K	Round head combination screw (Falling-out-prevention type)
H	Hexagon socket head cap screw (Falling-out-prevention type)

*: For "K" and "H", the valve body cover has a drop prevention construction to stop the mounting screws from falling out when the valve is removed for maintenance etc.

*: **When ordering a valve individually, the base gasket is not included.**

Since the base gasket is attached to the manifold, please order the base gasket separately if it is needed for maintenance service.

Refer to page 244 for part numbers of the base gasket and mounting screw.

*: "B" and "H" cannot be selected for the individual SUP/EXH spacer assembly, interface regulator or double check spacer assembly with residual pressure release valve.

*1 Without SI unit, the output polarity is decided by the SI unit used.

Ensure a match with the common specification of the valves to be used.

*2 DIN rail cannot be mounted without SI Unit.

*3 Positive common (NPN) type is not applicable.

*4 IP40 for the D-sub applicable communication connector specification.

3 Valve stations

In the case of the 32-output SI Unit

Symbol	Stations	Note
02	2 stations	Double wiring*1
⋮	⋮	
16	16 stations	Specified layout*2 (Available up to 32 solenoids)
02	2 stations	
⋮	⋮	
24	24 stations	

In the case of the 16-output SI Unit

Symbol	Stations	Note
02	2 stations	Double wiring*1
⋮	⋮	
08	8 stations	Specified layout*2 (Available up to 16 solenoids)
02	2 stations	
⋮	⋮	
16	16 stations	

*1: Double wiring: 2-position single, double, 3-position and 4-position valves can be used on all manifold stations. Use of a 2-position single solenoid will result in an unused control signal. If this is not desired, order with a specified layout.

*2: Specified layout: Indicate the wiring specifications on the manifold specification sheet.

(Note that 2-position double, 3-position and 4-position valves cannot be used where single wiring has been specified.)

*3: This also includes the number of blanking plate assembly.

*4: For the model without the SI Unit (S0), note the maximum number of solenoids of the SI Unit that will be mounted. If the layout is specified, indicate it on the manifold specification sheet.

4 P, E port entry

U*1	U side (2 to 10 stations)
D*1	D side (2 to 10 stations)
B	Both sides (2 to 24 stations)

*1: For type "S", supply/exhaust block assembly with built-in silencer, choose U or D for P port entry.

5 SUP/EXH block assembly

—	Internal pilot
S	Internal pilot, Built-in silencer
R	External pilot

*: For built-in silencer type, P and E ports are available on U and D sides. 3/5(E) port is plugged. The silencer exhaust port is located on the opposite side of P, E port entry. (Example: When the P, E port entry is D side, the silencer exhaust port is U side.)

*: When the built-in silencer type is used, keep the exhaust port from coming in direct contact with water or other liquids.

6 P, E port size (One-touch fittings)

Symbol	SY3000	SY5000	SY7000
—	∅ 8	∅ 10	∅ 12
N	∅ 5/16"	∅ 3/8"	∅ 1/2"

*: For N, sizes are in inches.

7 Mounting

—	Direct mounting	
D	DIN rail mounting (With DIN rail)	
D0	DIN rail mounting (Without DIN rail)	
D3	For 3 stations	Specify a longer rail than the standard length.
⋮	⋮	
D24	For 24 stations	

*: When it is necessary to mount a DIN rail without an SI Unit, select D0 and order DIN rail length separately, referring to L3 in the dimensions. Refer to page 249 for part numbers of DIN rail.

*: Refer to page 271 for the fixation of DIN rail mounting type manifold.

For details about the EX260 Integrated-type (For Output) Serial Transmission System, refer to the WEB catalogue on SMC website www.smc.eu and the Operation Manual. For details about part numbers of SI Units to be mounted, refer to page 240 in this catalogue. Please download the Operation Manual via SMC website, <http://www.smc.eu>

How to Order Manifold Assembly

Example (SS5Y3-12SNAN-□)

SS5Y3-12SNAN-04D 1 set (Type 12 4-station manifold base part no.)
 *SY3130-5U1-C6 2 sets (2-position single part no.)
 *SY3230-5U1-C6 1 set (2-position double part no.)
 *SY3330-5U1-C6 1 set (3-position closed centre part no.)
 ↳ The asterisk denotes the symbol for assembly. Prefix it to the part numbers of the valve etc.

- The valve arrangement is numbered as the 1st station from the D side.
- Under the manifold part number, state the valves to be mounted in order from the 1st station as shown in the figure on the left. If the arrangement becomes complicated, specify on a manifold specification sheet.

How to Order Valves (With mounting screw) Refer to page 13 for valve specifications.

1 Series

3	SY3000
5	SY5000
7	SY7000

2 Type of actuation

1	2-position	Single
2		Double
3	3-position	Closed centre
4		Exhaust centre
5		Pressure centre
A*1	4-position dual 3-port	N.C./N.C.
B*1		N.O./N.O.
C*1		N.C./N.O.

*1: Only rubber seal type is available for the 4-position dual 3-port valve.

3 Seal type

0	Rubber seal
1	Metal seal

4 Pilot type

—	Internal pilot
R	External pilot

5 Back pressure check valve (Built-in valve type)

—	None
H	Built-in

*: Only rubber seal type. Manifold installed type is available if the back pressure check valve is required for a valve with metal seal. Refer to page 256 for details. However, it is not recommended to use the built-in valve type and the manifold installed type at the same time because it will reduce the flow.

*: The built-in valve type back pressure check valve is not available for the 3-position type and the SY7000.

6 Pilot valve option

—	Standard (0.7 MPa)
B	Quick response type (0.7 MPa)
K*1	High pressure type (1.0 MPa)

*1: Only metal seal type is available for the high pressure type.

7 Coil type

—	Standard
T	With power saving circuit (Continuous duty type)

*: Be sure to select the power saving circuit type when a valve is continuously energised for long periods of time.

*: Be careful of the energising time when the power saving circuit is selected. Refer to page 268 for details.

8 Rated voltage

5	24 V DC
---	---------

9 Light/surge voltage suppressor and common specification

Symbol	With light	Surge voltage suppressor	Common specification
R	—	●	Non-polar
U	●		Positive common
S	—		Negative common
Z	●		
NS	—		
NZ	●		

*: Select a valve from R, U, S or Z when the SI Unit output polarity is — (positive common). Select a valve from R, U, NS or NZ when the SI Unit output polarity is N (negative common).

*: Only "Z" and "NZ" types are available for with the power saving circuit.

10 Manual override

*: Refer to page 31 for with the safety slide locking manual override.

11 A, B port size

Thread piping

Symbol	Port size	Applicable series
M5	M5 x 0.8	SY3000
O1	1/8	SY5000
O2	1/4	SY7000

One-touch fitting (Metric)

Symbol	A, B port	SY3000	SY5000	SY7000
C2	Ø 2	●	—	—
C3	Ø 3.2	●	—	—
C4	Ø 4	●	●	—
C6	Ø 6	●	●	●
C8	Ø 8	—	●	●
C10	Ø 10	—	—	●
C12	Ø 12	—	—	●

One-touch fitting (Inch)

Symbol	A, B port	SY3000	SY5000	SY7000
N1	Ø 1/8"	●	—	—
N3	Ø 5/32"	●	—	—
N7	Ø 1/4"	●	●	●
N9	Ø 5/16"	—	●	●
N11	Ø 3/8"	—	—	●

12 Thread type

—	Rc
F	G
N	NPT
T	NPTF

*: Only — is available for M5.

13 Type of mounting screw

—	Round head combination screw
B	Hexagon socket head cap screw
K	Round head combination screw (Falling-out-prevention type)
H	Hexagon socket head cap screw (Falling-out-prevention type)

*: For "K" and "H", the valve body cover has a drop prevention construction to stop the mounting screws from falling out when the valve is removed for maintenance etc.

*: **When ordering a valve individually, the base gasket is not included.**

Since the base gasket is attached to the manifold, please order the base gasket separately if it is needed for maintenance service. Refer to page 244 for part numbers of the base gasket and mounting screw.

*: "B" and "H" cannot be selected for the individual SUP/EXH spacer assembly or interface regulator.

Plug-in Connector Connecting Base

EX126

Series SY3000/5000/7000

How to Order Manifold

Refer to pages 208 (SY5000) and 209 (SY7000) for dimensions of Type 11/Bottom ported type.

1 Series

3	SY3000
5	SY5000
7	SY7000

2 Type

10	Side ported
11	Bottom ported*1

*1: The SY5000 manifold base is used for the bottom ported of the SY3000. When ordering, refer to "Plug-in Mixed Mounting Type Manifold" (from page 213).

3 SI Unit

0	Without SI Unit
V	CC-Link (Positive common NPN)

*: Only a terminal block plate is mounted for the valve without SI Unit.

4 Valve stations

Symbol	Stations	Note
02	2 stations	Double wiring*1
⋮	⋮	
08	8 stations	Specified layout*2 (Available up to 16 solenoids)
02	2 stations	
⋮	⋮	
16	16 stations	

*1: Double wiring: 2-position single, double, 3-position and 4-position valves can be used on all manifold stations. Use of a 2-position single solenoid will result in an unused control signal. If this is not desired, order with a specified layout.

*2: Specified layout: Indicate the wiring specifications with the manifold specification sheet. (Note that 2-position double, 3-position and 4-position valves cannot be used where single wiring has been specified.)

*: This also includes the number of blanking plate assembly.

5 P, E port entry

U	U side (2 to 10 stations)
D	D side (2 to 10 stations)
B	Both sides (2 to 16 stations)

6 SUP/EXH block assembly

—	Internal pilot
S	Internal pilot, Built-in silencer
R	External pilot

*: 3/5(E) port is plugged for the built-in silencer type.

*: When the built-in silencer type is used, keep the exhaust port from coming in direct contact with water or other liquids.

