

RECEPTACLE + FEET FOR IBC SPILL PALLET

Ref. **RECEPMR006F**

Product Information:

The dispensing receptacle is an essential accessory for transfer or recovery operations of liquids from IBC containers.

Designed to easily hook onto the edge of tanks, it provides a practical, safe, and clean solution for managing liquid dispensing without the risk of spills. Made of HDPE, this receptacle stands out for its robustness and resistance to chemicals, weather conditions, and intensive use.

Its optimized dimensions and ergonomic design make it compatible with a wide range of containers, whether or not they are equipped with a leveling foot. It adapts to various professional needs, whether in the chemical, agri-food, or agricultural industries.

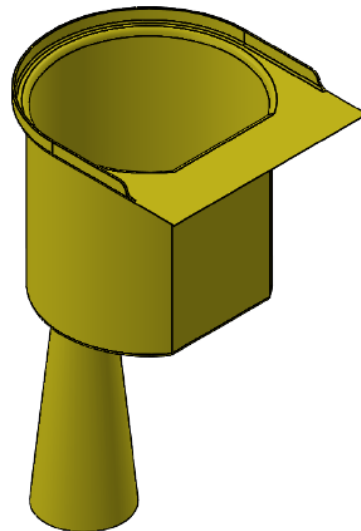

Easy to clean and handle, this receptacle combines practicality and safety, making it an essential piece of equipment for efficient liquid management. A reliable, versatile, and durable solution to meet the demands of the most challenging professional environments.

Technical Specifications:

Material: 100% durable and resistant HDPE
Overall dimensions (L*W*H): 630*575*475 mm
Diameter (Ø): 500 mm
Color: Yellow (TEIN006 – similar to RAL 1028)

Available references:
