

# C(D)55, Compact Cylinder ISO Standard (ISO 21287) CD55B40-30M

**Datasheet** 

## **General series information**

- Conforms with the ISO 21287 standard.
- Bore sizes of 20, 25, 32, 40, 50, 63, 80 & 100 mm.
- Large stroke range from 5 mm up to 150 mm.
- Construction is similar to the current CQ2 lateral load resistant specification.
- Snap ring construction allows easy and quicker maintenance.
- Auto switches can be mounted on any of the four sides of the cylinder tube.

Double-acting, single-rod cylinder

# **Standard specifications**

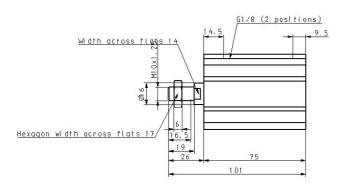

| Built-in Magnet                                    | D (With Magnet)                           |
|--|---|
| Mounting Style                                     | B (Standard)                              |
| Bore Size  | 40mm                                      |
| Stroke   | 30  |
| Rod End Thread                                     | M (Rod End Male Thread)                   |
| Auto Switch  | No Switch                                 |
| Lead Wire or Prewired Connector                    | 0.5m [Or None in the Case of No Switch]   |
| Number   | 2 pcs. [Or None in the Case of No Switch] |
| Rod End Options                                    | None                                      |
| Made of Stainless Steel                            | None                                      |
| Pressure medium                                    | Air                                       |
| Maximum temperature of pressure medium             | 70 °C                                     |
| Maximum temperature of pressure medium with magnet | 60 °C                                     |
| Minimum temperature of pressure medium             | -10 °C (No freezing)                      |
| Minimum temperature of pressure medium with magnet | -10 °C (No freezing)                      |
| Maximum operating pressure                         | 1.0 MPa                                   |
| Minimum operating pressure                         | 0.05 MPa                                  |

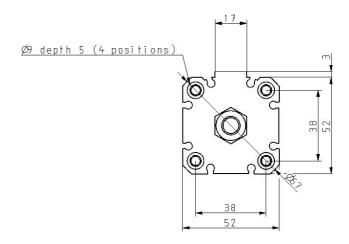

Specifications are subject to change without prior notice and any obligation on the part of the manufacturer.

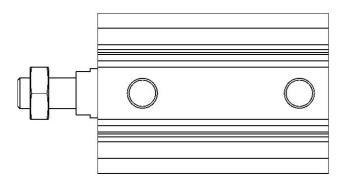

| Proof pressure  | 1.5 MPa                   |
|---|---------------------------|
| Maximum ambient temperature                             | 70 °C                     |
| Maximum ambient temperature with magnet                 | 60 °C                     |
| Minimum ambient temperature                             | -10 °C (No freezing)      |
| Minimum ambient temperature with magnet                 | -10 °C (No freezing)      |
| Number of pneumatic connections                         | 2 pcs.                    |
| Pneumatic input connection                              | G 1/8                     |
| Pneumatic exhaust connection                            | G 1/8                     |
| Mode of operation of drive                              | Double acting             |
| Theoretical cylinder force, advance stroke (at 0.5 MPa) | 628 N                     |
| Theoretical cylinder force, return stroke (at 0.5 MPa)  | 528 N                     |
| Maximum piston speed                                    | 500 mm/s                  |
| Type of cushioning                                      | Rubber bumper on both end |
| Geometric form of the piston rod                        | Single rod                |
| Male thread of rod end                                  | M10 x 1.25                |
| Female thread of rod end                                | M8 x 1.25                 |
| Weight  | 0.441 Kg                  |

### **Component Parts**

| No.  | Description    | Material              | Note                                |
|------|----------------|-----------------------|-------------------------------------|
| 1    | Cylinder tube  | Aluminum alloy        | Hard anodised                       |
| 2    | Piston         | Aluminum alloy        | Chromated                           |
| 3 Pi | Piston rod     | Stainless steel       | ø20, ø25                            |
| 3    | Pistoli rou    | Carbon steel          | ø32 to ø100 Hard chrome plated      |
| 4    | 4 Collar       | Aluminum alloy        | ø20 to ø40 Anodized                 |
| 4    |                | Aluminum alloy casted | ø50 to ø100 Painted after chromated |
| 5    | Retaining ring | Carbon tool steel     | Phosphate coated                    |
| 6    | Bumper A       | Urethane              |                                     |
| 7    | Bumper B       | Urethane              |                                     |
| 8    | Bushing        | Bearing alloy         |                                     |
| 9    | Wear ring      | Resin                 | ø20 to ø63                          |
| 10   | Magnet         | _                     |                                     |
| 11   | Rod end nut    | Carbon steel          | Nickel plated                       |
| 12   | Rod seal       | NBR                   |                                     |
| 13   | Piston seal    | NBR                   |                                     |
| 14   | Tube gasket    | NBR                   |                                     |

## With auto switch (Built-in magnet)

## Replacement Parts/Seal Kit

| Bore size (mm) | Kit no.    | Contents              |  |  |
|----------------|------------|-----------------------|--|--|
| 20             | CQ2B20-PS  |                       |  |  |
| 25             | CQ2B25-PS  |                       |  |  |
| 32             | CQ2B32-PS  |                       |  |  |
| 40             | CQ2B40-PS  | Set of nos.           |  |  |
| 50             | CQ2B50-PS  | at left<br>12, 13, 14 |  |  |
| 63             | CQ2B63-PS  | 9, 9, 0               |  |  |
| 80             | CQ2B80-PS  |                       |  |  |
| 100            | CQ2B100-PS |                       |  |  |
|                |            |                       |  |  |

\* Seal kit includes 2, 3, 4. Order the seal kit, based on each bore size.
