

Decoline™ consumer pail solution

EASY TO OPEN AND JUST AS EASY TO RESEAL

Paint

Chemical

Tin cans often require tools to open and sometimes to close. We decided to change this. With the EasyFlex™ lid, we developed an award winning, unique solution with an injection-molded plastic rim around the lid. All you have to do to open the can is fold the rim upwards and lift off the lid. To reseal, simply fold the plastic rim back over the can again. A user friendly can that retains the quality, finish and design possibilities of metal.

No tools necessary

Fold the plastic rim upwards by hand and simply lift of the lid. To reseal, just put the lid back on and fold the plastic rim downwards.

Prize-winning design

This unique combination of plastic and metal was awarded the Packaging Innovation Award.

Finish

The pails can be supplied plain, white or with your own decorative design.

Robust

EasyFlex was subjected to a great deal during its development. Long series of tests (shaking, drop, pressure, etc.) ensured that EasyFlex meets our stringent requirements in respect of robustness.

Safe storage

Metal is relative insensitive to temperature changes. This ensures that there is no deterioration in the quality of the content, e.g. paint.

Fold

Lift

Close

Decoline™ pails with EasyFlex™ lid solution

Decoline™ Series is a conical pail for paint and chemical/technical products. Easy to open and re-close with the EasyFlex™ lid with plastic ring. The conical design of the Decoline™ pail is logistically advantageous as empty packs are supplied stacked inside each other resulting in higher quantities per pallet. The external is available in plain, white or decorated to customers' request. The internal is available lacquered.

PAILS

Volume (L)	Height (mm)	Diameter (mm)	Pails/box	Box/pallet	Pails/pallet
2,5	139	180			400
3	153	180			375
4	193	180			325
5	243	180			275
10	215	285			209

LIDS

Description	Diameter (mm)	Lids/box	Box/pallet	Lids/pallet
EasyFlex™	180			1760
EasyFlex™	285	272	2	544

Pallet pattern ø180, 25 pails/layer

Pallet pattern ø285, 11 pails/layer

INTERNAL PROTECTIVE COATINGS

Designation	Number of layers	Lacquer	Area of use*
T	1	Gold	Food, Certain technical products
C	2	Gold +Pigmented	Water based paints, without rust protection inhibitors Not suitable for strong solvents
D/DA	2	Gold	Corrosive industrial coatings

* This is only a general indication of the appropriate areas of use. The internal coating lacquer should always be tested with the product for which the can is intended to be used.