How to Order Manifold Assembly

Example (SS5Y3-10S4V-□-□)

SS5Y3-10S4V-05D-C6 ... 1 set (Type 10 5-station manifold base part no.)
 *SY3100-5U1 3 sets (2-position single part no.)
 *SY3200-5U1 1 set (2-position double part no.)
 *SY3300-5U1 1 set (3-position closed centre part no.)
 ↳ The asterisk denotes the symbol for assembly.
 Prefix it to the part numbers of the valve etc.

- The valve arrangement is numbered as the 1st station from the D side.
- Under the manifold part number, state the valves to be mounted in order from the 1st station as shown in the figure above. If the arrangement becomes complicated, specify on a manifold specification sheet.

*: When mixing top ported configurations, select from page 196. In this case, use caution as there is also output on the A and B port on base side. Specify on a manifold specification sheet if plugs are required on the A and B port on base side.

For details about the EX126 Integrated-type (For Output) Serial Transmission System, refer to the WEB catalogue on SMC website www.smc.eu and the Operation Manual. For details about part numbers of SI Units to be mounted, refer to page 241 in this catalogue. Please download the Operation Manual via SMC website, <http://www.smc.eu>

LN9	∅ 5/16"	—	●	—	—	—
LN11	∅ 3/8"	—	—	●	—	—
BN3	∅ 5/32"	●	—	—	—	—
BN7	∅ 1/4"	●	●	—	—	—
BN9	∅ 5/16"	—	●	—	—	—
BN11	∅ 3/8"	—	—	●	—	—
LM*1	Elbow port, mixed sizes (Including upward and downward piping)	●	●	●	—	—
P, E port size (One-touch fittings)		∅ 5/16"	∅ 3/8"	∅ 1/2"	∅ 3/8"	∅ 1/2"

*1: Indicate the sizes on the manifold specification sheet in the case of "CM", "LM".

The direction of P, E port fittings is the same as for A, B port. If selecting "LM", indicate it on the manifold specification sheet for the P, E port fitting direction.

*2: To avoid interference with the body or piping, select downward elbow port when mounting the optional spacer assembly (pages 250 to 252).

8 Mounting and Option

Symbol	Mounting	Option	
		Name plate	Station number
—	Direct mounting	—	—
AA		●	●
BA	DIN rail mounting	●	—
D□		—	—
A□		●	●
B□		●	—

*: Enter the number of stations inside □ when it is larger than the number of valve stations. (Refer to "DIN Rail Option" below.)

*: Only direct mounting is available for Type 11 (Bottom ported).

*: Refer to page 271 for the fixation of DIN rail mounting type manifold.

DIN Rail Option

—	Direct mounting	
0	Without DIN rail (with bracket)	
3	For 3 stations	Specify a longer rail than the total length of specified stations.
⋮	⋮	
16	For 16 stations	

How to Order Valves (With mounting screw)

Refer to page 13 for valve specifications.

• Base mounted

1 Series

3	SY3000
5	SY5000
7	SY7000

2 Type of actuation

1	2-position	Single
2		Double
3	3-position	Closed centre
4		Exhaust centre
5		Pressure centre
A*1	4-position dual 3-port	N.C./N.C.
B*1		N.O./N.O.
C*1		N.C./N.O.

*1: Only rubber seal type is available for the 4-position dual 3-port valve.

3 Seal type

0	Rubber seal
1	Metal seal

4 Pilot type

—	Internal pilot
R	External pilot

5 Back pressure check valve (Built-in valve type)

—	None
H	Built-in

*: Only rubber seal type. Manifold installed type is available if the back pressure check valve is required for a valve with metal seal. Refer to page 256 for Ordering Example. However, it is not recommended to use the built-in valve type and the manifold installed type at the same time because it will reduce the flow.

*: The built-in valve type back pressure check valve is not available for the 3-position type and the SY7000.

6 Pilot valve option

—	Standard (0.7 MPa)
B	Quick response type (0.7 MPa)
K*1	High pressure type (1.0 MPa)

*1: Only metal seal type is available for the high pressure type.

7 Coil type

—	Standard
T	With power saving circuit (Continuous duty type)

*: Be sure to select the power saving circuit type when the valve is continuously energised for long periods of time.

*: Be careful of the energising time when the power saving circuit is selected. Refer to page 268 for details.

8 Rated voltage

5	24 V DC
---	---------

9 Light/surge voltage suppressor and common specification

Symbol	With light	Surge voltage suppressor	Common specification
R	—	●	Non-polar
U	●		
S	—		Positive common
Z	●		

*: Only "Z" type is available for with the power saving circuit.

10 Manual override

*: Refer to page 31 for with the safety slide locking manual override.

11 Type of mounting screw

—	Round head combination screw
B	Hexagon socket head cap screw
K	Round head combination screw (Falling-out-prevention type)
H	Hexagon socket head cap screw (Falling-out-prevention type)

*: For "K" and "H", the valve body cover has a drop prevention construction to stop the mounting screws from falling out when the valve is removed for maintenance etc.

*: **When ordering a valve individually, the base gasket is not included.**

Since the base gasket is attached to the manifold, please order the base gasket separately if it is needed for maintenance service.

Refer to page 244 for part numbers of base gasket and mounting screw.

*: "B" and "H" cannot be selected for the individual SUP/EXH spacer assembly, interface regulator or double check spacer assembly with residual pressure release valve.

N11	Ø 3/8"	—	—	●

12 Thread type

—	Rc
F	G
N	NPT
T	NPTF

*: Only — is available for M5.

13 Type of mounting screw

—	Round head combination screw
B	Hexagon socket head cap screw
K	Round head combination screw (Falling-out-prevention type)
H	Hexagon socket head cap screw (Falling-out-prevention type)

*: For "K" and "H", the valve body cover has a drop prevention construction to stop the mounting screws from falling out when the valve is removed for maintenance etc.

*: **When ordering a valve individually, the base gasket is not included.**

Since the base gasket is attached to the manifold, please order the base gasket separately if it is needed for maintenance service. Refer to page 244 for part numbers of base gasket and mounting screw.

*: "B" and "H" cannot be selected for the individual SUP/EXH spacer assembly or interface regulator.

Type 10
Side Ported

Type 11
Bottom Ported

Plug-in Connector Connecting Base

EX120

Series SY3000/5000/7000

How to Order Manifold

Refer to pages 208 (SY5000) and 209 (SY7000) for dimensions of Type 11/Bottom ported type.

1 Series

3	SY3000
5	SY5000
7	SY7000

2 Type

10	Side ported
11	Bottom ported*1

*1: The SY5000 manifold base is used for the bottom ported of the SY3000. When ordering, refer to "Plug-in Mixed Mounting Type Manifold" (from page 213).

3 SI Unit

0	Without SI Unit	
Q	DeviceNet™ (Positive common NPN)	
R1	OMRON CompoBus/S	16 outputs
R2	(Positive common NPN)	8 outputs
V	CC-Link (Positive common NPN)	
ZB*1	CompoNet™	Positive common NPN
ZBN*1		Negative common PNP

*1: The communication connector (for the opposite side) is not provided. Please order it separately.

*: Ensure a match with the common specification of the valve to be used.

4 Valve stations

Symbol	Stations	Note
02	2 stations	Double wiring*1
:	:	
08	8 stations	Specified layout*2 (Available up to 16 solenoids)
02	2 stations	
:	:	
16	16 stations	

*1: Double wiring: 2-position single, double, 3-position and 4-position valves can be used on all manifold stations.

Use of a 2-position single solenoid will result in an unused control signal. If this is not desired, order with a specified layout.

*2: Specified layout: Indicate the wiring specifications on the manifold specification sheet. (Note that 2-position double, 3-position and 4-position valves cannot be used where single wiring has been specified.)

*: This also includes the number of blanking plate assembly.

*: Since R2 type SI Unit has 8 outputs, note that up to 8 solenoids can be accommodated.

5 P, E port entry

U	U side (2 to 10 stations)
D	D side (2 to 10 stations)
B	Both sides (2 to 16 stations)

6 SUP/EXH block assembly

—	Internal pilot
S	Internal pilot, Built-in silencer
R	External pilot

*: 3/5(E) port is plugged for the built-in silencer type.

How to Order Manifold Assembly

Example (SS5Y3-10S3V-□)

SS5Y3-10S3V-05D-C6 ... 1 set (Type 10 5-station manifold base part no.)
 *SY3100-5U1 3 sets (2-position single part no.)
 *SY3200-5U1 1 set (2-position double part no.)
 *SY3300-5U1 1 set (3-position closed centre part no.)

→ The asterisk denotes the symbol for assembly. Prefix it to the part numbers of the valve etc.

- The valve arrangement is numbered as the 1st station from the D side.
- Under the manifold part number, state the valves to be mounted in order from the 1st station as shown in the figure above. If the arrangement becomes complicated, specify on a manifold specification sheet.

*: When mixing top ported configurations, select from page 204. In this case, use caution as there is also output on the A and B port on base side. Specify on a manifold specification sheet if plugs are required on the A and B port on base side.

For details about the EX120 Integrated-type (For Output) Serial Transmission System, refer to the WEB catalogue on SMC website www.smc.eu and the Operation Manual. For details about part numbers of SI Units to be mounted, refer to page 242 in this catalogue. Please download the Operation Manual via SMC website, <http://www.smc.eu>

7 A, B port size (Metric/One-touch fitting)

Symbol	A, B port	Type 10/Side ported			Type 11/Bottom ported			
		SY3000	SY5000	SY7000	SY5000	SY7000

P, E port size (One-touch fittings)		Ø 8	Ø 10	Ø 12	Ø 10	Ø 12		

A, B port size (Inch/One-touch fitting)

Symbol	A, B port	Type 10/Side ported			Type 11/Bottom ported	
		SY3000	SY5000	SY7000	SY5000	SY7000
N1 N3 N7 N9 N11 CM*1	Ø 1/8"	●	—	—	—	—
	Ø 5/32"	●	●	—	●	—
	Ø 1/4"	●	●	●	●	●
	Ø 5/16"	—	●	●	●	●
	Ø 3/8"	—	—	●	—	●
	Straight port, mixed sizes	●	●	●	●	●
LN3 LN7 LN9 LN11 BN3 BN7 BN9 BN11 LM*1	Upward	Ø 5/32"	●	—	—	—
		Ø 1/4"	●	●	—	—
		Ø 5/16"	—	●	—	—
	Downward	Ø 3/8"	—	—	●	—
		Ø 5/32"	●	—	—	—
		Ø 1/4"	●	●	—	—
Elbow port, mixed sizes (Including upward and downward piping)	Ø 5/16"	—	●	—	—	
	Ø 3/8"	—	—	●	—	
P, E port size (One-touch fittings)		Ø 5/16"	Ø 3/8"	Ø 1/2"	Ø 3/8"	Ø 1/2"

*1: Indicate the sizes on the manifold specification sheet in the case of "CM", "LM".

The direction of P, E port fittings is the same as for A, B port. If selecting "LM", indicate it on the manifold specification sheet for the P, E port fitting direction.

*2: To avoid interference with the body or piping, select downward elbow port when mounting the optional spacer assembly (pages 250 to 252).

8 Mounting and Option

Symbol	Mounting	Option	
		Name plate	Station number
—	Direct mounting	—	—
AA BA		●	●
D□ A□ B□	DIN rail mounting	—	—
		●	●
		●	—

*: Enter the number of stations inside □ when it is larger than the number of valve stations. (Refer to "DIN Rail Option" below.)

*: Only direct mounting is available for Type 11 (Bottom ported).

*: Refer to page 271 for the fixation of DIN rail mounting type manifold.

DIN Rail Option

—	Direct mounting	
0	Without DIN rail (with bracket)	
3	For 3 stations	Specify a longer rail than the total length of specified stations.
⋮	⋮	
16	For 16 stations	

*: When it is necessary to mount a DIN rail without an SI Unit, select D0 and order DIN rail length separately, referring to L3 in the dimensions. (Refer to page 249 for part numbers of DIN rail.)

How to Order Valves (With mounting screw)

Refer to page 13 for valve specifications.

• Base mounted

1 Series

3	SY3000
5	SY5000
7	SY7000

2 Type of actuation

1	2-position	Single
2		Double
3	3-position	Closed centre
4		Exhaust centre
5		Pressure centre
A*1	4-position dual 3-port	N.C./N.C.
B*1		N.O./N.O.
C*1		N.C./N.O.

*1: Only rubber seal type is available for the 4-position dual 3-port valve.

3 Seal type

0	Rubber seal
1	Metal seal

4 Pilot type

—	Internal pilot
R	External pilot

5 Back pressure check valve (Built-in valve type)

—	None
H	Built-in

*: Only rubber seal type. Manifold installed type is available if the back pressure check valve is required for a valve with metal seal. Refer to page 256 for Ordering Example. However, it is not recommended to use the built-in valve type and the manifold installed type at the same time because it will reduce the flow.

*: The built-in valve type back pressure check valve is not available for the 3-position type and the SY7000.

6 Pilot valve option

—	Standard (0.7 MPa)
B	Quick response type (0.7 MPa)
K*1	High pressure type (1.0 MPa)

*1: Only metal seal type is available for the high pressure type.

7 Coil type

—	Standard
T	With power saving circuit (Continuous duty type)

*: Be sure to select the power saving circuit type when the valve is continuously energised for long periods of time.

*: Be careful of the energising time when the power saving circuit is selected. Refer to page 268 for details.

8 Rated voltage

5	24 V DC
---	---------

9 Light/surge voltage suppressor and common specification

Symbol	With light	Surge voltage suppressor	Common specification
R	—	●	Non-polar
U	●		Positive common
S	—		
Z	●		
NS	—		Negative common
NZ	●		

*: Select a valve from R, U, S or Z when the SI Unit specification is positive common. Select a valve from R, U, NS or NZ when the SI Unit specification is ZBN (negative common).

*: Only "Z" and "NZ" types are available for with the power saving circuit.

10 Manual override

*: Refer to page 31 for with the safety slide locking manual override.

11 Type of mounting screw

—	Round head combination screw
B	Hexagon socket head cap screw
K	Round head combination screw (Falling-out-prevention type)
H	Hexagon socket head cap screw (Falling-out-prevention type)

*: For "K" and "H", the valve body cover has a drop prevention construction to stop the mounting screws from falling out when the valve is removed for maintenance etc.

*: **When ordering a valve individually, the base gasket is not included.**

Since the base gasket is attached to the manifold, please order the base gasket separately if it is needed for maintenance service.

Refer to page 244 for part numbers of the base gasket and mounting screw.

*: "B" and "H" cannot be selected for the individual SUP/EXH spacer assembly, interface regulator or double check spacer assembly with residual pressure release valve.

EX250 (IP67) EX260 (IP67) EX126 (IP67) EX120

Series SY3000/5000

The SY3000 can be mounted onto the SY5000 size manifold.

How to Order Manifold

Refer to page 222 for dimensions of Type 11/Bottom ported type.

SS5Y5 - M 10 F 1 - 05 U - C 8 6

Mixed Mounting Type

It is possible to mount the SY3000 size valves on all stations. In this case, there is no need to fill in part ③ in the order code. However, the manifold block width should be 12.5 mm.

① Type

10	Side ported
11	Bottom ported

② Connector type

Symbol	Type	Page	
F	D-sub connector	97	
FW	(25 pins)		
P	26 pins		
PG	Flat ribbon cable		
PH	20 pins	115	
J	10 pins		
G	PC wiring (20 pins)	With power supply terminal	
T	Terminal block box	115	
L1	Lead wire	34 cores	125
L2		17 cores	
L3		9 cores	
M	Circular connector	135	
S□	Serial transmission	EX500 Gateway Decentralised System 2 (128 Points)	145
S□		EX500 Gateway Decentralised System (64 Points)	151
S6□		EX600	161
S□		EX250	173
S□		EX260	181
S4□		EX126	189
S3□		EX120	197

*: Refer to the pages shown in the table above for details.

③

• With Lead wire

Lead wire length

1	0.6 m
2	1.5 m
3	3 m

• With D-sub connector (IP40/67), Flat ribbon cable and PC wiring

Connector entry direction

1	Upward
2	Lateral

*: It is not necessary to select the items above for the valve with terminal block box or with circular connector or the serial transmission type.

④ Valve stations

Symbol	Stations	Note
02	2 stations	Some connectors have a limitation on the number of stations. Refer to the pages shown in the table "Connector type" for details.
⋮	⋮	
24	24 stations	

⑤ P, E port entry

U	U side (2 to 10 stations)
D	D side (2 to 10 stations)
B	Both sides (2 to 24 stations)

*: Refer to page 161 for the EX600 and ⑦ on page 173 for the EX250.

⑦ Fitting type: One-touch fitting

Symbol	A, B port	
C	Straight	
L	Metric size	Upward* ²
B		Downward* ²
N	Straight	
LN	Inch size	Upward* ²
BN		Downward* ²
CM* ¹	Mixed sizes	Straight
LM* ¹		Elbow (Including upward and downward piping)* ²

*1: Indicate the sizes on the manifold specification sheet in the case of "CM", "LM".

The direction of P, E port fittings is the same as for A, B port. If selecting "LM", indicate it on the manifold specification sheet for the P, E port fitting direction.

*2: To avoid interference with the body or piping, select downward elbow port when mounting the optional spacer assembly (pages 250 to 252). Elbow fittings are not available for Type 11 (Bottom ported).

*: Elbow fittings: Ø 2, Ø 3.2 and Ø 1.8" are not available for the SY3000 series. Ø 2, Ø 3.2, Ø 1.8" and Ø 5/32" are not available for the SY5000 series.

8 SY5000: A, B port size

(Metric/One-touch fitting)

Symbol	Port size
4	∅ 4
6	∅ 6
8	∅ 8
—	For all stations of SY3000

(Inch/One-touch fitting)

Symbol	Port size
3	∅ 5/32"
7	∅ 1/4"
9	∅ 5/16"
—	For all stations of SY3000

*: No symbol needs to be specified when fitting type "CM", "LM" is selected.

9 SY3000: A, B port size

(Metric/One-touch fitting)

Symbol	Port size
2	∅ 2
3	∅ 3.2
4	∅ 4
6	∅ 6
8	∅ 8*1

(Inch/One-touch fitting)

Symbol	Port size
1	∅ 1/8"
3	∅ 5/32"
7	∅ 1/4"
9	∅ 5/16"*1

*1: The valve pitch is the same as the SY5000.

*: No symbol needs to be specified when fitting type "CM", "LM" is selected.

10 Mounting

—		Direct mounting
D		DIN rail mounting (With DIN rail)
D0		DIN rail mounting (Without DIN rail)
D3	For 3 stations	Specify a longer rail than the standard length. [The SY5000 valve is now at a mountable length (manifold block length of 16 mm).]
⋮	⋮	
D24	For 24 stations	

*: Only direct mounting is available for Type 11 (Bottom ported).

*: Refer to page 220 to determine the L3 using "Calculation formula" for the DIN rail length.

*: Refer to page 271 for the fixation of DIN rail mounting type manifold.

How to Order Manifold Assembly

Example (SS5Y5-M10F1-□)

SS5Y5-M10F1-05D-C86 ... 1 set (Type M10 5-station manifold base part no.)
 *SY5200-5U1 3 sets (2-position double part no.)
 *SY3200-5U1 2 sets (2-position double part no.)

→ The asterisk denotes the symbol for assembly.
 Prefix it to the part numbers of the valve etc.

- The valve arrangement is numbered as the 1st station from the D side.
- Under the manifold part number, state the valves to be mounted in order from the 1st station as shown in the figure above. If the arrangement becomes complicated, specify on a manifold specification sheet.

*: When mixing top ported configurations, select from page 226.
 In this case, use caution as there is also output on the A and B port on base side.
 Specify on a manifold specification sheet if plugs are required on the A and B port on base side.

How to Order Valves (With mounting screw)

Refer to page 13 for valve specifications.

● Base mounted

1 Series

3	SY3000
5	SY5000

2 Type of actuation

1	2-position	Single
2		Double
3	3-position	Closed centre
4		Exhaust centre
5		Pressure centre
A*1	4-position dual 3-port	N.C./N.C.
B*1		N.O./N.O.
C*1		N.C./N.O.

*1: Only rubber seal type is available for the 4-position dual 3-port valve.

3 Seal type

0	Rubber seal
1	Metal seal

4 Pilot type

	Internal pilot
R	External pilot

5 Back pressure check valve (Built-in valve type)

—	None
H	Built-in

*: Only rubber seal type. Manifold installed type is available if back pressure check valve is required for the valve with metal seal. Refer to page 256 for Ordering Example. However, it is not recommended to use the built-in valve type and the manifold installed type at the same time because it will reduce the flow.

*: The built-in valve type back pressure check valve is not available for the 3-position type.

6 Pilot valve option

—	Standard (0.7 MPa)
B	Quick response type (0.7 MPa)
K*1	High pressure type (1.0 MPa)

*1: Only metal seal type is available for the high pressure type.

7 Coil type

—	Standard
T	With power saving circuit (Continuous duty type)

*: Be sure to select the power saving circuit type when the valve is continuously energised for long periods of time.

*: Be careful of the energising time when the power saving circuit is selected. Refer to page 268 for details.

8 Rated voltage

5	24 V DC
6	12 V DC

*: Only 24 V DC is available for the serial transmission type.

9 Light/surge voltage suppressor and common specification

Symbol	With light	Surge voltage suppressor	Common specification
—	—	—	Non-polar
R	—	●	
U	●		
S	—		
Z	●		Positive common
NS	—	Negative common	
NZ	●		

*: "—" is not available for the SI Unit manifold.

*: Only "Z" and "NZ" types are available for with the power saving circuit. Select a valve which is suited to the SI Unit output polarity or SI Unit specification when the SI Unit is selected.

Refer to the pages below for details.

EX500: P.147, 153 EX600: P.163
EX250: P.175 EX260: P.183
EX126: P.191 EX120: P.199

10 Manual override

*: Refer to page 31 for with the safety slide locking manual override.

11 Type of mounting screw

—	Round head combination screw
B	Hexagon socket head cap screw
K	Round head combination screw (Falling-out-prevention type)
H	Hexagon socket head cap screw (Falling-out-prevention type)

*: For "K" and "H", the valve body cover has a drop prevention construction to stop the mounting screws from falling out when the valve is removed for maintenance etc.

*: **When ordering a valve individually, the base gasket is not included.**

Since the base gasket is attached to the manifold, please order the base gasket separately if it is needed for maintenance service.

Refer to page 244 for part numbers of the base gasket and mounting screw.

*: "B" and "H" cannot be selected for the individual SUP/EXH spacer assembly, interface regulator or double check spacer assembly with residual pressure release valve.

Mixed Mounting Type

SS5Y5-M10 □ - Stations $\frac{U}{D}$

*: Refer to pages 205 and 206 for dimensions of external pilot, built-in silencer and elbow fittings.

Calculation formula for dimensions with D-sub connector <IP40>, Flat ribbon cable and PC wiring

$L1 = 12.5 \times n1 + 16 \times n2 + 76.4$
 $L2 = 12.5 \times n1 + 16 \times n2 + 48$
 $M = (L1 + 6.1) / 12.5 + 1$ Decimal fractions are truncated.
 $L3 = 12.5 \times M + 23$
 $L4 = L3 - 10.5$
 $L5 = (L3 - L1 + 6.1) / 2$

n1: Number of valve stations of the SY3000
 n2: Number of valve stations of the SY5000
 (Including the stations of the SY3000: $\varnothing 8, \varnothing 5/16"$)

Calculation formula for dimensions with D-sub connector <IP67>, Terminal block box, Lead wire, Circular connector, EX500/600/250/260/126/120 serial transmission

$L1 = 12.5 \times n1 + 16 \times n2 + a + b \times n3$
 $L2 = 12.5 \times n1 + 16 \times n2 \times 48$
 $M = L1 / 12.5 + 1$ Decimal fractions are truncated.
 $L3 = 12.5 \times M + 23$
 $L4 = L3 - 10.5$
 $L5 = (L3 - L1) / 2$
 $L6 = b \times n3 + c$

n1: Number of valve stations of the SY3000
 n2: Number of valve stations of the SY5000
 (Including the stations of the SY3000: $\varnothing 8, \varnothing 5/16"$)
 n3: Number of I/O units or input block stations
 *: Refer to pages 166 to 167 for dimensions of the EX600 serial transmission with I/O unit and page 177 for the EX250 serial transmission with input block when L6, b and c are used for the calculation formula.

Dimensions: Series **SY3000/5000**

Plug-in Connector Connecting Base

Type 11/Bottom Ported
Mixed Mounting Type

SS5Y5-M11 □ - Stations $\frac{U}{D}$

Calculation formula for dimensions

$$L1 = 12.5 \times n1 + 16 \times n2 + a + b \times n3$$

$$L2 = 12.5 \times n1 + 16 \times n2 + 48$$

$$L6 = b \times n3 + c$$

n1: Number of valve stations of the SY3000
n2: Number of valve stations of the SY5000
(Including the stations of the SY3000: $\varnothing 8, \varnothing 5/16"$)
n3: Number of I/O units or input block stations

*: Refer to pages 166 and 167 for dimensions of the EX600 serial transmission with I/O Unit and page 177 for the EX250 serial transmission with input block when L6, b and c are used for the calculation formula.

Coefficient	a	b	c

**Type 12
Top Ported**

Series SY3000/5000/7000 C €

For the SY5000 series, the SY5000 and the SY3000 can be mounted on the same manifold.
For the SY7000 series, the SY7000 and the SY5000 can be mounted on the same manifold.

How to Order Manifold

Refer to pages 211 and 212 for dimensions of Type 12/Top ported type.

Mixed Mounting Type

For the SY5000 series, it is possible to mount the SY3000 size valves on all stations. However, the SY3000 manifold block width should be 12.5 mm. (16 mm for Ø 8 or Ø 5/16" One-touch fitting)

Also, for the SY7000 series, it is possible to mount the SY5000 size valves on all stations. However, the SY3000 cannot be mounted onto the SY7000 series.

1 Series

5	SY5000
7	SY7000

3

• With Lead wire

Lead wire length

1	0.6 m
2	1.5 m
3	3 m

• With D-sub connector (IP40/67), Flat ribbon cable and PC wiring

Connector entry direction

1	Upward
2	Lateral

*: It is not necessary to select the items above for the valve with terminal block box or with circular connector or the serial transmission type.

4 Valve stations

Symbol	Stations	Note
02	2 stations	Some connectors have a limitation on the number of stations. Refer to the pages shown in the table "Connector type" for details.
:	:	
24	24 stations	

7 P, E port size (One-touch fittings)

Symbol	SY5000	SY7000	Note
—	Ø 10	Ø 12	Metric size
N	Ø 3/8"	Ø 1/2"	Inch size

2 Connector type

Symbol	Type	Page	
F	D-sub connector (25 pins)	IP40	
FW			IP67
P	Flat ribbon cable	26 pins	
PG		20 pins	
PH		10 pins	
J	PC wiring (20 pins)	—	
G		With power supply terminal	
T	Terminal block box	121	
L1	Lead wire	34 cores	
L2		17 cores	
L3		9 cores	
M	Circular connector	141	
S□	Serial transmission	EX500 Gateway Decentralised System 2 (128 Points)	157
S□		EX500 Gateway Decentralised System (64 Points)	159
S6□		EX600	171
S□		EX250	179
S□		EX260	187
S4□		EX126	195
S3□		EX120	203

*: Refer to the pages shown in the table above for details.

5 P, E port entry

U*1	U side (2 to 10 stations)
D*1	D side (2 to 10 stations)
B	Both sides (2 to 24 stations)

*1: For type "S", supply/exhaust block assembly with built-in silencer, choose U or D for P port entry.

*: Refer to page 171 for the EX600 and 6 on

6 SUP/EXH block assembly

—	Internal pilot
S	Internal pilot, Built-in silencer
R	External pilot

*: For built-in silencer type, P and E ports are available on U and D sides. 3/5(E) port is plugged. The silencer exhaust port is located on the opposite side of P, E port entry. (Example: When the P, E port entry is D side, the silencer exhaust port is U side.)

*: Refer to page 171 for the EX600 and 6 on page 179 for the EX250.

8 Mounting

—		Direct mounting
D	DIN rail mounting (With DIN rail)	
D0	DIN rail mounting (Without DIN rail)	
D3	For 3 stations	Specify a longer rail than the standard length.
:	:	[For the SS5Y5-M12, the SY5000 valve is now at a mountable length (manifold block length of 16 mm).]
D24	For 24 stations	

*: Refer to page 227 to determine the L3 using "Calculation formula" for the DIN rail length. (For the SY3000 and SY5000 mixed mounting type)

*: Refer to page 271 for the fixation of DIN rail mounting type manifold.

How to Order Manifold Assembly

Example (SS5Y5-M12F1-□)

SS5Y5-M12F1-05D ... 1 set (Type M12 5-station manifold base part no.)
 *SY5230-5U1-C8 3 sets (2-position double part no.)
 *SY3230-5U1-C6 2 sets (2-position double part no.)
 The asterisk denotes the symbol for assembly. Prefix it to the part numbers of the valve etc.

- The valve arrangement is numbered as the 1st station from the D side.
- Under the manifold part number, state the valves to be mounted in order from the 1st station as shown in the figure on the left. If the arrangement becomes complicated, specify on a manifold specification sheet.

How to Order Valves (With mounting screw) Refer to page 13 for valve specifications.

1 Series

3	SY3000
5	SY5000
7	SY7000

2 Type of actuation

1	2-position	Single
2		Double
3	3-position	Closed centre
4		Exhaust centre
5		Pressure centre
A*1	4-position dual 3-port	N.C./N.C.
B*1		N.O./N.O.
C*1		N.C./N.O.

*1: Only rubber seal type is available for the 4-position dual 3-port valve.

3 Seal type

0	Rubber seal
1	Metal seal

4 Pilot type

—	Internal pilot
R	External pilot

5 Back pressure check valve (Built-in valve type)

—	None
H	Built-in

*: Only rubber seal type. Manifold installed type is available if the back pressure check valve is required for a valve with metal seal. Refer to page 256 for Ordering Example. However, it is not recommended to use the built-in valve type and the manifold installed type at the same time because it will reduce the flow.
 *: The built-in valve type back pressure check valve is not available for the 3-position type and the SY7000.

6 Pilot valve option

—	Standard (0.7 MPa)
B	Quick response type (0.7 MPa)
K*1	High pressure type (1.0 MPa)

*1: Only metal seal type is available for the high pressure type.

7 Coil type

—	Standard
T	With power saving circuit (Continuous duty type)

*: Be sure to select the power saving circuit type when a valve is continuously energised for long periods of time.
 *: Be careful of the energising time when the power saving circuit is selected. Refer to page 268 for details.

8 Rated voltage

5	24 V DC
6	12 V DC

*: Only 24 V DC is available for the serial transmission type.

9 Light/surge voltage suppressor and common specification

Symbol	With light	Surge voltage suppressor	Common specification
—	—	—	Non-polar
R	—	—	
U	●	—	
S	—	●	Positive common
Z	●	—	Negative common
NS	—	—	
NZ	●	—	

*: "—" is not available for the SI Unit manifold.
 *: Only "Z" and "NZ" types are available for with the power saving circuit. Select a valve which is suited to the SI Unit output polarity or SI Unit specification when the SI Unit is selected.
 Refer to the pages below for details.
 EX500: P.158, 160 EX600: P.172
 EX250: P.180 EX260: P.188
 EX126: P.196 EX120: P.204

10 Manual override

*: Refer to page 31 for with the safety slide locking manual override.

11 A, B port size

N11	Ø 3/8"	—	—	●

12 Thread type

—	Rc
F	G
N	NPT
T	NPTF

*: Only — is available for M5.

13 Type of mounting screw

—	Round head combination screw
B	Hexagon socket head cap screw
K	Round head combination screw (Falling-out-prevention type)
H	Hexagon socket head cap screw (Falling-out-prevention type)

*: For "K" and "H", the valve body cover has a drop prevention construction to stop the mounting screws from falling out when the valve is removed for maintenance etc.
 *: **When ordering a valve individually, the base gasket is not included.** Since the base gasket is attached to the manifold, please order the base gasket separately if it is needed for maintenance service.
 Refer to page 244 for part numbers of the base gasket and mounting screw.
 *: "B" and "H" cannot be selected for the individual SUP/EXH spacer assembly or interface regulator.

(Station 1)----- (Station n)

*: Refer to page 206 for dimensions of external pilot and elbow fittings.

Calculation formula for dimensions with D-sub connector <IP40>, Flat ribbon cable and PC wiring

$$L1 = 12.5 \times n1 + 16 \times n2 + 76.4$$

$$L2 = 12.5 \times n1 + 16 \times n2 + 48$$

$$M = (L1 + 6.1) / 12.5 + 1 \quad \text{Decimal fractions are truncated.}$$

$$L3 = 12.5 \times M + 23$$

$$L4 = L3 - 10.5$$

$$L5 = (L3 - L1 + 6.1) / 2$$

n1: Number of valve stations of the SY3000
n2: Number of valve stations of the SY5000

Calculation formula for dimensions with D-sub connector <IP67>, Terminal block box, Lead wire, Circular connector, EX500/600/250/260/126/120 serial transmission

$$L1 = 12.5 \times n1 + 16 \times n2 + a + b \times n3$$

$$L2 = 12.5 \times n1 + 16 \times n2 \times 48$$

$$M = L1 / 12.5 + 1 \quad \text{Decimal fractions are truncated.}$$

$$L3 = 12.5 \times M + 23$$

$$L4 = L3 - 10.5$$

$$L5 = (L3 - L1) / 2$$

$$L6 = b \times n3 + c$$

n1: Number of valve stations of the SY3000
n2: Number of valve stations of the SY5000
n3: Number of I/O Units or input block stations

*: Refer to pages 166 and 167 for dimensions of the EX600 serial transmission with I/O Unit and page 177 for the EX250 serial transmission with input block when L6, b and c are used for the calculation formula.

Manifold Exploded View (Common Parts)

Type 10, 11, 12: How to Increase Connector Type Manifold

- 1 Loosen the U-side tension bolt (a), and remove the B SUP/EXH end block assembly.
- 2 Screw in ④ tie-rods for additional stations to the ⑤ tie-rod of the manifold.
(Screw them in until there is no gap between the tie-rods.)
- 3 Connect the A manifold block assembly and B SUP/EXH end block assembly to be added, and tighten the tension bolt (a).

Tightening torque for tension bolt (a) (M3): 0.8 N·m

⚠ Caution

1. Be sure to shut off the power and air supplies before disassembly.
Furthermore, since air may remain inside the actuator, piping and manifold, confirm that the air is completely exhausted before performing any work.
2. When disassembly and assembly are performed, air leakage may result if the tightening of the tension bolt is inadequate.

2	For plug-in metal base

■ Individual SUP spacer assembly

[With a connector gasket, a base gasket, and two mounting screws (3 pcs. for the SY7000)]

When the same manifold is used for different pressures, an individual SUP spacer assembly is used as a supply port for different pressures.

*: When selecting a One-touch fitting elbow type for a spacer assembly, use it faced upward, since it interferes with A and B port piping in Type 50 and Type 10 manifolds.

■ Individual EXH spacer assembly

[With a connector gasket, a base gasket, and two mounting screws (3 pcs. for the SY7000)]

When valve exhaust affects other stations due to the circuit configuration, this spacer assembly is used for individual valve exhaust.

*: When selecting a One-touch fitting elbow type for a spacer assembly, use it faced upward, since it interferes with A and B port piping in Type 50 and Type 10 manifolds.

■ SUP stop valve spacer assembly with residual pressure release valve

[With a connector gasket, a base gasket, and two mounting screws (3 pcs. for the SY7000)]

It is used to shut off the supply air to valves individually.

*: Cannot be selected when the elbows are facing upward in A and B ports in Type 10 manifolds, since they will interfere with the piping for the spacer assembly.

SY 3 0M - 50 - 1A E	
Series	Manual override
3 SY3000	— Push-turn locking slotted type
5 SY5000	E Push-turn locking lever type
7 SY7000	

*: For lever type
When locking the lever type manual override, push the lever down in the PUSH position with your fingers until it stops, then turn the lever 90° clockwise. (PUSH → LOCK)
Turning the lever without pushing it down until it stops can cause damage to the manual override and other problems such as air leakages.
To unlock the manual override, turn the lever counterclockwise. (LOCK → PUSH)

Part numbers of mounting screw (For repairs)
SY3000: SY30M-56-1A (2 pcs.)
SY5000: SY50M-56-1A (2 pcs.)
SY7000: SY70M-56-1A (3 pcs.)

[How to mount SUP stop valve spacer assembly with residual pressure release valve]

Insert the SUP stop valve mounting screw from the side of the spacer assembly, and mount it to the manifold.

Tighten the SUP stop valve mounting screw to the specified tightening torque. Mount the valve and tighten the valve mounting screws to the specified tightening torque after mounting the SUP stop valve spacer assembly with residual pressure exhaust valve.

- *: Install the plate type nut to the spacer assembly as shown in the figure if it comes off. The SUP stop valve mounting screws can be tightened with a hexagon wrench without removing the plate type nut.
- *: When the elbows are facing upward in A and B ports in Type 10 manifolds, they will interfere with the piping for the spacer assembly. Therefore, combine the A and B ports with straight types or elbows facing downward.
- *: This product is only for internal pilot specifications, as the external pilot air cannot be shut off.

■ Double check spacer assembly with residual pressure release valve (Side/Bottom ported)

[With a connector gasket, a base gasket, and two mounting screws (3 pcs. for the SY7000)]

It is used to hold the intermediate position of the cylinder for a long period of time. Use a 3-position exhaust centre valve when the double check spacer assembly with residual exhaust valve is used.

It can also be used for drop prevention at the cylinder stroke end when supply residual pressure is released by using a 2-position single/double valve.

Operating pressure range: 0.1 to 1.0 MPa

*: When the elbows are facing upward in A and B ports in Type 10 manifolds, they will interfere with the piping for the spacer assembly. Therefore, combine the A and B ports with straight types or elbows facing downward.

Part numbers of mounting screw (For repairs)
SY3000: SY3000-23-27A (2 pcs.)
SY5000: SY5000-221-4A (2 pcs.)
SY7000: SY7000-221-4A (3 pcs.)

Series	Part no.
SY3000	SY30M-60-1A
SY5000	SY50M-60-1A
SY7000	SY70M-60-1A

	Intermediate stop	Drop prevention
Applicable valve	SY ₇ ³ 40 ₁ ⁰	SY ₇ ³ 20 ₁ ⁰

Caution

- Air leakage from the pipe between the valve and cylinder or from the fittings will prevent the cylinder from stopping for a long period of time. Check the leakage using neutral household detergent, such as dish washing soap. Also, check the cylinder's tube gasket, piston packing and rod packing for air leakage.
- Combining with 3-position closed centre or pressure centre valve will not work.
- If the exhaust of the double check spacer is restricted too much, the cylinder may not operate properly and may not stop intermediately.
- Set the cylinder load so that the cylinder pressure will be within two times that of the supply pressure.

