

Declaration of Compliance

1. Compliance with European legislation

On behalf of Sealed Air Corp., we hereby declare that our food-packaging product marketed under the name of

CELL AIRE[®]

complies with

- Regulation No 1935/2004/EC of the European Parliament and of the Council of 27 October 2004 on materials and articles intended to come into contact with food and repealing Directives 80/590/EEC and 89/109/EEC.

Traceability as required by Art. 17 of the Regulation is ensured by the “lot or batch number” and the “material number” reported on the label.

- Commission Directive No 2002/72/EC of 6 August 2002 relating to plastic materials and articles intended to come into contact with foodstuffs, as amended at the present date.

The production is made according to Regulation No 2023/2006/EC on Good Manufacturing Practice for materials and articles intended to come into contact with food. Please note that as our products do not contain postconsumer recycled plastics, statements of compliance with Regulation 282/2008/EC are not required.

2. Conditions of application

The product can be used for packaging and storage of all type of food at room temperature or below.

Overall Migration Limits and other specific restrictions on monomers and/or additives also adhere to the conditions above. Such statements are backed-up either by testing, according to Directives 82/711/EEC and 85/572/EEC, or by worst-case calculation (i.e. assuming full migration of the specific substance). All calculations have been carried out under the condition that 1 kg of food is in contact with 6 sq. dm of packaging product.

Substances regulated by Directive 89/107/EEC and/or by Directive 88/388/EEC may be contained in the product and are not expected to migrate in a quantity having effect on the food. Any restriction that may apply to the food related to substances regulated by the above-mentioned Directives remains under the responsibility of the user of the packaging product.

3. Compositional information

Food contact layer: Polyethylene

Other layers: Polyethylene
