

# EKO 40

## **Technical Details**

Adhesive:	Synthetic Rubber
Material:	EPDM-NR-SBR cellular rubber
Protective film:	Polypropylene
Thickness:	2,3,4,5,6,8,10,12 and 15mm
Thermal resistance:	Cellular rubber -40 - + 70 C, adhesive -10 - +60 C
Colour:	Black, white
Hardness:	40 - 60Sh (00)
Compression:	30 %
Structure:	Closed cell

## **Description**

EKO 40 is a closed cell EPDM –cellular rubber sealing (EPDM-NR-SBR) with synthetic rubber adhesive on one side. Removable plastic liner.

## **Applications**

EKO 40 is used for general sealing, when there is a need for waterproof joint. Product has good compression durability.

## **Measures**

Max width	1000mm
Available:	Cut rolls, Spools
Widths:	6mm – 1280 mm