<Example>

Double check spacer assembly with residual pressure release valve

3-position exhaust centre valve

(Intermediate stop: When 3-position exhaust centre valve is mounted)

Double check spacer assembly with residual pressure release valve

2-position single valve

(Drop prevention: When 2-position single valve is mounted)

Caution

Tightening torque for mounting screw	
M2:	0.16 N·m (SY3000)
M3:	0.8 N·m (SY5000/7000)

Manifold Options

*: Refer to pages 261, 263, 265 for dimensions.

Interface regulator

[With a connector gasket, a base gasket, and two mounting screws (3 pcs. for the SY7000)]

Used when the supply pressure for each valve on the same manifold must be individually set (reduced pressure).

How to Order

SY 3 0M - 05 - P - □

Series

3	SY3000
---	--------

Pressure gauge option*1

M1	No pressure gauge
05	Pressure gauge with MPa display (For odd number station)
06	Pressure gauge with MPa display (For even number station)
N5	Pressure gauge with psi display (For odd number station)*2
N6	Pressure gauge with psi display (For even number station)*2

Applicable valve*3

—	For single, double, and 4-position
3	For 3-position

- *1: In the case of the SY3000 series with a pressure gauge, when mounting on the manifold, use caution that the part numbers are different between the odd no. stations and the even no. stations to prevent the pressure gauges from interfering with each other.
If using a connector connecting base M10/11/12 (mixed mounting type) or laminating two or more types of spacer type manifold options for the neighboring stations, you can use only the model without a pressure gauge (M1).
- *2: As per the new Measurement Law, gauges with a psi display will only be sold to overseas customers.
- *3: In the case of the SY3000 series, use caution that the part numbers will differ depending on the one for single/double and 4- and 3-position due to the different length of solenoid valves. Also, if you have selected a model with a pressure gauge, and if at least the one for 3-position is included in the same manifold, use all the ones for 3-position to prevent the pressure gauges from interfering with each other.

M3: 0.8 N·m (SY5000/7000)

Manifold Options

*: Refer to pages 261, 263, 265 for dimensions.

■ Individual SUP block assembly

On the circuit of the plug-in connector connection base, an individual SUP block assembly can be used to supply air to a series of valves if a separate air supply is required, or if additional air is required for additional air flow.

Individual SUP block assembly occupies 1 station.

Blocking disks also supplied (2 pieces). Can be used to block both sides of the number of stations being isolated for individual air supply (as shown in example).

*: Specify the mounting position of the block as well as the position where the SUP passage is to be blocked on the manifold specification sheet. Blocking is required for 1 or 2 positions for 1 set. (2 SUP blocking disks is attached to individual SUP block.)

*: Electrical wiring is connected to a number of stations in the individual SUP block manifold.

*: When used in M10/11/12 (mixed mounting type), select the SY50M type for SS5Y5 and the SY70M type for SS5Y7.

*: A structure to prevent screws falling out is in place on the individual SUP block, making it much harder for the mounting screws to fall out.

■ Individual EXH block assembly

On the circuit of the plug-in connector connection base, individual EXH block assembly can be used to individually exhaust series of valves when the exhaust from the valves would affect a number of other stations.

Individual EXH block assembly occupies 1 station.

Blocking disks also supplied (4 pieces). Can be used to block both sides of the number of stations being isolated for individual exhaust. (as shown in example).

*: Specify the mounting position of the block as well as the position where the EXH passage is to be blocked on the manifold specification sheet. Blocking is required for 1 or 2 positions for 1 set. (2 sets of EXH blocking disks (4 pcs.) to block EXH is attached to individual EXH block.)

*: Electrical wiring is connected to a number of stations in the individual EXH block manifold.

*: When used in M10/11/12 (mixed mounting type), select the SY50M type for SS5Y5 and the SY70M type for SS5Y7.

*: A structure to prevent screws falling out is in place on the individual EXH block, making it much harder for the mounting screws to fall out.

<Example>

Manifold Options

■ SUP/EXH blocking disk assembly (for connector type manifold, Type 10, 11, 12)

[SUP blocking disk]

By inserting the SUP blocking disk in the pressure supply passage of the manifold valve, can provide two different high and low pressure in one manifold.

[EXH blocking disk]

By inserting the EXH blocking disk in the exhaust passage of the manifold valve, can separate the exhaust from the valve so it does not affect the other valves. It can also be used for the manifold for the positive pressure and vacuum mixed manifold. (2 pcs. are required to block FA/EB both sides of the EXH.)

Series	SUP blocking disk assembly	EXH blocking disk assembly
SY3000	SY30M-40-1A	SY30M-40-2A
SY5000	SY50M-40-1A	SY50M-40-1A
SY7000	SY70M-40-1A	SY70M-40-1A

■ Label for blocking disk

Label to indicate and confirm on the manifold where the SUP/EXH blocking disk assemblies were inserted. (3 sheets each)

SUP/EXH blocking disk label

SUP blocking disk label

EXH blocking disk label

Series	Part no.
SY3000	SJ3000-155-1A
SY5000	
SY7000	

*: If the blocking disk assembly is ordered using the manifold specification sheet and ordered at the same time as the manifold, the position where the blocking disk assembly is inserted will be labeled and shipped out.

■ Back pressure check valve assembly (Retrofit or pre-installed type)

It prevents cylinder malfunction caused by other valve exhaust entry. Insert it into EA/EB port (valve mounting side) on the manifold side of a valve which is affected. It is effective when a single-acting cylinder is used.

*: When ordering assemblies incorporated with a manifold, refer to the Ordering Example below (when installed in all stations.)

*: When a check valve for back pressure prevention is desired and is to be installed only in certain manifold stations, clearly indicate the part number and specify the mounting position on the manifold specification sheet.

<Precautions>

1. The manifold installed type back pressure check valve assembly is assembly parts with a check valve structure. However, since slight air leakage against the back pressure is allowed due to its structure, adverse effects of the back pressure due to increase in exhaust resistance cannot be prevented if the manifold exhaust port and other exhaust ports are put together for piping or if the piping diameter is narrowed. As a result, this may cause the actuator and air operated equipment to malfunction. So, be careful not to restrict the exhaust air. If the exhaust resistance becomes large, select a built-in valve type with rubber seal.

2. When the back pressure check valve assembly is mounted, please contact SMC for valve flow rate characteristics.

Mount the back pressure check valve assemblies on the EA and EB ports in the order shown in the figure above.

Series	Part no.

Manifold Options

A transparent plastic plate to put a label with the name of the function of the solenoid valve.

■ If adding a name plate

If adding a name plate to a manifold in use, order a name plate bracket assembly, in addition to ordering a name plate. Refer to the table below for the part number and the amount.

Name plate part number

Model		SS5Y3-10	SS5Y5-10/11	SS5Y7-(M)10/11	Note
Name plate	Printed	SY30M-86-□N	SY50M-86-□N	SY70M-86-□N	□:Number of stations (1 to 24)
	No printing	SY30M-86-□	SY50M-86-□	SY70M-86-□	

Name plate bracket assembly part number and number of items ordered

Model		SS5Y3-10	SS5Y5-10/11
Name plate assembly part number		SY30M-85-1A	SY50M-85-1A
Manifold SUP/EXH block assembly Pilot type and P, E port entry	Internal pilot U/D piping	2 pcs.	2 pcs.
	Internal pilot double sided piping	2 pcs.	
	External pilot U/D piping	1 pc.*1	
	External pilot double sided piping	Not required*1	

*1: If the manifold is an external pilot, an insertion slot for name plates is on the port block of the SUP/EXH block assembly. Thus, a bracket assembly is no longer required on the port piping side.

*: Name plate bracket assembly is not required for the SY7000.

Caution

1. Be sure to shut off the power and air supplies before mounting the name plate bracket assembly. Furthermore, since air may remain inside the actuator, piping and manifold, confirm that the air is completely exhausted before performing any work.
2. When disassembly and assembly are performed, air leakage may result if the tightening of the bracket mounting screws is inadequate.

Series SY3000/5000/7000 Specific Product Precautions 1

Be sure to read this before handling. Refer to the back cover for Safety Instructions. For 3/4/5 Port Solenoid Valve Precautions, refer to "Handling Precautions for SMC Products" and the Operation Manual on the SMC website, <http://www.smc.eu>

Environment

Warning

1. Do not use valves in atmospheres of corrosive gases, chemicals, sea water, water, water vapor, or where there is direct contact with any of these.
2. Products compliant with IP67 enclosures (based on IEC60529) are protected against dust and water, however, these products cannot be used in water. If using in an environment that is exposed to water and dust splashes, take measures such as using a protective cover.
3. When using built-in silencer type manifold with an IP67 enclosure, keep the exhaust port of the silencer from coming in direct contact with water or other liquids.
4. The metal seal valve is provided with a hole to discharge the pilot EXH. When using in atmospheres containing water and dust, mount it horizontally.

Valve Mounting

Caution

Mount it so that there is no slippage or deformation in gaskets, and tighten with the tightening torque as shown below.

Series	Thread size	Tightening torque
SY3000	M2	0.16 N·m
SY5000/7000	M3	0.8 N·m

Manual Override

Warning

Regardless of an electric signal for the valve, the manual override is used for switching the main valve. Connected actuator is started by manual operation. Use the manual override after confirming that there is no danger.

Non-locking push type

Push down on the manual override button until it stops.

Push-turn locking slotted type [Type D]

Push down on the manual override with a small flat head screwdriver until it stops, and then turn it 90° clockwise. The manual override is then locked. To release it, turn it counterclockwise.

If it is not turned, it can be operated the same way as the non-locking type.

Manual Override

Warning

Push-turn locking lever type [Type E]

Push down on the manual override by finger until it stops, and then turn it 60° clockwise. The manual override is then locked. To release it, turn it counterclockwise. If it is not turned, it can be operated the same way as the non-locking type.

