## Senso Dial ESD

Senso Dial ESD is a development of the classic Senso Dial specifically for ESD environments.

The mat is as durable and ergonomic as the original, but the top surface contains a carbon mixture that conducts static electricity. For the mat to function correctly, it needs to either be placed on an ESD floor or connected to a grounding point.

The mat is always delivered with a mounted connection button and a grounding cable is available as an option.

Senso Dial ESD is tested and approved according to IEC 61340-5-1.

The mat is available in certain standard widths but can also be delivered completely according to special dimensions. The edges are always beveled unless otherwise requested.

Part. nr	Name	Size (m)	Color
5102430	Senso Dial ESD	0,7 x 10,0	Black
5102530	Senso Dial ESD	1,0 x 10,0	Black
5102630	Senso Dial ESD	1,4 x 10,0	Black

- Very durable
- Good slip resistance
- Approved according to IEC 61340-5-1
