

TECHNICAL DATA SHEET

FOR LDPE RECLOSABLE BAGS

Product Description

LDPE Reclosable Bags are made of resin by Low-Density Polyethylene. It is mainly used in packing field.

Characteristics

It is light, flexible, transparent, easy to use.

Applications

- Food packing,
- goods packaging,
- document classification, etc

physical properties

Density	ASTM D2839/d1505	0.910~0.940 g/cm ³
Melting Temperature	ASTM D3418	90 °C ~160 °C
Temperature range of using		-20 °C ~60 °C

Product Properties		Test based on	Typical value/Unit
Tensile Strength	MD	GB 13022—91	25 MPa
	TD		14 ,MPa
Elongation Breaking	MD	GB 13022—91	220%
	TD		810%
light transmittance		GB 2410—80	91.0%
Haze		GB 2410—80	9.0%
Side Seal Strength		QB/T 2358—1998	14.0 N/15mm

Note: Measurement of the product properties is based on a 0.05 mm thick bags. Its typical value is average.