Carefully check the manual override projection amount.

Max. (at OFF): 3.7 mm

Caution

Do not apply excessive torque when turning the manual override. [0.1 N·m]

When locking the manual override, be sure to push it down before turning. Turning without first pushing it down can cause damage to the manual override and other trouble such as air leakage etc.

Slide locking type (Manual)

It is locked by sliding the manual override all the way in the direction indicated by the arrow (ON side) with a small flat head screwdriver or with your fingers. Slide it in the direction indicated by the arrow (OFF side) to release it.

Series SY3000/5000/7000 Specific Product Precautions 2

Be sure to read this before handling. Refer to the back cover for Safety Instructions. For 3/4/5 Port Solenoid Valve Precautions, refer to “Handling Precautions for SMC Products” and the Operation Manual on the SMC website, <http://www.smc.eu>

Back Pressure Check Valve

⚠ Caution

- There are two types of back pressure check valves; the one which is built into a valve (with rubber seal type only) and the one which is built in on the manifold side with connector connection. Both of them have a check valve built-in to prevent back pressure. For this reason, use caution that the valves with external pilot specification cannot be pressurised from exhaust port [3/5(E)]. As compared with the types which do not integrate the back pressure check valve, C value of the flow rate characteristics goes down. Please contact SMC for details.
- The manifold installed type back pressure check valve assembly is assembly parts with a check valve structure. However, since slight air leakage against the back pressure is allowed due to its structure, adverse effects of the back pressure due to increase in exhaust resistance cannot be prevented if the manifold exhaust port and other exhaust ports are put together for piping or if the piping diameter is narrowed. As a result, this may cause the actuator and air operated equipment to malfunction. So, be careful not to restrict the exhaust air. If the exhaust resistance becomes large, select a built-in valve type with rubber seal.
- Do not switch valves when A or B port is open to the atmosphere, or while the actuators and air operated equipment are in operation. For built-in valve type with rubber seal, the back pressure prevention seal may be peeled off, which may cause air leakage or malfunctions. Use caution especially when performing a trial operation or maintenance work.

Exhaust Throttle

⚠ Caution

The SY series pilot valve and main valve share a common exhaust inside the valve. Therefore, do not block the exhaust port when arranging the piping.

Used as a 3-Port Valve

⚠ Caution

■ In case of using a 5-port valve as a 3-port valve

The SY3000/5000/7000 series can be used as normally closed (N.C.) or normally open (N.O.) 3-port port valves by closing one of the cylinder ports 4(A) or 2(B) with a plug. However, they should be used with the exhaust ports kept open. They are convenient at times when a double solenoid type 3-port valve is required.

Plug position		B port	A port
Type of actuation		N.C.	N.O.
Number of solenoids	Single		
	Double		

Valve and Manifold Combination

The SY series plug-in valve has the common configuration of the valve mounting surface between base mounted type (SY^{3/4}□0□) and top ported type (SY^{3/4}□3□), therefore, it can be mounted to all manifolds of the side ported type (Type 50 and Type 10), the bottom ported type (Type 51 and Type 11) and the top ported type (Type 52 and Type 12). For example, air output can be obtained from both sides of the A and B ports of the manifold and the valve by mounting a top ported valve to a side ported or bottom ported manifold, and a pressure switch can be connected to the output port on one side. However, when selecting valves and manifolds, note that when a base mounted valve is mounted to a top ported manifold, there will be no output from the A and B port.

Series SY3000/5000/7000 Specific Product Precautions 3

Be sure to read this before handling. Refer to the back cover for Safety Instructions. For 3/4/5 Port Solenoid Valve Precautions, refer to "Handling Precautions for SMC Products" and the Operation Manual on the SMC website, <http://www.smc.eu>

Light/Surge Voltage Suppressor

Caution

■ Polar type

Positive common

Single solenoid

Light/surge voltage suppressor (□Z)

Surge voltage suppressor (□S)

Positive common

Double solenoid, 3-position, 4-position

Light/surge voltage suppressor (□Z)

Surge voltage suppressor (□S)

Negative common

Single solenoid

Light/surge voltage suppressor (□NZ)

Surge voltage suppressor (□NS)

Negative common

Double solenoid, 3-position, 4-position

Light/surge voltage suppressor (□NZ)

Surge voltage suppressor (□NS)

■ Non-polar type

With surge voltage suppressor (□R)

Single solenoid

Double solenoid

With light/surge voltage suppressor (□U)

Single solenoid

Double solenoid

■ With power saving circuit

Power consumption is decreased by approx. 1/3 by reducing the wattage required to hold the valve in an energised state. (Effective energising time is over 67 ms at 24 V DC.)

*: Be careful of the energising time, as quick response and high pressure types will become operational when the energising time is over 40 ms.

The above circuit reduces the power consumption for holding in order to save energy. Refer to the electrical power waveform as shown below.

<Electrical power waveform with power saving circuit>

- The 12 V DC specification with power saving circuit (standard specification) does not have the polarity protection diode. Do not make a mistake with the polarity.
- Since the voltage will drop by approx. 0.5 V due to the transistor, pay attention to the allowable voltage fluctuation. (For details, refer to the solenoid specifications of each type of valve.)

Residual voltage of the surge voltage suppressor

*: If a varistor or diode surge voltage suppressor is used, there is some residual voltage to the protection element and rated voltage. Therefore, refer to the below table and pay attention to the surge voltage protection on the controller side. Also, since the response time does change, refer to the valve specifications on page 14.

Residual Voltage

Surge voltage suppressor	DC	
	24 V	12 V
S, Z	Approx. 1 V	
R, U	Approx. 47 V	Approx. 32 V

Series SY3000/5000/7000

Specific Product Precautions 4

Be sure to read this before handling. Refer to the back cover for Safety Instructions. For 3/4/5 Port Solenoid Valve Precautions, refer to "Handling Precautions for SMC Products" and the Operation Manual on the SMC website, <http://www.smc.eu>

Continuous Duty

Caution

If a valve is energised continuously for a long period of time, the rise in temperature due to heat-up of the coil assembly may cause a decline in solenoid valve performance, reduce service life, or have adverse effects on peripheral equipment. If the valve is energised continuously for a long period of time, be sure to use a valve with power saving circuit. In particular, if three or more adjacent stations on the manifold are energised simultaneously for extended periods of time or if the valves on A side and B side are energised simultaneously for a long period of time, take special care as the temperature rise will be greater.

Countermeasure for Surge Voltage Intrusion

■ Sneak-in of surge voltage

With non-polar type valves, at times of sudden interruption of the loading power supply, such as emergency shutdown, surge voltage intrusion may be generated from loading equipment with a large capacity (power consumption), and the valve in a de-energised state may switch over (see Figure 1). When installing a breaker circuit for the loading power supply, consider using a valve with polarity (with polarity protection diode), or install a surge absorption diode between the loading equipment COM line and the output equipment COM line (see Figure 2).

Figure 1. Surge intrusion circuit example (NPN outlet example) (24 V DC)

Figure 2. Surge intrusion circuit example (NPN outlet example) (24 V DC)

Series SY3000/5000/7000

Specific Product Precautions 5

Be sure to read this before handling. Refer to the back cover for Safety Instructions. For 3/4/5 Port Solenoid Valve Precautions, refer to “Handling Precautions for SMC Products” and the Operation Manual on the SMC website, <http://www.smc.eu>

Light Indication

When equipped with indicator light and surge voltage suppressor, the light window turns orange when solenoid a is energised, and it turns green when solenoid b is energised.

Type 5 (Metal Base) Changing Connector Entry Direction

Caution

Connector direction for electrical entry of D-sub connector, flat ribbon cable and PC wiring can be changed. If the directional change is required, push the lever on both sides to remove the connector and change the connector direction for electrical entry as shown in the figure. Since lead wire assemblies are attached to the connector, excessive pulling or twisting can cause broken wires or other trouble. Also, take precautions so that lead wires are not caught and pinched when installing the connector.

Type 1 (Connector Connecting Base) Changing Connector Entry Direction

Caution

Connector direction for electrical entry of D-sub connector <IP40>, flat ribbon cable and PC wiring can be changed. If the directional change is required, slide the lever on the side of the connector block to the FREE position, and then change the direction as shown in the figure. Also, before connecting the connector, be sure to return the lever to the LOCK position. (If the lever is difficult to slide, move the connector a little bit to make it easier to slide the lever.)

If an excessive force is applied on the connector in the LOCK position, the connector block may be damaged. Also, using in such a way that the connector floats in the FREE position, it may cause the lead wire etc., to break. Thus, refrain from using in these ways.

How to Order Manifold

Caution

The letter “f” is indicated on manifold blocks for the SY series Type 1 (connector connecting base) as shown below. This indication refers to the type of substrate assembly (single wiring) inside the manifold blocks. When there is no symbol, double wiring is used.

When the manifold specification sheet does not include a wiring specification, all stations will be double wiring specification. In this case, single and double solenoid valves can be mounted in any position, but when a single valve is used, there will be an unused control signal. To avoid this, indicate positions of manifold blocks for single wiring specification and double wiring specification on a manifold specification sheet. (Note that double, 3-or 4-position valves cannot be used for manifolds blocks with single wiring specification.)

Series SY3000/5000/7000 Specific Product Precautions 6

Be sure to read this before handling. Refer to the back cover for Safety Instructions. For 3/4/5 Port Solenoid Valve Precautions, refer to "Handling Precautions for SMC Products" and the Operation Manual on the SMC website, <http://www.smc.eu>

Substrate Assemblies inside Manifolds

⚠ Caution

Substrate assemblies inside of manifolds cannot be taken apart. Attempting to do so may damage parts.

