

DS 1500g(BK) Product Sheet

Typical Properties

Super Dry desiccants are made of Calcium Chloride and starch. Calcium Chloride is a hygroscopic salt able to attract and bind large amounts of water. At 95% RH and 50°C over a period of 30 days, the moisture absorption rate of Super Dry desiccant is over 300% of the desiccant bags net weight.

Super Dry desiccants absorb moisture and turn the resultant mix into a gel by means of an irreversible reaction, which eliminates any possibility of leakage.

Packing Format

1 items per plastic bag, and 6 bags per carton, with a total of 6 items per carton. The plastic bag shows all info under the legal requirements of CLP under REACH.

Shelf Life

24 Months from date of production if stored in a dry warehouse with normal humidity and if packaging remains un-opened. If packaging is opened, use the desiccants as soon as possible, and re-seal the plastic bag immediately after use.

Health and Safety

Calcium Chloride releases heat when adsorbing water. If a large quantity of Calcium Chloride quickly adsorbs water, the adsorbent can become hot; contact has to be avoided under these conditions.

CAS 10043-52-4

Warning

Causes serious eye irritations.

The inner and outer layer bags of the desiccant prevent direct contact of the Calcium Chloride with the workplace. Avoid damage and destruction of the inner and outer layer linings.

For further information, please refer to our MSDS for which you please contact us through our local sales representative or by email

Product Description

Brand:	Super Dry
Product Model:	DS 1500g(BK)
Net Weight:	1500 grams
Bag construction:	Tyvek inner lining, + PE/PP + Non-woven outer layer bag Adhesive tape
Flat dimensions:	46.0 x 110.0 cm
Ingredients:	Calcium Chloride Starch Polyethylene
Printed info:	REACH ROHs DMF FREE NON-TOXIC DO NOT EAT Required info for packaging according to CLP under REACH.