Fixation of DIN Rail Mounting Type Manifold

⚠ Caution

1. When the manifold is fixed with bolts on a mounting surface etc., it can be operated just by fixing on both ends of the DIN rail if the bottom surface of the DIN rail is entirely in contact with the mounting surface when mounted horizontally. However, if it is used with other mounting or with side or reverse mounting, fix the DIN rail with bolts at regular intervals. As a guide, insert bolts in 2 locations for 2-5 stations, 3 locations for 6-10 stations, 4 locations for 11-15 stations, 5 locations for 16-20 stations and 6 locations for 21-24 stations.
2. When using the manifold with DIN rail in an environment where any vibration or impact is applied to it, the DIN rail itself may be broken. In particular, if the installation surface vibrates when mounting the manifold on the wall or if a load is directly applied to the manifold, the DIN rail may be broken, causing the manifold to drop. When any vibration, impact, or load is applied to the manifold, be sure to use the direct mounting manifold.

Port Block Assembly and How to Change Piping Types between Top and Side

⚠ Caution

For top ported type, the port size of A and B ports can be changed by switching the port block assemblies which are mounted on the body. The piping method can also be changed by switching the top ported type port block assembly with the side ported type cover assembly. Also, it may cause air leakage if the mounting screws are not tightened securely enough when they are switched. Take care to tighten to the correct tightening torque. Refer to page 247 for part numbers of port block assembly and body cover assembly.

When switching them while valves are mounted on a manifold, remove the clip with a flat head screwdriver before switching the port plugs and the One-touch fittings. It may cause air leakage if the mounting screws are not tightened or the clip is not inserted securely enough when they are switched. Take care to tighten to the correct tightening torque.

⚠ Caution

Tightening torque

M2: 0.16 N·m (SY3000)
M3: 0.8 N·m (SY5000/7000)

■ How to change while mounted on a manifold

Series SY3000/5000/7000 Specific Product Precautions 7

Be sure to read this before handling. Refer to the back cover for Safety Instructions. For 3/4/5 Port Solenoid Valve Precautions, refer to "Handling Precautions for SMC Products" and the Operation Manual on the SMC website, <http://www.smc.eu>

Changing One-touch Fittings

⚠ Caution

By replacing One-touch fittings of valve or manifold base, it is possible to change the connection diameter of the 4(A), 2(B), 1(P), 3/5(E) ports.

When replacing the One-touch fittings, remove the clip or the plate and the plate mounting screws with a screwdriver before pulling the One-touch fittings off. Mount the One-touch fittings by following the removal procedure in reverse.

It may cause air leakage if the mounting screws are not tightened or the clip and the clip plate are not inserted securely enough when they are switched. Take care to tighten to the correct tightening torque. Refer to page 248 for part numbers of One-touch fittings for valve or manifold.

■ Valve

SY7000	SY70M-10-4A

*1: A and B ports (Ø 8 and Ø 5/16") of the SY3000/5000 mixed mounting type are those for the SY5000.

Other Tube Brands

⚠ Caution

1. When using other than SMC brand tube, confirm that the following specifications are satisfied with respect to the tube outside diameter tolerance.

- | | |
|----------------------|----------------------------|
| 1) Nylon tube | within ±0.1 mm |
| 2) Soft nylon tube | within ±0.1 mm |
| 3) Polyurethane tube | within +0.15 mm
-0.2 mm |

Do not use tube which do not meet these outside diameter tolerances. It may not be possible to connect them, or they may cause other trouble, such as air leakage or the tube pulling out after connection.

One-touch Fittings

■ Tube attachment/detachment for One-touch fittings

1) Tube attachment

1. Take a tube having no flaws on its periphery and cut it off at a right angle. When cutting the tube, use tube cutters TK-1, 2 or 3. Do not use pinchers, nippers or scissors, etc. If cutting is done with tools other than tube cutters, the tube may be cut diagonally or become flattened, etc., making a secure installation impossible, and causing problems such as the tube pulling out after installation or air leakage. Allow some extra length in the tube.
2. Grasp the tube and push it in slowly, inserting it securely all the way into the fitting.
3. After inserting the tube, pull on it lightly to confirm that it will not come out. If it is not installed securely all the way into the fitting, this can cause problems such as air leakage or the tube pulling out.

2) Tube detachment

1. Push in the release button sufficiently, pushing its collar equally around the circumference.
2. Pull out the tube while holding down the release button so that it does not come out. If the release button is not pressed down sufficiently, there will be increased bite on the tube and it will become more difficult to pull it out.
3. When the removed tube is to be used again, cut off the portion which has been chewed before reusing it. If the chewed portion of the tube is used as is, this can cause trouble such as air leakage or difficulty in removing the tube.

Series SY3000/5000/7000 Specific Product Precautions 8

Be sure to read this before handling. Refer to the back cover for Safety Instructions. For 3/4/5 Port Solenoid Valve Precautions, refer to “Handling Precautions for SMC Products” and the Operation Manual on the SMC website, <http://www.smc.eu>

One-touch Fittings

Caution

When fittings are used, they may interfere with one another depending on their types and sizes. Therefore, the dimensions of the fittings to be used should first be confirmed in their respective catalogs.

Fittings whose compliance with the SY series is already confirmed are stated below. If the fitting within the applicable range is selected, there will not be any interference.

Applicable Fittings: Series KQ2H, KQ2S

Safety Instructions

These safety instructions are intended to prevent hazardous situations and/or equipment damage. These instructions indicate the level of potential hazard with the labels of “Caution,” “Warning” or “Danger.” They are all important notes for safety and must be followed in addition to International Standards (ISO/IEC)*1), and other safety regulations.

-  **Caution:** Caution indicates a hazard with a low level of risk which, if not avoided, could result in minor or moderate injury.
-  **Warning:** Warning indicates a hazard with a medium level of risk which, if not avoided, could result in death or serious injury.
-  **Danger:** Danger indicates a hazard with a high level of risk which, if not avoided, will result in death or serious injury.

- *1) ISO 4414: Pneumatic fluid power – General rules relating to systems.
ISO 4413: Hydraulic fluid power – General rules relating to systems.
IEC 60204-1: Safety of machinery – Electrical equipment of machines.
(Part 1: General requirements)
ISO 10218-1: Manipulating industrial robots - Safety.
etc.

Warning

1. The compatibility of the product is the responsibility of the person who designs the equipment or decides its specifications.

Since the product specified here is used under various operating conditions, its compatibility with specific equipment must be decided by the person who designs the equipment or decides its specifications based on necessary analysis and test results. The expected performance and safety assurance of the equipment will be the responsibility of the person who has determined its compatibility with the product. This person should also continuously review all specifications of the product referring to its latest catalogue information, with a view to giving due consideration to any possibility of equipment failure when configuring the equipment.

2. Only personnel with appropriate training should operate machinery and equipment.

The product specified here may become unsafe if handled incorrectly. The assembly, operation and maintenance of machines or equipment including our products must be performed by an operator who is appropriately trained and experienced.

3. Do not service or attempt to remove product and machinery/equipment until safety is confirmed.

1. The inspection and maintenance of machinery/equipment should only be performed after measures to prevent falling or runaway of the driven objects have been confirmed.
2. When the product is to be removed, confirm that the safety measures as mentioned above are implemented and the power from any appropriate source is cut, and read and understand the specific product precautions of all relevant products carefully.
3. Before machinery/equipment is restarted, take measures to prevent unexpected operation and malfunction.

4. Contact SMC beforehand and take special consideration of safety measures if the product is to be used in any of the following conditions.

1. Conditions and environments outside of the given specifications, or use outdoors or in a place exposed to direct sunlight.
2. Installation on equipment in conjunction with atomic energy, railways, air navigation, space, shipping, vehicles, military, medical treatment, combustion and recreation, or equipment in contact with food and beverages, emergency stop circuits, clutch and brake circuits in press applications, safety equipment or other applications unsuitable for the standard specifications described in the product catalogue.
3. An application which could have negative effects on people, property, or animals requiring special safety analysis.
4. Use in an interlock circuit, which requires the provision of double interlock for possible failure by using a mechanical protective function, and periodical checks to confirm proper operation.

Limited warranty and Disclaimer/ Compliance Requirements

The product used is subject to the following “Limited warranty and Disclaimer” and “Compliance Requirements”.
Read and accept them before using the product.

Limited warranty and Disclaimer

1. The warranty period of the product is 1 year in service or 1.5 years after the product is delivered, whichever is first.*2) Also, the product may have specified durability, running distance or replacement parts. Please consult your nearest sales branch.
2. For any failure or damage reported within the warranty period which is clearly our responsibility, a replacement product or necessary parts will be provided. This limited warranty applies only to our product independently, and not to any other damage incurred due to the failure of the product.
3. Prior to using SMC products, please read and understand the warranty terms and disclaimers noted in the specified catalogue for the particular products.

*2) Vacuum pads are excluded from this 1 year warranty.

A vacuum pad is a consumable part, so it is warranted for a year after it is delivered. Also, even within the warranty period, the wear of a product due to the use of the vacuum pad or failure due to the deterioration of rubber material are not covered by the limited warranty.

Compliance Requirements

1. The use of SMC products with production equipment for the manufacture of weapons of mass destruction (WMD) or any other weapon is strictly prohibited.
2. The exports of SMC products or technology from one country to another are governed by the relevant security laws and regulations of the countries involved in the transaction. Prior to the shipment of a SMC product to another country, assure that all local rules governing that export are known and followed.

Caution

1. The product is provided for use in manufacturing industries.

The product herein described is basically provided for peaceful use in manufacturing industries.

If considering using the product in other industries, consult SMC beforehand and exchange specifications or a contract if necessary.

If anything is unclear, contact your nearest sales branch.

Caution

SMC products are not intended for use as instruments for legal metrology.

Measurement instruments that SMC manufactures or sells have not been qualified by type approval tests relevant to the metrology (measurement) laws of each country. Therefore, SMC products cannot be used for business or certification ordained by the metrology (measurement) laws of each country.

Safety Instructions

Be sure to read “Handling Precautions for SMC Products” (M-E03-3) before using.
